Section VI.	NATIONAL STOCK NUMBER AND MANUFACTURER'S PART NUMBER INDEX..... 57	

**SECTION I  
INTRODUCTION**

**1. Scope**

a. This manual lists repair parts required, for the performance of organizational, direct support, general support, and depot maintenance of the Bath Unit.

b. Repair parts listed represent those authorized for use at indicated maintenance levels and will be requisitioned (on an "as required" basis until stockage is justified by demand in accordance with AR 735-35 or AR 710-2).

**2. General**

This Repair Parts and Special Tools List is divided into the following sections:

a. *Repair Parts - Section II.* A list, in figure and item number sequence, of repair parts authorized at the organizational level for the performance of maintenance, including those items which must be removed for replacement of the authorized item. Items, except kits and sets, are listed by assembly group in top down breakdown sequence. Repair parts kits and sets are listed separately as Group 4 at the end of this Section without regard to the assembly group to which they belong.

b. *Special Tools, Test and Support Equipment - Section III.* (Not Applicable).

c. *Repair Parts - Section IV.* A list, in figure and item number sequence, of the repair parts authorized for the performance of maintenance at the direct support, general support, and depot levels, including those items which must be removed for replacement of the authorized, item. Items, except kits and sets, are listed by assembly group in top down breakdown sequence. Repair parts kits and sets are listed separately as Group 4 at the end of this section without regard to the assembly group to which they belong.

d. *Special Tools, Test and Support Equipment Section V.* (Not applicable.)

e. *National Stock Number and Reference Number Index - Section VI.* A list of National Stock Numbers in ascending numerical sequence, followed by a list of reference numbers appearing in all listings, in ascending alpha-numeric sequence, cross-referenced to the illustration figure and item number.

**3. Explanation of Columns**

The following provides an explanation of columns in the tabular lists in Sections II through V.

a. *Source, Maintenance, and Recoverability Codes (SMR).*

(1) Source code indicates the source for the listed items. Source Codes are:

<i>Code</i>	<i>Explanation</i>
P	Repair Parts supplied from the GSA/DSA, or Army supply system, and authorized for use at indicated maintenance levels.
P2	Repair Parts which are procured and stocked or insurance purposes because the combat or military essentiality of the end item dictates that a minimum quantity be available in the supply system.
M	Repair Parts which are not procured or stocked, as such, in the supply system but are to be manufactured at indicated maintenance levels.
A	Assemblies which are not procured or stocked as such, but are made up of two or more units. Such component units carry individual stock numbers and descriptions, are procured and stocked separately and can be assembled to form the required assembly at indicated maintenance levels.
X	Parts and assemblies that are not procured or stocked because the failure rate is normally below that of the applicable end item or component. The failure of such part or assembly should result in retirement of the end item from the supply system.
X1	Repair Parts which are not procured or stocked. The requirement for such items will be filled by the next higher assembly or component.
X2	Repair Parts which are not stocked and have no foreseen mortality. The indicated maintenance category requiring such repair parts will attempt to obtain the parts through cannibalization or salvage, if not obtainable through cannibalization

**NOTE**

**Items not illustrated are cross-referenced to assembly group number.**

<i>Code</i>	<i>Explanation</i>
	or salvage, the item may be requisitioned with exception data, from the end item manager, for immediate use.
G	Major assemblies that are procured with PEMA funds for initial issue only as exchange assemblies at DSU and GSU level. These assemblies will not be stocked above the DS and GS level or returned to depot supply level.

**NOTE**

**Cannibalization or salvage may be used as a source of supply for any items source coded above except those coded X1 and aircraft support items as restricted by AR 700-42.**

(2) Maintenance code indicates the lowest category of maintenance authorized to install the listed item. Repair parts assigned Maintenance Code "C" may be stocked at the operator level of maintenance when authorized by the Unit Commander. The maintenance level codes are:

<i>Code</i>	<i>Explanation</i>
C	Crew or operator maintenance
O	Organizational maintenance
F	Direct support maintenance
H	General support maintenance
D	Depot maintenance

(3) Recoverability code indicates whether unserviceable items should be returned for recovery or salvage. Items not coded are expendable. Recoverability codes are:

<i>Code</i>	<i>Explanation</i>
R	Applied to repair parts (assemblies and components), which are considered economically reparable at direct and general support maintenance levels. When the item is no longer economically reparable, it is normally disposed of at the GS level. When supply considerations dictate, some of these repair parts may be listed for automatic return to supply for depot level repair as set forth in AR 710-50. When so listed, they will be replaced by supply on an exchange basis.
S	Repair Parts and assemblies which are economically reparable at DSU and GSU activities and which normally are furnished by supply on an exchange basis. When items are determined by a GSU to be uneconomically reparable, they will be

	evacuated to a depot for evaluation and analysis before final disposition.
T	Higher dollar value recoverable repair parts which are subject to special handling and are issued on an exchange basis. Such items will be evacuated to the depot for overhaul or final disposition. Communications-Electronics and missile support items will be repaired/overhauled only at depots.

<i>Code</i>	<i>Explanation</i>
U	Repair Parts, Special Tools and Test Equipment specifically selected for salvage by reclamation units because of precious metal content, critical materials, high dollar value or reusable casings or castings.

*b. National Stock Number.* Indicates the National Stock Number assigned to the item and will be used for requisitioning purposes.

*c. Description.* Indicates the Federal item name and any additional description of the item required. Assembly Components and subassemblies are indented under major assemblies. A part number or other reference number is followed by the applicable five-digit Federal supply code for manufacturers in parenthesis. Repair parts quantities included in kits and sets are shown in front of the repair part name. Material required for manufacture or fabrication is identified.

*d. Unit of Measure (U/M).* A two-character alphabetic abbreviation indicating the amount or quantity of the item, as used, upon which the allowances are based, e.g., ft., ea., pr., etc.

*e. Quantity Incorporated in Unit.* Indicates the quantity of the item used in the assembly group. A "V" appearing in this column in lieu of a quantity indicates that a definite quantity cannot be indicated (e.g., shims, spacers, etc.).

*f. Fifteen Organizational Maintenance Allowance.*

(1) Items authorized for use as required but not for initial stockage are identified with an asterisk in the allowance column.

(2) The allowance columns are divided into four subcolumns. Indicated in each subcolumn is the total quantity of special tools authorized for the number of equipments supported (Not applicable).

*g. Thirty-Day DS/GS Maintenance Allowances.*

(1) Items authorized for use as required but not for initial stockage are identified with an asterisk in the allowance column.

(2) The allowance columns are divided into three subcolumns. The quantitative allowance of special tools for DS/GS levels of maintenance will represent initial stockage for a 30-Day period for the number of equipments supported. (Not applicable.)

*h. Items Authorized.*

(1) Items authorized for use as required but not for initial stockage are identified with an asterisk in the allowance column.

(2) This column indicates the total quantity of special tools required for distribution and contingency planning purposes. (Not applicable.)

*i. Depot Maintenance Allowance Per 100 Equipments.*

(1) Items authorized for use but not for initial stockage are identified with an asterisk in the allowance column.

(2) This column indicates the total quantity of special tools authorized for depot maintenance of 100 equipments. (Not applicable.)

*j. Illustration.* This column is divided as follows:

(1) *Figure number* Indicates the figure number of the illustration on which the item is shown.

(2) *Item number* Indicates the callout number used to reference the item on the illustration.

**4. Special Information**

a. Identification of the usable on codes included in the description column of this publication are:

<i>Code</i>	<i>Used on</i>
A	Orr & Sembower Model 8-SH-1, Army Model SPE-35, FSN 4510-679-6493
B	York-Shipley Model 8-SH-60, Army Model SPE-35A, FSN 4510-806-9555
C	York-Shipley Model 8-SH-62, Army Model SPE-41, FSN 4510-856-8610
D	York-Shipley Model 8-SH-63, Army Model SPE-44, FSN 4510-994-9955
E	York-Shipley Model YS49279, FSN 4510-168-1930
F	York-Shipley Model 8-SH-70YS, Army Model SPE-45, FSN 4510-418-4774

b. Parts which require manufacture or assembly of a level higher than that authorized for installation will indicate in the source column the higher level.

c. The following publication pertains to bath unit and its components:

TM 10-4510-201-14	Operators, Organizational, DS and GS maintenance manual
-------------------	--

d. The same illustrations are used to illustrate the repair parts listed in both organizational maintenance section and direct and general support and depot maintenance section.

**5. How to Locate Repair Parts**

a. When the National Stock Number or reference number is unknown:

(1) *First.* Using the table of contents, determine the assembly group within which the repair part belongs. This is necessary since illustrations are prepared for assembly groups, and listings are divided into the same groups.

(2) *Second.* Find the illustration covering the assembly group to which the repair part belongs.

(3) *Third.* Identify the repair part on the illustration and note the illustration figure and item number of the repair part.

(4) *Fourth.* Using the Repair Parts Listing, find the assembly group to which the repair part belongs and locate the illustration figure and item number noted on the illustration.

b. When the National Stock Number or reference number is known:

(1) *First.* Using the Index of National Stock Numbers and Reference Numbers find the pertinent National Stock Number or reference number. This index is in ascending FSN sequence followed by a list of reference numbers in alpha-numeric sequence, cross-referenced to the illustration figure number and item number.

(2) *Second.* Using the Repair Parts Listing, find the assembly group of the repair part and the illustration figure number and item number referenced in the Index of National Stock Numbers and Reference Numbers.

c. When the National Stock Number or reference number is known and the repair part is not illustrated:

(1) *First.* Using the Index of National Stock Numbers and Reference Numbers find the pertinent National Stock Number or reference number in the section titled "Items Not Illustrated" and note the group number. This section is in ascending FSN sequence followed by a list of reference numbers in alpha-numeric sequence cross-referenced to assembly group number.

(2) *Second.* Using the Table of Contents, locate the assembly group number and page number.

(3) *Third.* Using the applicable group

number and page number, locate the pertinent stock number or reference number in the Repair Parts Listing. These items are listed at the end of the assembly or group to which they belong.

**6. Federal Supply Codes for Manufacturers**

<i>Code</i>	<i>Manufacturer</i>
03510.....	General Electric Co.
15472.....	AMF Inc.
18163.....	Dole Valve Co.
24617.....	General Motors Corp.
25567.....	Gorman-Rupp Co., The
26901.....	Hollett Mfg Co.
38455.....	Itt Marlow
58417.....	Sunstrand Corp.
59730.....	Thomas and Betts Co., The
61349.....	Ametek/U. S. Gauge
72962.....	Elastic Stop Nut, Div. of Amerace Esna Corp.
74545.....	Hubbell Harvey Inc.
75138.....	Jefferson Electric Co.

<i>Code</i>	<i>Manufacturer</i>
79466.....	York Shipley Inc.
79470.....	Weatherhead Co., The
81337.....	Army Natick Laboratories
81718.....	Dover Corp.
82247.....	Spraying Systems Co. Inc.
87343.....	Speedometer Service Co.
88044.....	Aeronautical Standards Group
88422.....	General Electric Co.
94580.....	Honeywell Inc.
96906.....	Military Standards

**7. Reporting of Equipment Publication Improvements**

The reporting of errors, omissions, and recommendations for improving this publication by the individual user is encouraged. Reports should be submitted on DA Form 2028 (Recommended Changes to Publications) and forwarded direct to Commander US Army Troop Support Command Attn AMSTS-MPP St. Louis, MO 63120.

By Order of the Secretary of the Army:

Official:

W. C. WESTMORELAND,  
*General, United States Army,*  
*Chief of Staff*

VERNE L. BOWERS,  
*Major General, United States Army,*  
*The Adjutant General*

DISTRIBUTION:

To be distributed in accordance with DA Form 12-25A (qty rqr Block #170), Organizational maintenance requirements for Shower and Bath.

This fine document...

Was brought to you by me:

## [Liberated Manuals -- free army and government manuals](#)

Why do I do it? I am tired of sleazy CD-ROM sellers, who take publicly available information, slap “watermarks” and other junk on it, and sell it. Those masters of search engine manipulation make sure that their sites that sell free information, come up first in search engines. They did not create it... They did not even scan it... Why should they get your money? Why are not letting you give those free manuals to your friends?

I am setting this document FREE. This document was made by the US Government and is NOT protected by Copyright. Feel free to share, republish, sell and so on.

I am not asking you for donations, fees or handouts. If you can, please provide a link to [liberatedmanuals.com](http://liberatedmanuals.com), so that free manuals come up first in search engines:
