TM 11-5895-1079-24P  
Change 1  
PCN 124 081040 01

DEPARTMENT OF THE NAVY  
Headquarters, U.S. Marine Corps  
Washington, D.C. 20380-0001

19 January 1989

1. Purpose. To direct pen changes to the basic Manual, SL-4-08104A, dated December 1981, Facsimile Set, Tactical, AN/GXC-7A, NSN 5815-01-067-4655.

2. Action. Make the following pen changes:

PART I

<u>PAGE</u>	<u>ITEM NO.</u>	<u>ACTION</u>
1	6	In column (9) revise to read "PAOZZ".
	7	In column (9) revise to read "PAOZZ".
	8	In column (9) revise to read "PAOZZ".
82	715	In the following columns, (3) add "5962-01-035-7479"; (6) revise to read "MICROCIRCUIT, DIGITAL, TTL, DUAL GATE, 14 TERM"; 8(B) change to read "5"; (9) revise to read "PADZZ".
99	932	In the following columns, (3) add "5962-01-035-7479"; (6) add "S/A RPL LINE 000715"; 8(B) delete "2"; (9) revise to read "PADZZ".

PART II

<u>PAGE</u>	<u>ITEM NO.</u>	<u>ACTION</u>
108	715	Delete entire entry.
	932	Delete entire entry.

PART III

<u>PAGE</u>	<u>ACTION</u>		
114	Add the following in proper numeric sequence:		
<u>STOCK NO.</u>	<u>ITEM NO.</u>	<u>MFG CODE</u>	<u>PART NO.</u>
"5962-01-035-7479	715	81349	M38510/30401BCB
5360-01-0353-7479	932	81349	M38510/30401BCB"

PART IV

<u>PAGE</u>	<u>ACTION</u>		
116	Add the following in proper alpha-numeric sequence:		
<u>PART NO.</u>	<u>MFG CODE</u>	<u>ITEM NO.</u>	<u>STOCK NO.</u>
"M38510/30401BCB	81349	715	5962-01-035-7479
M38510-30401BCB	81349	932	5962-01-035-7479"

  

<u>PAGE</u>	<u>ACTION</u>		
119	For PART NO "SNC4LS51J", delete entire entry.		
	For PART NO "SNC54LS51J", delete entire entry.		

3. Filing Instructions. This Change transmittal page will be filed immediately following the signature page of the basic Manual.

BY DIRECTION OF THE COMMANDANT OF THE MARINE CORPS

OFFICIAL

FRED J. HOWARD  
Director, Technical Support Division  
Marine Corps Logistics Base  
Albany, Georgia 31704-5000

## PREFACE

### PUBLICATION CUT-OFF DATE

- Information in this Repair Parts List (RPL) is the latest available for this equipment as of 18 December 1981

### SCOPE OF CONTENTS

2. RPL 08104A serves as a list of all parts required to maintain and support this equipment. This publication furnishes complete data, including items used in conjunction with and furnished as part of, or with, the equipment, to enable the user to perform required maintenance and supply support of the equipment described herein. It is comprised of the Preface and the following parts: Part I, Item Identification Listing; Part II, Item Number Cross-Reference; Part III, National Stock Number Cross-Reference and Part IV, Part Number Cross-Reference.

3. This preface furnishes explanations and application of the information contained in the succeeding parts of this RPL; defines Source Maintenance Recoverability (SMR) codes, (page ix); and lists applicable Federal supply codes for manufacturer's identification (page xii).

### PART I - ITEM IDENTIFICATION LISTING

4. This listing comprises the main part of the RPL. It is arranged in columns which show stock numbers, item identification, replacement factors, and other data necessary to maintain this equipment in an operative condition. Illustrations are placed either before, or in close proximity to, the component or assembly. The items are arranged in topdown breakdown sequence within the major combination.

Repair Parts. This listing presents all repair parts contained in the equipment and is numbered in sequence by component. Repair parts need not be identical with parts of the original equipment, but as replacement parts they are considered suitable or preferred.

5. Item Numbers (Column 1). This column specifies item numbers assigned in numerical sequence and in the order that each item appears in the RPL. The item numbers are provided for reference purposes. In emergencies, these item numbers may be used for RPL number and date on requisitions which combat units transmit by message.

6. Model (Column 2). This column indicates by an alphabetical code the specific application of repair parts, components, or assemblies when more than one model of an assembly, component, or equipment is contained in this publication. The absence of the code indicates that only one version of the item (assembly, component, or equipment) is covered by this RPL.

7. Stock Number (Column 3). This column furnishes National Stock Numbers (NSN) assigned to those centrally managed items required for the support of the equipment. When they have been assigned, NSN's will be used in all supply operations, from original purchase to final disposal of the item. Absence of an NSN indicates the item is not normally stocked as a repair part, as indicated by the source code portion of the SMR codes. If an item without an NSN is required, it should be determined if the item can be obtained from assembly, manufacturer or salvage by referring to the source code. Items not stock numbered, that cannot be obtained from these sources, may be requisitioned using the manufacturer's code and part number referencing the RPL number, date of the RPL and the line item number which applies.

8. Reference Designator (Column 4). This column contains alphabetical and/or numerical designators for referencing an individual repair part to an illustration. The absence of a reference designator indicates there is no illustration for the part. The circuit symbols in this publication were obtained from Magnavox Provisioning List and Illustrations.

9. Indenture Code (Column 5). This column contains the Indenture Code Letter which indicates the relationship of a line item to the end item or to the preceding component, assembly, or subassembly. Visual indentation of the line item is not shown; however, the Indenture Code Letter will enable the user of the RPL to interpret the relationship of the line item with its next higher assembly.

a. Normally, the Indenture Code Letters indicate the following relationship:

<u>Code</u>	<u>Relationship</u>
"A"	End item
"B"	Component; attaching parts for component or detail parts of the end item not contained in a component
"C"	Assembly; attaching parts for assembly or detail parts of component not contained in a component
"D"	Subassembly; attaching parts for subassembly or detail parts of assembly not contained in subassembly
"E"	Detail parts of subassembly
"F"	And so forth

10. Item Identification (Column 6). This column contains the item name and description of the repair part. When an item is duplicated in the major combination, the abbreviation (S/A) is inserted after the noun name to indicate "same as". S/A items refer to the line item number of the item's first appearance in the major combination. When an item is fabricated from other items, the abbreviation FAB FR, followed by the item required for the fabrication, is inserted after the item identification. When an item is assembled from other items, the abbreviation ASSEM FR is used, followed by each item required for the assembly of the item. When the items comprise a kit or set, a complete list of the components will be given in alphabetical order immediately following the item, under the heading "Consist of", abbreviated (C/O).

11. Unit of Measure (Column 7). This column indicates the measure of quantity specified in column 8 and is not to be used for requisitioning purposes. When requisitioning parts, the Unit of Issue, Stores Account Code, and Unit Price should be obtained from the "Federal Supply Catalog, Management Data List (C-ML-MC)."

12. Quantity (Column 8). This column is divided into sub-columns (A) and (B) and indicates the following:

(A) The quantity of a maintenance or a non-maintenance part used in a specific application within the end item.

(B) The consolidated quantity of a maintenance part used in an end item upon the item's first appearance in this list.

13. Source Maintenance Recoverability Code (Column 9). This column contains a series of alphabetic letters which denotes the uniform source, maintenance and recoverability coding structure. This code is assigned to items subordinate to or associated with an end item, i.e., spares, repair parts and support equipment. The uniform code format is composed of three parts consisting of a two (2) position Source Code, a two (2) position Maintenance Code and a one (1) position Recoverability Code.

a. The code provides the user with information on each item relative to (1) the method of obtaining the item; for example, by requisition, fabrication or salvage; (2) the lowest maintenance echelon authorized to remove, replace and use the item and the lowest echelon capable to perform complete repair; and (3) disposition action on unserviceable items.

b. Definitions of SMR codes are listed on page ix of the preface. Examples of SMR codes are:

<u>(1) Source</u>	<u>(2) Maintenance</u>		<u>(3) Recoverability</u>
	<u>Use</u>	<u>Repair</u>	
PA	F	F	A
PB	F	H	H
PC	O	Z	Z
AF	F	Z	Z
MF	F	F	F
KF	H	Z	Z
XA	F	Z	Z
XB	O	F	F
XC	H	Z	Z

14. Special Stockage Indication Code (Column 10). This column reflects the condition under which certain maintenance parts, (parts assigned NSN's and coded in the "P" series source code of the SMR code), are stocked. The codes are explained as follows:

No code --	Indicates that the part may or may not be authorized in initial allowances to using or supporting organizations. The manner of determining initial issue allowances is explained in paragraph 15 below.
D --	Applied to maintenance parts that are not considered critical or essential to be on hand and are, therefore, not authorized in initial allowances; however, these items are stocked within the Supply System and may be requisitioned based upon usage.
T --	Indicates that the part is authorized in garrison operating allowances in order to comply with state and local laws; however, the part is not authorized in Mount-Out since it is not combat essential.

15. Replacement Factor (Column 11). This column reflects the replacement factor assigned to each maintenance repair part with an NSN. This factor is assigned to the repair part on its first appearance in the publication. The replacement factor, expressed as a decimal, indicates the average rate at which the type of item so coded has been used by Marine Corps field units or the rate at which design engineers anticipate the item will fail, wear out, or otherwise require replacement. All computations are based on a replacement period of one year. Therefore, a replacement factor of 0.08, applied to an item in this stocklist, indicates that eight out of every one hundred of such items used in the end item of equipment to which this publication pertains, is predicted to need replacement in one year. Likewise, 0.004 reflects that four out of every thousand in use are predicted to require replacement in one year, while 2.0 shows that every one in use is predicted to be replaced twice during each year.

a. Initial authorized stockage levels of consumable and salvageable items for an organization are to be computed for predicted consumption based on the number of items employed and/or supported by an organization within the number of days for which stockage is authorized. In computing Garrison Operating Stock or Mount-Out, authorized levels can be determined by the requiring Marine Corps unit by multiplying the replacement factor (column 11) times the quantity used per equipment (column 8) times the number of end items employed by the using organization or supported by the service organization times the authorized day level expressed in months and divided by 12. Specific formulae and examples are provided in Marine Corps Order, MCO P4400.79.

(1) The replacement factors used in initial stockage computations, as listed in column 11, should be revised, if warranted, after significant usage is experienced in accordance with guidelines of MCO 4400.32A. The following formulae should be used for revising the replacement factors based on actual usage where the symbol "W" represents the revised replacement factor, "X" represents actual usage experience (1 year), "A" represents the application per equipment, and "B" represents the number of equipments supported.

$$W = \frac{X}{A - X/B}$$

b. Initial allowances for maintenance float items (recoverability codes "F", "H" and "D") for the FMF and appropriate post and stations are as furnished by Initial Issue Actions.

(1) Changes to maintenance replacement rates resulting from actual usage may require recomputation of maintenance float allowances by holding units. Any required recomputation of maintenance float allowances will be made in accordance with MCO 4400.82.

c. The replacement factor for same as (S/A) items is indicated upon the first appearance of the item in the major combination, component, or assembly.

## PART II - ITEM NUMBER CROSS-REFERENCE

16. Part II consists of a cross-reference from RPL item numbers to part numbers and manufacturers' code numbers. Part II is arranged in numerical sequence by RPL item number and contains only those items listed in Part I which do not have an NSN.

## PART III - NATIONAL STOCK NUMBER CROSS-REFERENCE

17. Part III consists of a cross-reference from NSN's to RPL item numbers, part numbers, and manufacturers' code numbers. Part III is arranged in NSN sequence and contains only those items listed in Part I which have an NSN.

## PART IV - PART NUMBER CROSS-REFERENCE

18. Part IV Consists of a cross-reference from part numbers to manufacturers' code numbers, RPL item numbers, and NSN's for all items listed in Part I for which part numbers are available. Part IV is arranged in alpha numeric sequence by part number.

## CIRCUIT SYMBOL NUMBER TO ITEM NUMBER CROSS-REFERENCE

19. This cross-reference, which is applicable to electronic equipment RPL's only, consists of all circuit symbol numbers listed in Part I and cross-references each circuit symbol number to its individual RPL item number.

## REQUEST FOR ADDITIONAL COPIES OF REPAIR PARTS LISTS

20. Additional copies of this RPL may be requisitioned from the Commanding General, Marine Corps Logistics Base, (Code A826), Albany, Georgia 31704.

## CHANGES

21A. Changes will be forwarded as required. The title for such changes will be: "Change No. \_\_\_\_\_ to Marine Corps Stocklist, Repair Parts List, 08104A" Changes will be numbered consecutively beginning with number 1. Each change will show the new effective date of this RPL and the latest Marine Corps Modification Technical Instructions for which repair parts are included. When changes are received, annotate the Record of Changes sheet.

21B. Changes to Marine Corps Stock Lists for NSN's will not be made on an as received basis. Changes to NSN's, initiated by Replacement Parts, Substitute Parts, Standardization and other actions that are denoted by Phrase Code Actions in the MCML and CMDN Files, will be held until it has been determined that a sufficient number of changes warrants such action.

## ERRORS AND RECOMMENDATIONS

22. Errors in this publication or recommendations for its improvement should be submitted by using NAVMC 10772 "Report of Discrepancy in Supply Publications" form provided each Command for this purpose. If this form is not adequate to cover a particular situation or recommendation, a letter should be directed to Commandant of the Marine Corps, Code LMA-1, Headquarters U. S. Marine Corps, Washington, D. C. 20380.

## DEFINITIONS AND APPLICATION OF SOURCE MAINTENANCE RECOVERABILITY CODES

### SOURCE CODES

<u>Code</u>	<u>Application/Explanation</u>
	Source codes are assigned to support items to indicate the manner of acquiring the item for maintenance or overhaul of end items. Source codes are entered in the first and second position of the SMR code.

### SERIES A: ASSEMBLE, COMPLETE ASSEMBLY NOT STOCKED

Code "A" entered in the first position of the source code applies to items that are not procured as assemblies but are assembled within the Marine Corps prior to installation. The code entered in the second position designates the lowest echelon authorized to assemble the item. All the parts used in the assembly will be "P" coded.

AO	Assemble at organizational maintenance level 2nd echelon.
AF	Assemble at field maintenance level 3rd echelon.
AH	Assemble at field maintenance level 4th echelon.
AD	Assemble at depot maintenance level 5th echelon.

### SERIES K: ITEMS OF A KIT, NOT PURCHASED SEPARATELY

KD	An item of depot overhaul/repair kit and not purchased separately. Depot kit defined as a kit that provides items required at the time of overhaul or repair.
KF	An item of a maintenance kit and not purchased separately. Maintenance kit defined as a kit that provides an item that can be replaced at organizational or intermediate levels of maintenance.
KB	Items included in both a depot overhaul/repair kit and a maintenance kit.

### SERIES M: MANUFACTURE, PARTS NOT PROCURED

Code "M" entered in the first position of the source code applies to items that are not procured but are capable of being fabricated or manufactured within the Marine Corps. These items have relatively low usage and will generally be fabricated or manufactured only as required for immediate repair or replacement. The code entered in the second position designates the lowest echelon authorized to manufacture or fabricate the item. Units will requisition the bulk materiel under the NSN's and the quantities indicated to effect the fabrication or manufacture of the item.

MO	Manufacture or fabricate at organizational maintenance level 2nd echelon.
MF	Manufacture or fabricate at field maintenance level 3rd echelon.
MH	Manufacture or fabricate at field maintenance level 4th echelon.
MD	Manufacture or fabricate at depot maintenance level 5th echelon.

## SOURCE CODES, CONTINUED

### SERIES P: PARTS PROCURED, SUPPLY SYSTEM STOCK

#### Application/Explanation

##### Codes

- PA      Applied to items procured for the Marine Corps supply system for anticipated or known usage.
- PB      Applied to items for which no usage is anticipated, but procured for the Marine Corps supply system in limited quantity for insurance purposes.
- PC      Applied to items procured for the Marine Corps supply system which would be coded PA except that they are deteriorative in nature.
- PG      Applied to parts procured from the Marine Corps supply system to provide for the sustained support for the life of the equipment. It is applied to an item peculiar to the equipment which because of probable discontinuance or shutdown of production facilities would prove uneconomical to reproduce at a later time.

### SERIES X: NOT PROCURED, GENERALLY IMPRACTICABLE FOR STOCKING, MAINTENANCE, OR MANUFACTURE

#### Application/Explanation

##### Code

Items listed in this publication, which are source coded XA or XB, may have been subsequently assigned an NSN because of other applications in the Marine Corps. Therefore, if an item source coded in the XA or XB series in this publication is required, users are directed to first make the following investigations:

- a. Check the corresponding part number in the Master Cross-Reference List (C-RL), to determine if an NSN has been assigned.
- b. If an NSN has been obtained from the above check, refer to the Management Data List (MDL) for the latest supply management decision regarding the stock number.
- c. Check stock for availability of part/parts having National Stock Number.
- d. If the review of stock discloses that materiel is not available, refer to the MDL for inventory record data regarding the preferred NSN which may have been obtained in the Master Cross-Reference List (C-RL) and Management Data List (MDL) review.
- e. Prepare a requisition citing the stock number shown in the Management Data List (MDL).

The above review will assist the user in obtaining the correct item of supply from the supply system, when available, rather than through alternate methods such as obtaining the desired part from salvage, requisitioning the next higher assembly, or recommending that the equipment be overhauled or retired. If a stock number for the desired item does not exist, then the source of supply as defined below will prevail:

- XA      Applied to items not maintained in the supply system; replacement of these parts is neither practical or economical. Support of the end equipment will be effected by replacing the next higher assembly.
- XB      Applied to items not procured for stock, but may be acquired for use through salvage. Activities requiring such items will attempt to obtain them from salvage; if not obtainable from salvage, such items will be requisitioned through normal supply channels citing manufacturer's code and part number with supporting justification.
- XC      Applied to installation drawing, diagram, instruction sheet or field service drawing identified by a manufacturer's part number.

## MAINTENANCE CODES

### Application/Explanation

Maintenance codes are assigned to indicate the levels of maintenance authorized to use and repair support items. The maintenance codes are entered in the third and fourth position of the SMR code.

- a. Use (Third Position): The maintenance code entered in the third position will indicate the lowest maintenance level authorized to remove, replace, and use the support item. The maintenance code entered in the third position will indicate one of the following levels of maintenance:

Code

C	Crew 1st echelon
O	Organizational 2nd echelon
F	Field 3rd echelon
H	Field 4th echelon
D	Depot 5th echelon

- b. Repair (Fourth Position): The maintenance code entered in the fourth position indicates whether the item is to be repaired and identifies the lowest maintenance level with the capability to perform complete repair (i.e., all authorized maintenance functions).

O	Organizational 2nd echelon
F	Field 3rd echelon
H	Field 4th echelon
D	Depot 5th echelon
L	Repair restricted to designated Specialized Repair Activity.
Z	Non-repairable. No repair is authorized.
B	No repair is authorized. The item may be reconditioned by adjusting, lubricating, etc., at the user level. No parts or special tools are procured for the maintenance of this item.

## RECOVERABILITY CODES

Recoverability codes are assigned to support items to indicate the disposition action for unserviceable items. The recoverability code is entered in the Fifth Position of the SMR code.

Z	Nonrepairable item. When unserviceable, condemn and dispose at the maintenance level indicated in position 3.
O	Repairable item. When uneconomically repairable, condemn at organizational level.
F	Repairable item. When uneconomically repairable, condemn and dispose at field maintenance level 3rd echelon.
H	Repairable item. When uneconomically repairable, condemn at field maintenance level 4th echelon.
D	Repairable item. When beyond lower level of repair capability, return to depot. Condemnation and disposal not authorized below depot level.
L	Repairable item. Repair, condemnation and disposal not authorized below depot/ Specialized Repair Activity level.
A	Item requires special handling or condemnation procedures because of specific reasons (i.e., precious metal content, high dollar value, critical material or hazardous material). Refer to appropriate manuals/directives for specific instructions.

DEPARTMENT OF THE NAVY  
Headquarters U.S. Marine Corps  
Washington, D.C. 20380

18 December 1981

1. This Manual is effective upon receipt and contains Repair Parts List for the Facsimile Set, Tactical AN/GXC-7A.
2. Notice of discrepancies or suggested changes: Marines should forward recommendations on NAVMC 10772 to the Commandant of the Marine Corps (LMA-1). Army personnel should complete DA Form 2028 and forward to the Commander, U.S. Army Communications-Electronics Command, ATTN: DRSEL-ME-MQ, Fort Monmouth, New Jersey 07703.

BY DIRECTION OF THE COMMANDANT OF THE MARINE CORPS AND BY  
ORDER OF THE SECRETARY OF THE ARMY

OFFICIAL

B. D. CHAMBLESS  
Colonel, U.S. Marine Corps  
Director, Technical Operations Division  
Marine Corps Logistics Base  
Albany, Georgia 31704

R. M. JOYCE  
Brigadier General, U.S. Army  
The Adjutant General

# THE METRIC SYSTEM AND EQUIVALENTS

## WEAR MEASURE

Centimeter = 10 Millimeters = 0.01 Meters = 0.3937 Inches  
 1 Meter = 100 Centimeters = 1000 Millimeters = 39.37 Inches  
 1 Kilometer = 1000 Meters = 0.621 Miles

## WEIGHTS

Gram = 0.001 Kilograms = 1000 Milligrams = 0.035 Ounces  
 1 Kilogram = 1000 Grams = 2.2 lb.  
 1 Metric Ton = 1000 Kilograms = 1 Megagram = 1.1 Short Tons

## LIQUID MEASURE

1 Milliliter = 0.001 Liters = 0.0338 Fluid Ounces  
 1 Liter = 1000 Milliliters = 33.82 Fluid Ounces

## SQUARE MEASURE

1 Sq. Centimeter = 100 Sq. Millimeters = 0.155 Sq. Inches  
 1 Sq. Meter = 10,000 Sq. Centimeters = 10.76 Sq. Feet  
 1 Sq. Kilometer = 1,000,000 Sq. Meters = 0.386 Sq. Miles

## CUBIC MEASURE

1 Cu. Centimeter = 1000 Cu. Millimeters = 0.06 Cu. Inches  
 1 Cu. Meter = 1,000,000 Cu. Centimeters = 35.31 Cu. Feet

## TEMPERATURE

$5/9(F - 32) = ^\circ C$   
 212° Fahrenheit is equivalent to 100° Celsius

90° Fahrenheit is equivalent to 32.2° Celsius

32° Fahrenheit is equivalent to 0° Celsius

$9/5C + 32 = ^\circ F$

This fine document...

Was brought to you by me:

## Liberated Manuals -- free army and government manuals

Why do I do it? I am tired of sleazy CD-ROM sellers, who take publicly available information, slap “watermarks” and other junk on it, and sell it. Those masters of search engine manipulation make sure that their sites that sell free information, come up first in search engines. They did not create it... They did not even scan it... Why should they get your money? Why are not letting you give those free manuals to your friends?

I am setting this document FREE. This document was made by the US Government and is NOT protected by Copyright. Feel free to share, republish, sell and so on.

I am not asking you for donations, fees or handouts. If you can, please provide a link to [liberatedmanuals.com](http://liberatedmanuals.com), so that free manuals come up first in search engines:
