**UNIT AND DIRECT SUPPORT MAINTENANCE
REPAIR PARTS AND SPECIAL TOOLS LIST**

SECTION I INTRODUCTION

1. SCOPE. This RPSTL lists and authorizes spares and repair parts, special tools, special test, measurement, and diagnostic equipment (TMDE), and other special support equipment required for performance of unit and direct support maintenance of the Fire Suppression Equipment Set It authorizes the requisitioning, Issue, and disposition of spares, repair parts and special tools as indicated by the source, maintenance, and recoverability (SMR) codes

2. GENERAL. In addition to Section I, Introduction, this Repair Parts and Special Tools List is divided into the following sections:

a. **Section II Repair Parts List.** A list of spares and repair parts authorized by this RPSTL for use in the performance of maintenance The list also includes parts which must be removed for replacement of the authorized parts. Parts lists are composed of functional groups with the parts in each group listed in ascending figure and item number sequence Bulk materials are listed In Item name sequence Repair parts kits are listed separately in their own functional group within Section II Repair parts for repairable special tools are also listed in this section Items listed are shown on the associated illustration(s)/ figure(s).

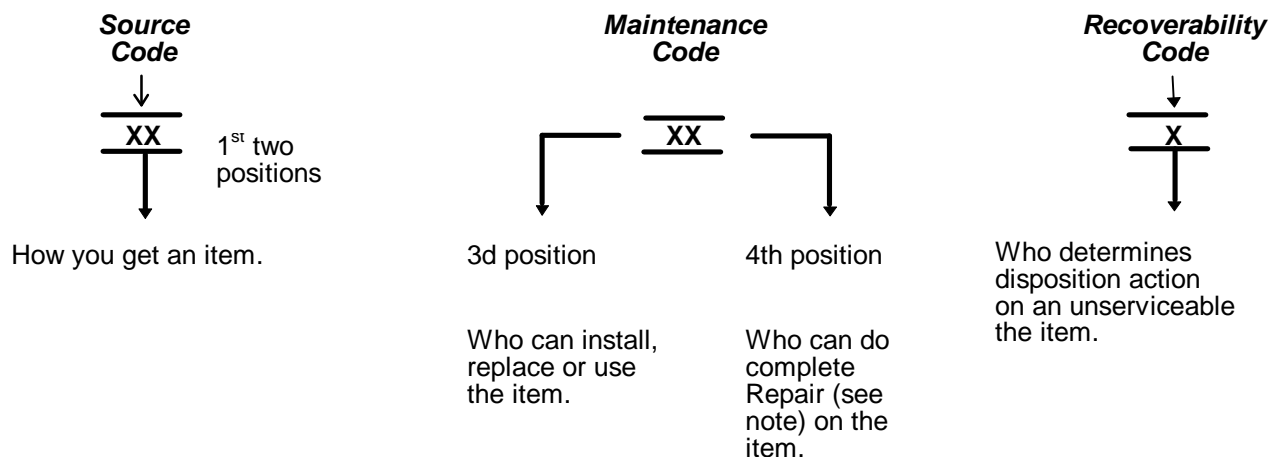

b. **Section III Special Tools List.** A list of special tools, special TMDE, and other special support equipment authorized by this RPSTL (as indicated by Basis of Issue, BOI, information in DESCRIPTION AND USABLE ON CODE column) for the performance of maintenance.

c. **Section IV Cross Reference Index.** A list, in National Item Identification Number (NIIN)sequence, of all National Stock Number (NSN) items appearing In the listing, followed by a list In alphanumeric sequence of all part numbers appearing in the listings National stock numbers and part numbers are cross-referenced to each illustration figure and item number appearance The figure and item number index lists figure and item numbers in alphanumeric sequence and cross-references NSN, CAGE, and part numbers.

3 EXPLANATION OF COLUMNS (Sections II and III)

a **Item No , Column (1).** Indicates the number used to identify items called out in the illustrations.

b. **SMR Code, Column (2).** The Source, Maintenance, and Recoverability (SMR) code is a five position code containing supply/requisitioning information, maintenance category authorization criteria, and disposition instructions, as shown in the following breakout

* Complete Repair Maintenance capacity, capability, and authority to perform all the corrective maintenance tasks of the "Repair" function in a use/user environment in order to restore serviceability to a failed item.

(1) **Source Code.** The source code tells you how you get an Item needed for maintenance, repair, or overhaul of an end Item/equipment Explanations of source codes follow

Code	Explanation
PA BB PC** PD PE PF PG	<p>Stocked Items, use the applicable NSN to request/requisition items with these source codes They are authorized to the category Indicated by the code entered in the 3d position of the SMR code.</p> <p>**NOTE Items codes PC are subject to deterioration.</p>
KD KF KB	<p>Items with these codes are not to be requested/requisitioned individually. They are part of a kit which is authorized to the maintenance category indicated in the 3d position of the SMR code. The complete kit must be requisitioned and applied.</p>
MO (Made at org AVUM level) MF (Made at DS/AVUM level) MH (Made at GS level) ML (Made at Specialized Repair Activity (SRA)) MD (Made at Depot)	<p>Items with these codes are not to be requested/requisitioned individually. They must be made from bulk material which is identified by the part number in the DESCRIPTION and USABLE ON CODE (UOC) column and listed in the Bulk Material group of the repair parts list in the RPSTL. If the item is authorized to you by the 3d position code of the SMR code, but the source code indicates it is made at a higher level, order the item from the higher level of maintenance.</p>
AO (Assembled by org AVUM level) AF (Assembled by DS/AVUM level) AH (Assembled by GS level) AL (Assembled by Specialized Repair Activity (SRA)) AD (Assembled by Depot)	<p>Items with these codes are not to be requested/requisitioned individually. The parts that make up the assembled Item must be requisitioned or fabricated and assembled at the level of maintenance indicated at the source code. If the 3d position code of the SMR code, authorizes you to replace the item, but the source code indicates the items are assembled at a higher level, order the Item from the higher level of maintenance.</p>

Code	Explanation
XA --	Do not requisition an "XA"-coded item. Order its next higher assembly. (Also, refer to the NOTE below).
XB --	If an "XB" item is not available from salvage, order it using the FSCM and part number given.
XC --	Installation drawing, diagram, instruction sheet, field service drawing, that is identified at manufacturer's part number
XD --	Item is not stocked. Order an "XD"-coded item through normal supply channels using the FSCM and part number given, if no NSN is available.

NOTE

Cannibalization or controlled exchange, when authorized, may be used as a source of supply for items with the above source codes, except for those source coded "XA" or those aircraft support items restricted at requirements of AR 700-42.

(2) Maintenance Code Maintenance codes tell you the level(s) of maintenance authorized to USE and REPAIR support items. The maintenance codes are entered in the third and fourth positions of the SMR Code as follows:

(a) The maintenance code entered in the third position tells you the lowest maintenance category authorized to remove, replace, and use an item. The maintenance code entered in the third position will indicate authorization to one of the following categories of maintenance.

Code	Application/Explanation
C	- Crew or operator maintenance done within unit or aviation unit maintenance.
O	- Unit or aviation unit category can remove, replace, and use the item.
F	- Intermediate Direct support or aviation intermediate category can remove, replace, and use the item.
H	- Intermediate General support level can remove, replace, and use the item.
L	- Specialized repair activity can remove, replace, and use the item.
D	- Depot category can remove, replace, and use the item.

(b) The maintenance code entered in the fourth position tells you whether or not the item is to be repaired and identifies the lowest maintenance category with the capability to do complete repair (ie , perform all authorized repair functions). (NOTE: Some limited repair may be done on the item at a lower category of maintenance, if authorized by the Maintenance Allocation Chart (MAC) and SMR codes.) This position will contain one of the following codes.

Code	Application/Explanation
O	- Unit or aviation unit is the lowest category that can do complete repair of the item.
F	- Intermediate Direct support or aviation intermediate is the lowest category that can do complete repair of the item
H	- Intermediate General support is the lowest category that can do complete repair of the item.
L	- Repair restricted to designated specialized repair activity.
D	- Depot is the lowest category that can do complete repair of the item.
Z	- Non-repairable. No repair is authorized.
B	- No repair is authorized. (No parts or special tools are authorized for the maintenance of a "B" coded item.) However, the item may be reconditioned at adjusting, lubricating, etc , at the user level.

(3) **Recoverability Code.** Recoverability codes are assigned to items to indicate the disposition action on unserviceable items. The recoverability code is entered in the fifth position of the SMR Code as follows.

Recoverability Codes	Definition
Z	- Non-repairable Item When unserviceable, condemn and dispose of the Item at the category of maintenance shown in third position of SMR Code
O	- Repairable Item When uneconomically repairable, condemn and dispose of the Item at unit or aviation unit category

F - Repairable Item. When uneconomically repairable, condemn and dispose of the item at the intermediate direct support or aviation intermediate category.

H - Repairable item. When uneconomically repairable, condemn and dispose of the item at the intermediate general support category.

D - Repairable Item. When beyond lower category repair capability, return to depot. Condemnation and disposal of item not authorized below depot category.

L - Repairable item. Condemnation and disposal not authorized below specialized repair activity.

A - Item requires special handling or condemnation procedures because of specific reasons (i.e., precious metal content, high dollar value, critical material, or hazardous material.) Refer to appropriate manuals/directives for specific instructions.

c. **FSCM, Column (3).** The Federal Supply Code for Manufacturer (FSCM) is a 5-digit numeric code which is used to identify the manufacturer, distributor, or Government agency, etc, that supplies the item.

d. **Part Number, Column (4).** Indicates the primary number used at the manufacturer (individual, company, firm, corporation, or Government activity), which controls the design and characteristics of the item at means of its engineering drawings, specifications, standards, and inspection requirements to identify an item or range of items.

NOTE

When you use an NSN to requisition an Item, the item you receive may have a different part number from the part ordered, but go ahead and use or furnish it as the replacement part.

e. Description and USABLE ON CODE, Column 5. This column includes the following information.

(1) The Federal item name and, when required, a minimum description to identify the item.

(2) The physical security classification of the item is indicated at the parenthetical entry (insert applicable physical security classification abbreviation, e.g., Phy Sec C1 (C) - Confidential, Phy Sec C1 (S) - Secret, Phy Sec C1 (T) - Top Secret).

(3) Items that are included in kits and sets are listed below the name of the kit or set.

(4) Spare/repair parts that make up an assembled item are listed immediately following the assembled item line entry.

(5) Part numbers for bulk material are referenced in the description column in the line item entry for the item to be manufactured/fabricated.

(6) When the item is not used, part to be used differs between serial numbers of the same model, the effective serial numbers are shown as the last line of the description.

(7) The USABLE ON CODE, when applicable (see paragraph 4, Special Information).

(8) In the Special Tools List section, the Basis Of Issue (BOI) appears as the last line(s) in the entry for each special tool, special TMDE, and other special support equipment. When density of equipments supported exceeds density spread indicated in the basis of issue, the total authorization is increased proportionately.

(9) The statement "END OF FIGURE" appears just below the last item description in column five for a given figure in both Sections II and III.

f. **QTY, Column (6).** The QTY (quantity per figure column) Indicates the quantity of the item used in the breakout shown on the illustration figure, which is prepared for a functional group, subfunctional group, or an assembly. A "V" appearing in this column in lieu of a quantity indicates that the quantity is variable and the quantity may vary from application to application.

4. EXPLANATION OF COLUMNS (SECTION IV).

a. **National Stock Number (NSN) Index**

(1) **Stock Number Column.** This column lists the NSN at National Item Identification Number (NIIN) sequence. The NIIN consists of the last nine digits of the NSN, i e,

$$\begin{array}{r} \text{NSN} \\ \hline (5305-01-574-1467) \\ \hline \text{NIIN} \end{array}$$

When using this column to locate an item, ignore the first four digits of the NSN. However, the complete NSN should be used when ordering items at stock number.

(2) **FIG Column.** This column lists the number of the figure where the item is identified/located. The figures are in numerical order in Section II and Section III.

(3) **ITEM Column.** The item number identifies the item associated with the figure listed in the adjacent FIG column. This item is also identified at the NSN listed on the same line.

b. **Part Number Index.** Part numbers in this index are listed at part number in ascending alphanumeric sequence (i e, vertical arrangement of letter and number combination which places the first letter or digit of each group in order A through Z, followed at the numbers) through 9 and each following letter or digit in like order).

(1) **FSCM Column.** The Federal Supply Code for Manufacturer (FSCM) is a five digit numeric code used to identify the manufacturer, distributor or government agency, etc, that supplies the item.

(2) **Part Number Column.** Indicates the primary number used at the manufacturer (individual, firm, corporation, or Government activity), which controls the design and characteristics of the item at means of its engineering drawings, specifications standards, and inspection requirements to identify an item or range of items.

(3) **Stock Number Column.** This column lists the NSN for the associated part number and manufacturer identified in the PART NUMBER and FSCM columns to the left.

(4) **Fig. Column.** This column lists the number of the figure where the item is identified/located in Sections II and III.

(5) **Item Column.** The item number is that number assigned to the item as it appears in the figure referenced in the adjacent figure number column.

c. **FIGURE AND ITEM NUMBER INDEX**

(1) **Fig Column.** This column lists the number of the figure where the item is identified/located in Section II and III.

(2) **Item Column.** The item number is that number assigned to the item as it appears in the figure referenced in the adjacent figure number column.

(3) **Stock Number Column.** This column lists the NSN for the associated part number and manufacturer identified in the PART NUMBER and FSCM columns to the left.

(3) **Stock Number Column.** This column lists the NSN for the associated part number and manufacturer identified in the PART NUMBER and FSCM columns to the left.

(4) **FSCM Column.** The Federal Supply Code for Manufacturer (FSCM) is a five digit numeric code used to identify the manufacturer, distributor, or government agency, etc, that supplies the item.

(5) **Part Number Column.** Indicates the primary number used at the manufacturer (individual, firm, corporation, or Government activity), which controls the design and characteristics of the item at means of its engineering drawings, specifications standards, and inspection requirements to identify an item or range of items.

5. SPECIAL INFORMATION.

a. **USABLE ON CODE.** The Usable On Code appears in the lower left corner of the description column heading. Usable on codes are shown as "UOC " in the Description Column (justified left) on the last line applicable item description/ nomenclature. Uncoded items are applicable to all models.

b. **ASSOCIATED PUBLICATIONS.** The publication listed below pertains to the Fire Suppression Equipment Set and its components.

Publication	Short Title
TM 10-4210-235-13	Fire Suppression Equipment Set

6. HOW TO LOCATE REPAIR PARTS

a. When National Stock Number or Part Number is NOT Known:

(1) **First.** Using the table of contents, determine the assembly group or subassembly group to which the item belongs. This is necessary since figures are prepared for assembly groups and subassembly groups, and listings are divided into the same groups.

(2) **Second.** Find the figure covering the assembly group or subassembly group to which the item belongs.

(3) **Third.** Identify the item on the figure and use the Figure and Item number index to find the NSN.

b. When National Stock Number or Part Number is Known:

(1) **First.** Using the National Stock Number or Part Number Index, find the pertinent National Stock Number or Part Number. The NSN index is in National Item Identification Number (NIIN) sequence, (see 4 a (1)). The part numbers in the Part Number index are listed in ascending alphanumeric sequence, (see paragraph 4 b). Both indexes cross-reference you to the illustration/figure and item number of the item you are looking for.

(2) **Second.** Turn to the figure and Item number, verify that the item is the one you are looking for, then locate the item number in the repair parts list for the figure.

7. ABBREVIATIONS.

All abbreviations are in accordance with MIL-STD-12.

The Metric System and Equivalents

Linear Measure

1 centimeter = 10 millimeters = .39 inch
 1 decimeter = 10 centimeters = 3.94 inches
 1 meter = 10 decimeters = 39.37 inches
 1 dekameter = 10 meters = 32.8 feet
 1 hectometer = 10 dekameters = 328.08 feet
 1 kilometer = 10 hectometers = 3,280.8 feet

Weights

1 centigram = 10 milligrams = .15 grain
 1 decigram = 10 centigrams = 1.54 grains
 1 gram = 10 decigram = .035 ounce
 1 dekagram = 10 grams = .35 ounce
 1 hectogram = 10 dekagrams = 3.52 ounces
 1 kilogram = 10 hectograms = 2.2 pounds
 1 quintal = 100 kilograms = 220.46 pounds
 1 metric ton = 10 quintals = 1.1 short tons

Liquid Measure

1 centiliter = 10 milliliters = .34 fl. ounce
 1 deciliter = 10 centiliters = 3.38 fl. ounces
 1 liter = 10 deciliters = 33.81 fl. ounces
 1 dekaliter = 10 liters = 2.64 gallons
 1 hectoliter = 10 dekaliters = 26.42 gallons
 1 kiloliter = 10 hectoliters = 264.18 gallons

Square Measure

1 sq. centimeter = 100 sq. millimeters = .155 sq. inch
 1 sq. decimeter = 100 sq. centimeters = 15.5 sq. inches
 1 sq. meter (centare) = 100 sq. decimeters = 10.76 sq. feet
 1 sq. dekameter (are) = 100 sq. meters = 1,076.4 sq. feet
 1 sq. hectometer (hectare) = 100 sq. dekameters = 2.47 acres
 1 sq. kilometer = 100 sq. hectometers = .386 sq. mile

Cubic Measure

1 cu. centimeter = 1000 cu. millimeters = .06 cu. inch
 1 cu. decimeter = 1000 cu. centimeters = 61.02 cu. inches
 1 cu. meter = 1000 cu. decimeters = 35.31 cu. feet

This fine document...

Was brought to you by me:

[Liberated Manuals -- free army and government manuals](#)

Why do I do it? I am tired of sleazy CD-ROM sellers, who take publicly available information, slap “watermarks” and other junk on it, and sell it. Those masters of search engine manipulation make sure that their sites that sell free information, come up first in search engines. They did not create it... They did not even scan it... Why should they get your money? Why are not letting you give those free manuals to your friends?

I am setting this document FREE. This document was made by the US Government and is NOT protected by Copyright. Feel free to share, republish, sell and so on.

I am not asking you for donations, fees or handouts. If you can, please provide a link to liberatedmanuals.com, so that free manuals come up first in search engines:

<A HREF=<http://www.liberatedmanuals.com/>>Free Military and Government Manuals

- Sincerely
Igor Chudov
