**REPORTING ERRORS AND RECOMMENDING IMPROVEMENTS**

You can help improve this manual. If you find any mistakes or if you know of a way to improve the procedures, please let us know. Mail your letter, DA Form 2028 (Recommended Changes to Publications and Blank Forms), or DA Form 20282 located in back of this manual direct to Commander, US Army Communications Electronics Command, ATTN: DRSELMEMQ, Fort Monmouth, NJ 07703.

For Air Force, submit AFTO Form 22 (Technical Order System Publication Improvement Report and Reply) in accordance with paragraph 65, Section VI, T.O. 0051. Forward direct to prime ALC/MST.

For Navy, mail comments to the Commander, Naval Electronics Systems Command, ATTN: ELEX 45053 (O.H.), Washington, DC 20360.

In either case, a reply will be furnished direct to you.

**SECTION I.  
INTRODUCTION**

**1-1. Scope**

This manual lists spares and repair parts; special tools; special test, measurement, and diagnostic equipment (TMDE), and other special support equipment required for performance of direct support and general support maintenance of the CV3098/G. It authorizes the requisitioning and issue of spares and repair parts as indicated by the source and maintenance codes.

**1-2. General**

This Repair Parts and Special Tools List is divided into the following sections:

*a. Section II Repair Parts List.* A list of spares and repair parts authorized for use in the performance of maintenance. The list also includes parts which must be removed for replacement of the authorized parts. Parts lists are composed of functional groups in numeric sequence, with the parts in each group listed in figure and item number sequence. Bulk materials are listed in section IV.

*b. Section III National Stock Number and Part Number Index.* A list, in National item identification number (NIIN) sequence, of all National stock numbers (NSN) appearing in the listings, followed by a list, in alphanumeric sequence, of all part numbers appearing in the listings. National stock numbers and part numbers are cross-referenced to each illustration figure and item number appearance.

*c. Section IV Bulk Materials List* A list of all bulk materials required to manufacture/assemble items contained in this manual. This section is listed alphanumerically by part number.

*d. Section V Special Tools List.* Special tools, TMDE and support equipment authorized for the performance of maintenance up to the direct support maintenance level are listed in TM 11-5895914-34P.

**1-3. Explanation of Columns**

*a. Illustration* This column is divided as follows:

(1) *Figure number* Indicates the figure number of the illustration on which the item is shown.

(2) *Item number* The number used to identify item called out in the illustration.

*b. Source, Maintenance, and Recoverability (SMR) Codes*

(1) *Source code* Source codes indicate the manner of acquiring support items for maintenance, repair, or overhaul of end items. Source codes are

entered in the first and second positions of the Uniform SMR Code format as follows:

<i>Code</i>	<i>Definition</i>
PA-Item	procured and stocked for anticipated or known usage.
PB-Item	procured and stocked for insurance purpose because essentiality dictates that a minimum quantity be available in the supply system.
AF-Item	to be assembled at direct support maintenance level.
XA-Item	is not procured or stocked because the requirements for the item will result in the replacement of the next higher assembly.
XB-Item	is not procured or stocked. If not available through salvage, requisition.

**NOTE**

Cannibalization or salvage may be used as a source of supply for any items source coded above except those coded XA and aircraft support items as restricted by AR 700-42.

(2) *Maintenance code* Maintenance codes are assigned to indicate the levels of maintenance authorized to USE and REPAIR support items. The maintenance codes are entered in the third and fourth positions of the Uniform SMR Code format as follows:

(a) The maintenance code entered in the third position will indicate the lowest maintenance level authorized to remove, replace, and use the support item. The maintenance code entered in the third position will indicate one of the following levels of maintenance:

<i>Code</i>	<i>Application/Explanation</i>
O-Support	item is removed, replaced, used at the organizational level.
F-Support	item is removed, replaced, used at the direct support level.
H-Support	item is removed, replaced, used at the general support level.
D-Support	items that are removed, replaced, used at depot, mobile depot, specialized repair activity only.

(b) The maintenance code entered in the fourth position indicates whether the item is to be repaired and identifies the lowest maintenance level with the capability to perform complete repair (i e.,

all authorized maintenance functions) This position will contain one of the following maintenance codes:

- | <i>Code</i> | <i>Application/Explanation</i>  |
|-------------|---|
| F-          | The lowest maintenance level capable of complete repair of the support Item is the direct support level.                          |
| H-          | The lowest maintenance level capable of complete repair of the support Item is the general support level.                         |
| D-          | The lowest maintenance level capable of complete repair of the support item is the depot level, performed by Tobyhanna Army Depot |
| Z-          | Nonreparable No repair is authorized  |

(3) *Recoverability code* Recoverability codes are assigned to support items to indicate the disposition action on unserviceable Items. The recoverability code is entered in the fifth position of the Uniform SMR Code format as follows

- | <i>Recoverability codes</i> | <i>Definition</i>   |
|-----------------------------|---|
| Z-Nonreparable Item.        | When unserviceable, condemn and dispose at the level indicated in position 3  |
| F-Reparable item            | When uneconomically reparable, condemn and dispose at the direct support level  |
| H-Reparable Item            | When uneconomically reparable, condemn and dispose at the general support level   |
| D-Reparable item.           | When beyond lower level repair capability, return to depot. Condemnation and disposal not authorized below depot level  |
| L-Reparable item            | Repair, condemnation, and disposal not authorized below depot/specialized repair activity level   |
| A-Item                      | requires special handling or condemnation procedures because of specific reasons ( e, precious metal content, high dollar value, critical material or hazardous material) Refer to appropriate manuals/directives for specific instructions |

*c. Federal Stock Number* Indicates the National stock number assigned to the item and will be used for requisitioning purposes

*d. Part Number* . Indicates the primary number used by the manufacturer (individual, company, firm, corporation, or Government activity), which controls the design and characteristics of the Item by means of its engineering drawings, specifications, standards, and inspection requirements to identify an Item or range of items

**NOTE**

When a stock number item is requisitioned, the repair part received may have a different part number than the part being replaced

e. Federal Supply Code for Manufacturer (FSCM) The FSCM is a 5-digit numeric code listed in SB 708-41/42 which is used to identify the manufacturer, distributor, or Government agency, etc .

f. Description Indicates the Federal Item name and, if required, a minimum description to identify the item.

g. Unit of Measure (U/M) Indicates the standard of the basic quantity of the listed item as used in performing the actual maintenance function. This measure is expressed by a two-character alphabetical abbreviation (e g , ea, in, pr, etc.) When the unit of measure differs from the unit of issue, the lowest unit of issue that will satisfy the required units of measure will be requisitioned.

h. Quantity Incorporated In Unit. Indicates the quantity of the item used in the breakout shown on the illustration figure, which is prepared for a functional group, subfunctional group, or an assembly.

**1-4. Special Information**

**NOTE**

Unless otherwise noted, all equipment applicable to the AN/FSC78(V) is applicable to the AN/GSC39(V)

- a. The following publications pertain to the CV-3098/G and its components.
- TM 11-5895-898-12-1, Satellite Communication Terminal AN/FSC-78(V)
  - TM 11-5895-898-12-2, Satellite Communication Terminal AN/FSC-78(V)
  - TM 11-5895-898-20P, Satellite Communication Terminal AN/FSC-78(V)
  - TM 11-5895-913-34, Translator, Signal Data CV-3098/G for Satellite Communication Terminal AN/FSC-78(V)
  - TM 11-5895-913-34P, Translator, Signal Data CV-3098/G for Satellite Communication Terminal AN/FSC-78(V)
  - TM 11-5895-914-34, Ancillary Equipment Including: Control Monitor ID-1914/G for Satellite Communication Terminals AN/FSC-78(V) and AN/FSC-79
  - TM 11-5895-914-34P, Ancillary Equipment Including: Control Monitor ID-1914/G for Satellite Communication Terminals AN/FSC-78(V) and AN/FSC-79
  - TM 11-5895-1043-12, Satellite Communication Terminal AN/GSC-39(V)2 (To be published)
  - TM 11-5895-1043-20P, Satellite Communication Terminal AN/GSC-39(V)2 (To be published)
  - TM 11-5895-1050-12, Satellite Communication Terminal AN/GSC-39(V)I (To be published)
  - TM 11-5895-1050-20P, Satellite Communication Terminal AN/GSC-39(V)I (To be published)

b. National stock numbers (NSN's) that are missing

from P source coded items have been applied for and will be added to this TM by future change/revision when they are entered in the Army Master Data File (AMDF) Until the NSN's are established and published, submit exception requisitions to Commander, US Army Communications Electronics Command, ATTN DRSELMM Fort Monmouth NJ 07703 for the part required to support your equipment.

c. Action change codes indicated in the left-hand margin of the listing page denote the following:

- N-Indicates an added item.
- C-Indicates a change in data.
- R-Indicates a change in NSN only.

**1-5. How to Locate Repair Parts**

a. When National stock number or part number is unknown

(1) *First* Using the table of contents, determine the functional group within which the item belongs. This is necessary since illustrations are prepared for functional groups and listings are divided into the same

groups.

(2) *Second*. Find the Illustration covering the functional group to which the item belongs

(3) *Third* Identify the item on the illustration and note the illustration figure and item number of the item.

(4) *Fourth* Using the Repair Parts Listing, find the figure and item number noted on the illustration

b. When National stock number or part number is known.

(1) *First* . Using the Index of National Stock Numbers and Part Numbers, find the pertinent National stock number or part number This index is In NIIN sequence followed by a list of part numbers in alphameric sequence, cross-referenced to the Illustration figure number and item number

(2) *Second*. After finding the figure and item number, locate the figure and item number in the repair parts list.

P.S.—IF YOUR OUTFIT WANTS TO KNOW ABOUT YOUR RECOMMENDATION MAKE A CARBON COPY OF THIS AND GIVE IT TO YOUR HEADQUARTERS.

This fine document...

Was brought to you by me:

## [Liberated Manuals -- free army and government manuals](#)

Why do I do it? I am tired of sleazy CD-ROM sellers, who take publicly available information, slap “watermarks” and other junk on it, and sell it. Those masters of search engine manipulation make sure that their sites that sell free information, come up first in search engines. They did not create it... They did not even scan it... Why should they get your money? Why are not letting you give those free manuals to your friends?

I am setting this document FREE. This document was made by the US Government and is NOT protected by Copyright. Feel free to share, republish, sell and so on.

I am not asking you for donations, fees or handouts. If you can, please provide a link to [liberatedmanuals.com](http://liberatedmanuals.com), so that free manuals come up first in search engines:
