## UNIT, DIRECT SUPPORT, AND GENERAL SUPPORT MAINTENANCE REPAIR PARTS AND SPECIAL TOOLS LIST

### Section I. INTRODUCTION

#### 1. Scope.

This RPSTL lists and authorizes spares and repair parts, special tools, special test, measurement, and diagnostic equipment (TMDE), and other special support equipment required for performance of unit, direct support, and general support maintenance of the centrifugal pump unit. It authorizes the requisitioning, issue, and disposition of spares, repair parts, and special tools as indicated by the source, maintenance, and *recoverability* (SMR) codes.

#### 2. General.

In addition to Section I, Introduction, this Repair Parts and Special Tools List is divided into the following sections.

*a Section II. Repair Parts List.* A list of spares and repair parts authorized by this RPSTL for use in the performance of maintenance. The list also includes parts which must be removed for replacement of the authorized parts. Parts lists are composed of functional groups in ascending alphanumeric sequence, with the parts in each group listed in ascending figure and item number sequence. Bulk materials are listed in item name sequence. Repair parts kits are listed separately in their own functional group within Section II. Repair parts for repairable special tools are also listed in this section. Items listed are shown on the associated illustration(s)/figure(s).

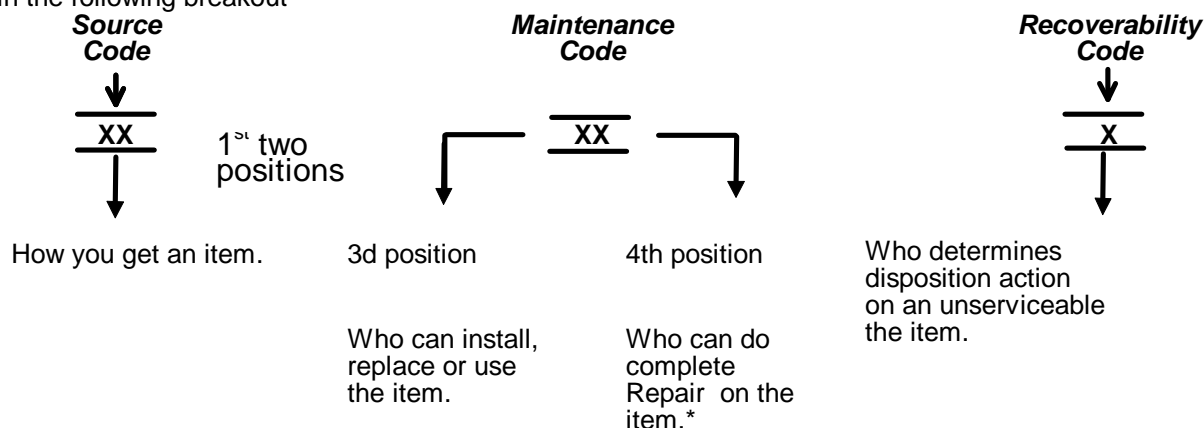

*b Section III. Special Tools List.* A list of special tools, special TMDE, and other special support equipment authorized by this RPSTL (as indicated by Basis of Issue (BOI) information in DESCRIPTION AND USABLE ON CODE column) for the performance of maintenance.

*c Section IV. Cross-reference Index.* A list in National item identification number (NIIN) sequence, of all National stock numbered items appearing in the listing, followed by a list in alphanumeric sequence of all part numbers appearing in the listings. National stock numbers and part numbers are cross-referenced to each illustration figure and item number appearance. The figure and item number Index lists figure and item numbers in alphanumeric sequence and cross-reference NSN, FSCM and part numbers.

#### 3. Explanation of Columns (Sections II and III).

*a. ITEM NO. (Column (1)).* Indicates the numbers used to identify items called out in the *illustration*.

*b. SMR CODE (Column (2)).* The Source, Maintenance, and Recoverability (SMR) code is a 5-position code containing supply/requisitioning information, maintenance category authorization criteria, and disposition instructions, as shown in the following breakout:

\* Complete Repair. Maintenance capacity, capability, and authority to perform all corrective maintenance tasks of the Repair function in a use/user environment in order to restore serviceability to a failed item.

(1) Source Code. The source code tells you how to get an item needed for maintenance, repair, or overhaul of an end item/equipment. Explanations of source codes follows:

Source Code	Explanation
<div style="border: 1px solid black; padding: 5px; display: inline-block;">                     PA                      PB                      PC**                      PD                      PE                      PF                      PG                 </div>	Stocked items; use the applicable NSN to request(requisition items with these source codes. They are authorized to the category indicated by the code entered in the 3rd position of the SMR code.  **NOTE: Items coded PC are subject to deterioration.
<div style="border: 1px solid black; padding: 5px; display: inline-block;">                     KD                      KF                      KB                 </div>	Items with these codes are not to be requested/requisitioned individually. They re part of a kit which is authorized to the maintenance category indicated in the 3rd position of the SMR code. The complete kit must be requisitioned and applied.
<div style="border: 1px solid black; padding: 5px; display: inline-block;">                     MO- (Made at Unit/AVUM Level)                      MF- (Made at DS/AVUM Level)                      MH- (Made at GS Level)                      ML- (Made at Specialized Repair Activity (SRA))                      MD- (Made at Depot)                 </div>	Items with these codes are not to be requested/requisitioned individually. They must be made from bulk material which is identified by the part number in the DESCRIPTION and USABLE ON CODE (UOC) column and listed in the Bulk Material group of the repair parts list in this RPSTL. H the item is authorized to you by the 3rd position code of the SMR code, but the source code indicates it is made at a higher level, order the item from the higher level of maintenance.
<div style="border: 1px solid black; padding: 5px; display: inline-block;">                     AO- (Assembled by Unit/AVUM Level)                      AF- (Assembled by DS/AVIM Level)                      AH- (Assembled by GS Category)                      AL- (Assembled by SRA)                      AD- (Assembled by Depot)                 </div>	Items with these codes are not to be requested/ requisitioned individually. The puts that make up the assembled item must be requisitioned or fabricated and assembled at the level of maintenance indicated by the source code. H the 3rd position code of the SMR code authorizes you to replace the item, but the source code indicates the items are assembled at a higher level, order the item from the higher level of maintenance.
XA- Do not requisition "XA"-coded item. Order its next higher assembly. (Also, Refer to the NOTE below.) XB- If an UXB" item is not available from salvage, order it using the CAGEC and part number given. XC- Installation drawing, diagram, instruction sheet, field service drawing, that is identified manufacturer's part number. XD- Item is not stocked. Order an XD"-coded item through normal supply channels using the CAGEC and part number given, if no NSN is available.	

NOTE Cannibalization or controlled exchange, when authorized, may be used as a source of supply for items with the above source codes, except for those source coded "XA" or those aircraft support items restricted by requirements of AR 700-42

(2) *Maintenance Code.* Maintenance codes tell you the level(s) of maintenance authorized to USE and REPAIR support items The maintenance codes are entered in the third and fourth positions of the SMR code as follows:

(a) The maintenance code entered in the third position tells you the lowest maintenance level authorized to remove, replace, and use an item The maintenance code entered in the third position will indicate authorization to one of the following levels of maintenance

<i>Code</i>	<i>Application/Explanation</i>
C -	Crew or operator maintenance done within organizational or aviation unit maintenance
O -	Organizational or aviation unit category can remove, replace, and use the item
F -	Direct support level or aviation intermediate level can remove, replace, and use the item
H -	General support level can remove, replace, and use the item
L -	Specialized repair activity can remove, and use the item.
D -	Depot level can remove, replace, and use the item

(b) The maintenance code entered In the fourth position tells whether or not the item is to be repaired and identifies the lowest maintenance level with the capability to do complete repair (i e , perform all authorized repair functions) (NOTE Some limited repair *may* be done on the item at a lower level of maintenance, if authorized by the Maintenance Allocation Chart (MAC) and SMR codes ) This position will contain one of the following maintenance codes

<i>Code</i>	<i>Application/Explanation</i>
O -	Organizational or (aviation unit) is the lowest level that can do complete repair of the item
F -	Direct support or aviation Intermediate is the lowest level that can do complete repair of the item
H -	General support is the lowest level that can do complete repair of the item
L -	Specialized repair activity (designate the specialized repair activity) is the lowest level that can do complete repair of the Item
D -	Depot is the lowest level that can do complete repair of the item
Z -	Nonreparable. No repair is authorized
B -	No repair is authorized (No parts or special tools are authorized for the maintenance of a "B" coded item ) However, the item may be reconditioned by adjusting, lubricating, etc , at the user level

(3) *Recoverability Code.* Recoverability codes are assigned to items to indicate the disposition action on unserviceable items The recoverability code Is entered in the fifth position of the SMR code as follows

<i>Recoverability Codes</i>	<i>Application/Explanation</i>
Z -	Nonreparable item When unserviceable, condemn and dispose of the item at the level of maintenance shown in 3rd position of SMR code
O -	Reparable item When uneconomically repairable, condemn and dispose of the item at organizational or aviation unit level
F -	Reparable item When uneconomically repairable, condemn and dispose of the item at the direct support or aviation Intermediate level

*Recoverability**Application/Explanation**Codes*

- H - Repairable item When uneconomically repairable, condemn and dispose of the Item at general support level
- D - Repairable item When beyond lower level repair capability, return to depot Condemnation and disposal of item not authorized below depot level
- L - Repairable item Condemnation and disposal not authorized below specialized repair activity (SRA)
- A - Item requires special handling or condemnation procedures because of specific reasons (e g , precious metal content, high dollar value, critical material, or hazardous material) Refer to appropriate manuals/directives for specific instructions

c. *FSCM (Column (3))* The Federal Supply Code for Manufacturer (FSCM) is a 5-digit numeric code which is used to identify the manufacturer, distributor, or Government agency, etc , that supplies the Item

d. *PART NUMBER (Column (4))*. Indicates the primary number used by the manufacturer (Individual, company, firm, corporation, or government activity), that controls the design and characteristics of the item by means of its engineering drawings, specifications, standards, and inspection requirements to identify an Item or range of items

NOTE: When you use a NSN to requisition an Item, the item received may have a different part number from the part ordered

- e. *DESCRIPTION AND USABLE ON CODE (UOC) (Column (5))* This column Includes the following information:
- (1) The Federal item name and, when required, a minimum description to identify the item
  - (2) The physical security classification of the Item is Indicated by the parenthetical entry (Insert applicable physical security classification abbreviation, e g , Phy Sec CI (C) -Confidential, Phy Sec CI (S) -Secret, Phy Sec CI (T) -Top Secret)
  - (3) Items that are included in kits and sets are listed below the name of the kit or set
  - (4) Spare/repair parts that make up an assembled item are listed immediately following the assembled Item line entry.
  - (5) Part numbers for bulk materials are referenced In this column In the line entry for the Item to be manufactured/fabricated
  - (6) When the item Is not used with all serial numbers of the same model, the effective serial numbers are shown on the last line(s) of the description (before UOC)
  - (7) The usable on code, when applicable (see paragraph 5, Special Information)
  - (8) In the Special Tools List section, the basis of Issue (BOI) appears as the last line(s) in the entry for each special tool, special TMDE, and other special support equipment When density of equipments supported exceeds density spread indicated In the basis of Issue, the total authorization Is increased proportionately
  - (9) The statement "END OF FIGURE" appears just below the last item description in Column 5 for a given figure in both Section II and Section III.

f. *QTY (Column (6))*. The QTY (quantity per figure column) indicates the quantity of the Item used In the breakout shown on the illustration figure, which is prepared for a functional group, subfunctional group, or an assembly A "V" appearing In this column in lieu of a quantity indicates that the quantity Is variable and the quantity may vary from application to application

#### 4. Explanation of Columns (Section IV).

##### a. NATIONAL STOCKNUMBER (NSN) INDEX.

(1) *STOCKNUMBER column* This column lists the NSN by National item Identification number (NIIN) NSN sequence. The NIIN consists of the last nine digits of the NSN (i.e., 5305-01-674-1467). When using this column NIIN to locate an item, ignore the first 4 digits of the NSN. However, the complete NSN should be used when ordering items by stock number.

(2) *FIG. column*. This column lists the number of the figure where the item is identified/located. The figures are in numerical order in Section 11 and Section III.

(3) *ITEM column*. The item number identifies the stem associated with the figure listed in the adjacent FIG column. This item is also identified by the NSN listed on the same line.

b. *PARTNUMBER INDEX* Part numbers in this index are listed by part number in ascending alphanumeric sequence (i.e., vertical arrangement of letter and number combination which places the first letter or digit of each group in order A through Z, followed by the numbers 0 through 9 and each following letter or digit in like order).

(1) *FSCM column*. The Federal Supply Code for Manufacturer (FSCM) is a 5-digit numeric code used to identify the manufacturer, distributor, or Government agency, etc., that supplies the item.

(2) *PART NUMBER column*. Indicates the primary number used by the manufacturer (individual, firm, corporation, or Government activity), which controls the design and characteristics of the item by means of its engineering drawings, specifications standards, and inspection requirements to identify an item or range of items.

(3) *STOCKNUMBER column* This column lists the NSN for the associated part number and manufacturer identified in the PART NUMBER and FSCM columns to the left.

(4) *FIG column*. This column lists the number of the figure where the item is identified/located in Section II and III.

(5) *ITEM column*. The item number is that number assigned to the item as it appears in the figure referenced in the adjacent figure number column.

##### c. FIGURE AND ITEM NUMBER INDEX.

(1) *FIG. column*. This column lists the number of the figure where the item is identified/located in Section II and III.

(2) *ITEM column*. The item number is that number assigned to the item as it appears in the figure referenced in the adjacent figure number column.

(3) *STOCK NUMBER column*. This column lists the NSN for the item.

(4) *FSCM column*. The Federal Supply Code for Manufacturer (FSCM) is a 5-digit numeric code used to identify the manufacturer, distributor, or Government agency, etc., that supplies the item.

(5) *PARTNUMBER column*. Indicates the primary number used by the manufacturer (individual, firm, corporation, or Government activity), which controls the design and characteristics of the item by means of its engineering drawings, specifications standards, and inspection requirements to identify an item or range of items.

#### 5. Special Information.

a. *USABLE ON CODE*. The usable on code appears in the lower left corner of the Description column heading. Usable on codes are shown as "UOC . . ." in the Description Column (justified left) on the first line applicable item description/nomenclature. Uncoded items are applicable to all models.

b. *FABRICATION INSTRUCTIONS* Bulk materials required to manufacture items are listed in the Bulk Material Functional Group of this RPSTL. Part numbers for bulk materials are also referenced in the description column of the line item entry for the item to be manufactured/fabricated. Detailed fabrication instructions for items source codes to be manufactured or fabricated are found in TM 10-4320-325-14.

c. *ASSEMBLY INSTRUCTION* Detailed assembly instructions for items source coded to be assembled from component spare/repair parts are found in TM 10-4320-325-14. Items that make up the assembly are listed immediately following the assembly item entry or reference is made to an applicable figure.

d. *KITS* Line item entries for repair parts kits appear in a group in Section II (see table of contents).

e. *INDEX NUMBERS* Items which have the word BULK in the figure column will have an index number shown in the item number column. This index number is a cross-reference between the National Stock Number/Part Number Index and the bulk material list in Section II.

f. *ASSOCIATED PUBLICATIONS*. The publication(s) listed below pertain to the centrifugal pump unit and its components.

<i>Publication</i>	<i>Short Title</i>
LO 10-4320-325-12	Pump Unit, Centrifugal
TO 10-4320-325-14	Pump Unit, Centrifugal

g. *ILLUSTRATIONS-LISTING*. The illustrations in this RPSTL are identical to those published in TM 10-4320-325-14. Only those parts codes "C" or "O" in the third position of the SMR Code are listed in the tabular listing, therefore, there may be a break in the item number sequence. Only illustrations containing organizational or aviation unit authorized items appear in this RPSTL.

## 6. How to Locate Repair Parts.

a. *When National Stock Number or Part Number Is Not Known.*

(1) *First*. Using the table of contents, determine the assembly group or subassembly group to which the item belongs. This is necessary since figures are prepared for assembly groups and subassembly groups, and listings are divided into the same groups.

(2) *Second*. Find the figure covering the assembly group or subassembly group to which the item belongs.

(3) *Third*. Identify the item on the figure and use the Figure and Item Number Index to find the NSN.

b. *When National Stock Number or Part Number Is Known*

(1) *First*. Using the National Stock Number or the Part Number Index, find the pertinent National Stock Number or Part Number. The NSN index is in National Item Identification Number (NIIN) sequence (see 4 1(1)). The part numbers in the Part Number Index are listed in ascending alphanumeric sequence (see 4 b). Both indexes cross-reference you to the illustration/figure and item number of the item you are looking for.

(2) *Second*. Turn to the figure and item number, verify that the item is the one you are looking for, then locate the item number in the repair parts list for the figure.

7. **Abbreviations.** All abbreviations are in accordance with MIL-STD-12

Figure 1. Centrifugal Pump Unit, DED Model PAD 125B (Sheet 1 of 2).

## The Metric System and Equivalents

### *Linear Measure*

1 centimeter = 10 millimeters = .39 inch  
 1 decimeter = 10 centimeters = 3.94 inches  
 1 meter = 10 decimeters = 39.37 inches  
 1 dekameter = 10 meters = 32.8 feet  
 1 hectometer = 10 dekameters = 328.08 feet  
 1 kilometer = 10 hectometers = 3, 280.8 feet

### *Weights*

1 centigram = 10 milligrams = .15 grain  
 1 decigram = 10 centigrams = 1.54 grains  
 1 gram = 10 decigram = .035 ounce  
 1 dekagram = 10 grams = .35 ounce  
 acres  
 1 hectogram = 10 dekagrams = 3.52 ounces  
 1 kilogram = 10 hectograms = 2.2 pounds  
 1 quintal = 100 kilograms = 220.46 pounds  
 1 metric ton = 10 quintals = 1.1 short tons

### *Liquid Measure*

1 centiliter = 10 milliliters = .34 fl. ounce  
 1 deciliter = 10 centiliters = 3.38 fl. ounces  
 1 liter = 10 deciliters = 33.81 fl. ounces  
 1 dekaliter = 10 liters = 2.64 gallons  
 1 hectoliter = 10 dekaliters = 26.42 gallons  
 1 kiloliter = 10 hectoliters = 264.18 gallons

### *Square Measure*

1 sq. centimeter = 100 sq. millimeters = .155 sq. inch  
 1 sq. decimeter = 100 sq. centimeters = 15.5 sq. inches  
 1 sq. meter (centare) = 100 sq. decimeters = 10.76 sq. feet  
 1 sq. dekameter (are) = 100 sq. meters = 1, 076.4 sq. feet  
 1 sq. hectometer (hectare) = 100 sq. dekameters = 2.47  
 1 sq. kilometer = 100 sq. hectometers = .386 sq. mile

### *Cubic Measure*

1 cu. centimeter = 1000 cu. millimeters = .06 cu. inch  
 1 cu. decimeter = 1000 cu. centimeters = 61.02 cu. inches  
 1 cu. meter = 1000 cu. decimeters = 35.31 cu. feet

## Approximate Conversion Factors

<i>To change</i>	<i>To</i>	<i>Multiply by</i>	<i>To change</i>	<i>To</i>	<i>Multiply by</i>
inches	centimeters	2.540	ounce-inches	newton-meters	.007062
feet	meters	.305	centimeters	inches	.394
yards	meters	.914	meters	feet	3.280

This fine document...

Was brought to you by me:

## [Liberated Manuals -- free army and government manuals](#)

Why do I do it? I am tired of sleazy CD-ROM sellers, who take publicly available information, slap “watermarks” and other junk on it, and sell it. Those masters of search engine manipulation make sure that their sites that sell free information, come up first in search engines. They did not create it... They did not even scan it... Why should they get your money? Why are not letting you give those free manuals to your friends?

I am setting this document FREE. This document was made by the US Government and is NOT protected by Copyright. Feel free to share, republish, sell and so on.

I am not asking you for donations, fees or handouts. If you can, please provide a link to [liberatedmanuals.com](http://liberatedmanuals.com), so that free manuals come up first in search engines:

<A HREF=<http://www.liberatedmanuals.com/>>Free Military and Government Manuals</A>
