IV. INDEX - REFERENCE DESIGNATION CROSS-REFERENCE TO PAGE NUMBER	32

* This manual supersedes Appendix A (DS, GS, and Depot Repair Parts) of TM 11-6625-821-45, 22 September 1966.

SECTION I

INTRODUCTION

1. Scope.

This manual lists repair parts and special tools required for the performance of direct support, general support, and depot level maintenance of the AN/ARM-93.

2. General.

This Repair Parts and Special Tools List is divided into the following sections:

a. Repair Parts - Section II. A list of repair parts authorized for the performance of maintenance at the direct support, general support, and depot level.

b. Federal Stock Number and Reference Number Index - Section III. A list of Federal stock numbers in ascending numerical sequence followed by a list of reference numbers (Manufacture P/N) in ascending alpha-numeric sequence, cross-referenced to the illustration figure number and reference designation.

c. Reference Designation Cross-Reference to Page Number Index - Section IV. A list of reference designation numbers in alpha-numeric sequence, cross-referenced to page number of the Repair Parts List.

3. Explanation of Columns.

The following provides an explanation of columns in the tabular lists in Section II.

a. Source, Maintenance and Recoverability Codes (SMR), Column 1.

(1) Source code indicates the selection status and source for the listed item. Source codes are:

<u>Code</u>	<u>Explanation</u>
-------------	--------------------

P - applies to repair parts that are stocked in or supplied from the GSA/DSA, or Army supply system, and authorized for use at indicated maintenance categories.

M - applies to repair parts that are not procured or stocked, but are to be manufactured at indicated maintenance categories.

A - applies to assemblies that are not procured or stocked as such, but are made up of two or more units, each of which carry individual stock numbers and descriptions, and are procured and stocked and can be assembled by units at indicated maintenance categories.

X - applies to parts and assemblies that are not procured or stocked; the mortality of which normally is below that of the applicable end item; and the failure of which should result in retirement of the end item from the supply system.

X1 - applies to repair parts which are not procured or stocked, the requirement for which will be supplied by the use of the next higher assembly or component.

X2 - applies to repair parts which are not stocked. The indicated maintenance category requiring such repair parts will attempt to obtain them through cannibalization; if not obtainable through cannibalization, such repair parts will be requisitioned with supporting justification through normal supply channels.

C - applies to repair parts authorized for local procurement. If not obtainable from local procurement, such repair parts will be requisitioned through normal supply channels with a supporting statement of nonavailability from local procurement.

G - applies to major assemblies that are procured with PEMA funds for initial issue only to be used as exchange assemblies at DSU and GSU level. These assemblies will not be stocked above DSU and GSU level or returned to depot supply level.

(2) Maintenance code indicates the lowest category of maintenance authorized to install the listed item. The maintenance level code is:

<u>Code</u>	<u>Explanation</u>
<u>C</u>	- Crew or operator maintenance
<u>O</u>	- Organizational maintenance
<u>E</u>	- Direct Support maintenance
<u>H</u>	- General Support maintenance
<u>D</u>	- Depot maintenance

(3) Recoverability code indicates whether unserviceable items should be returned for recovery on salvage. Items not coded are expendable. Recoverability codes are:

<u>Code</u>	<u>Explanation</u>
<u>R</u>	- applies to repair parts and assemblies which are economically repairable at DSU and GSU activities, and normally are furnished by supply on an exchange basis.

- S** - repair parts and assemblies which are economically repairable at DSU and GSU activities, and normally are furnished by supply on an exchange basis. When items are determined by a DSU to be uneconomically repairable, they will be evacuated to a depot for evaluation and analysis before final disposition.
- T** - applies to high dollar value recoverable repair parts which are subject to special handling and are issued on an exchange basis. Such repair parts normally are repaired or overhauled at depot maintenance activities.
- V** - applies to repair parts specifically selected for salvage by reclamation units because of precious metal content, critical materials, high dollar value reusable casings or castings.
- b. Federal Stock Number, Column 2. This column indicates the Federal stock number assigned to the item and will be used for requisitioning purposes.
- c. Description, Column 3. This column indicates the Federal item name and any additional description of the item required. A part number or other reference number is followed by the applicable five-digit Federal supply code for manufacturer in parentheses. Each item is indented with a dot(s). i.e., An item indented "A" in the description column will be preceded with one dot; an item indented "B" will be preceded by two dots, etc.
- d. Unit of Measure (U/M), Column 4. A 2 character alphabetic abbreviation indicating the amount or quantity of the item upon which the allowances are based, e.g., ft, ea, pr, etc.
- e. Quantity Incorporated in Unit, Column 3. This column indicates the quantity used per reference designation (Column 10b). A "V" appearing in this column in lieu of a quantity indicates that a definite quantity cannot be indicated (e. g., SHIMS, SPACERS, etc.).
- f. 30-Day DS/GS Maintenance Allowances, Columns 6 and 7.
- NOTE: Allowances in GS column are for GS maintenance only.
- (1) Separate columns for Direct Support (DS) and General Support (GS) indicate the total range of repair parts authorized for use at the appropriate categories.
- (2) The allowance columns are divided into three sub-columns. An asterisk in these columns opposite the first appearance of each item indicates the item is authorized on an "as required" basis. Repair parts stockage at the DS/GS levels will be based on demand and determined in accordance with AR711-16. Subsequent appearances of the same item will have the letters "REF" in the allowance columns.
- g. 1-Year Allowances Per 100 Equipments/Contingency Planning Purposes, Column 8. This column indicates items required to support 100 equipments for one year. An asterisk opposite the first appearance of each item indicates the range of items required.
- h. Depot Maintenance Allowances Per 100 Equipments, Column 9. This column indicates items authorized for depot maintenance of 100 equipments. An asterisk opposite the first appearance of each item indicates the range of items authorized on an "as required" basis. Subsequent appearance of the same item will have the letters "REF" in this column when shown as a supply item.
- i. Illustration, Column 10, This column is divided as follows:
- (1) Figure Number, Column 10a. Indicates the figure number of the illustration in which the item is shown.
 - (2) Item Number, Column 10b. Indicates the callout number or reference designation used to reference the item in the illustration.
- #### 4. Special Information.
- a. Repair parts mortality is computed from failure rates derived from experience factors with the individual parts in a variety of equipments. Variations in the specific application and periods of use of electronics equipment, the fragility of electronic piece parts, plus intangible material and quality factors intrinsic to the manufacture of electronic parts, do not permit mortality to be based on hours of end item use. However, long periods of continuous use under adverse conditions are likely to increase repair parts mortality.
- b. Parts which require manufacture or assembly at a category higher than that authorized for installation will indicate in the source column the higher category.
- #### 5. How to Locate Repair Parts.
- a. When Federal stock number or reference number is unknown:
- (1) First. Using the table of contents, determine the functional group within which the repair part belongs. This is necessary since illustrations are prepared for functional groups and listings are divided into the same groups.
 - (2) Second. Find the illustration covering the functional group to which the repair part belongs.
 - (3) Third. Identify the repair part on the illustration and note the illustration figure and reference designation of the repair part.
 - (4) Fourth, Using the repair parts listing, find the functional group to which the repair part belongs and locate the illustration figure and reference designation noted on the illustration.
- b. When Federal stock number or reference is known:
- (1) First. Using the Index of Federal Stock Numbers and Reference Numbers, find the pertinent Federal stock number or reference number. This index is in ascending FSN sequence followed by a list of reference numbers in alpha-numeric sequence, cross-referenced to the illustration figure number and reference designation number.

(2) Second. Using the repair part listing, find the functional group of the repair part and the illustration figure number and reference designation referenced in the Index of Federal Stock Numbers and Reference Numbers.

c. When the reference designation is known:

(1) First. Locate the reference designation in the Index-Reference Designation Cross-Reference to Page Numbers.

(2) Second. Note the page number; then locate the item in the list by the page numbers.

6. Federal Supply Code.

This paragraph lists the Federal supply and the associated manufacturer's name.

Code	Manufacturer
01181	New England Oven and Furnace Co, 385 Boston Post Road Orange, Corm 06477
02660	Bunkerramo Corp, The Amphenol Connector Div. 2801 S. 25th Ave. Broadview, IL 60153

7. Recommendations for Maintenance Publication Improvements

Report of errors, omissions, and recommendations for improving this publication by the individual user is encouraged. Reports should be submitted on DA Form 2028 (Recommended Changes to DA Publication) and forwarded direct to Commander, U.S. Army Electronics Command, ATTN: AMSEL-MA-AN, Fort Monmouth, New Jersey, 07703.

This fine document...

Was brought to you by me:

Liberated Manuals -- free army and government manuals

Why do I do it? I am tired of sleazy CD-ROM sellers, who take publicly available information, slap “watermarks” and other junk on it, and sell it. Those masters of search engine manipulation make sure that their sites that sell free information, come up first in search engines. They did not create it... They did not even scan it... Why should they get your money? Why are not letting you give those free manuals to your friends?

I am setting this document FREE. This document was made by the US Government and is NOT protected by Copyright. Feel free to share, republish, sell and so on.

I am not asking you for donations, fees or handouts. If you can, please provide a link to liberatedmanuals.com, so that free manuals come up first in search engines:
