IV. National Stock Number and Part Number Index . . . . .	24	

## SECTION I

### INTRODUCTION

#### **1. Scope**

This manual lists spares and repair parts; special tools; special test, measurement, and diagnostic equipment (TMDE), and other special support equipment required for performance of organizational, direct support and general support maintenance of the MK-1819/GSG-10(V) and MK-1821/GSG-10(V). It authorizes the requisitioning and issue of spares and repair parts as indicated by the source and maintenance codes.

#### **2. General**

This Repair Parts and Special Tools List is divided into the following sections:

a. *Section II. Repair Parts List.* A list of spares and repair parts authorized for use in the performance of maintenance. The list also includes parts which must be removed for replacement of the authorized parts. Parts lists are composed of functional groups in numeric sequence, with the parts in each group listed in figure and item number sequence.

b. *Section III. Special Tools List.* Not applicable.

c. *Section IV. National Stock Number and Part Number Index.* A list, in National item identification number (NIIN) sequence, of all National stock numbers (NSN) appearing in the listings, followed by a list, in alphabetic sequence, of all part numbers appearing in the listings. National stock numbers and part numbers are cross-referenced to each illustration figure and item number appearance.

#### **3. Explanation of Columns**

a. *Illustration.* This column is divided as follows:

(1) *Figure number.* Indicates the figure number of the illustration on which the item is shown.

(2) *Item number.* The number used to identify item called out in the illustration.

b. *Source, Maintenance, and Recoverability (SMR) Codes.*

(1) *Source code.* Source codes indicate the manner of acquiring support items for maintenance, repair, or overhaul of end items. Source codes are entered in the first and second positions of the Uniform SMR Code format as follows:

<i>Code</i>	<i>Definition</i>
PA	—Item procured and stocked for anticipated or known usage.
PD	—Support item, excluding support equipment, procured for initial issue or outfitting and stocked only for subsequent or additional initial issue or outfittings. Not subject to automatic replenishment.
XB	—Item is not procured or stocked. If not available through salvage, requisition.

#### **NOTE**

Cannibalization or salvage may be used as a source of supply for any items source coded above except those coded XA and aircraft support items as restricted by AR 750-1.

(2) *Maintenance code.* Maintenance codes are assigned to indicate the levels of maintenance authorized to USE and REPAIR support items. The maintenance codes are entered in the third and fourth positions of the Uniform SMR Code format as follows:

(a) The maintenance code entered in the third position will indicate the lowest maintenance level authorized to remove, replace, and use the support item. The maintenance code entered in the third position will indicate one of the following levels of maintenance:

Code	<i>Application/Explanation</i>
------	--------------------------------

- O – support item is removed, replaced, used at the organizational level.  
 F — Support item is removed, replaced, used at the direct support level.

(b) The maintenance code entered in the fourth position indicates whether the item is to be repaired and identifies the lowest maintenance level with the capability to perform complete repair (i.e., all authorized maintenance functions). This position will contain one of the following maintenance codes:

Code	<i>Application/Explanation</i>
------	--------------------------------

- F — The lowest maintenance level capable of complete repair of the support item is the direct support level.  
 H — The lowest maintenance level capable of complete repair of the support item is the general support level.  
 D — The lowest maintenance level capable of complete repair of the support item is the depot level.  
 Z – Nonreparable. No repair is authorized.

(3) *Recoverability code.* Recoverability codes are assigned to support items to indicate the disposition action on unserviceable items. The recoverability code is entered in the fifth position of the Uniform SMR Code format as follows:

Recoverability Code	<i>Definition</i>
------------------------	-------------------

- Z — Nonreparable item. When unserviceable, condemn and dispose at the level indicated in position 3.  
 F — Reparable item. When uneconomically reparable, condemn and dispose at the direct support level.  
 H — Reparable item. When uneconomically reparable, condemn and dispose at the general support level.  
 D — Reparable item. When beyond lower level repair capability, return to depot. Condemnation and disposal not authorized below depot level.

c. *National Stock Number.* Indicates the National stock number assigned to the item and will be used for requisitioning purposes.

d. *Federal Supply Code for Manufacturer (FSCM).* The FSCM is a 5-digit numeric code listed in SB 708-41/42 which is used to identify the manufacturer, distributor, or Government agency, etc.

e. *Part Number.* Indicates the primary number used by the manufacturer (individual, company, firm, corporation, or Government activity), which controls the design and characteristics of the item by means of its engineering drawings, specifications, standards, and inspection requirements to identify an item or range of items.

#### **NOTE**

When a stock numbered item is requisitioned, the repair part received may have a different part number than the part being replaced.

f. *Description.* Indicates the Federal item name and, if required, a minimum description to identify the item. Items that are included in kits and sets are listed below the name of the kit or set indicated in the quantity incorporated in unit column.

g. *Unit of Measure (U/M).* Indicates the standard of the basic quantity of the listed item as used in performing the actual maintenance function. This measure is expressed by a two character alphabetical abbreviation (e.g., ea, in, pr, etc). When the unit of measure differs from the unit of issue, the lowest unit of issue that will satisfy the required units of measure will be requisitioned.

h. *Quantity Incorporated in Unit.* indicates the quantity of the item used in the breakout shown on the illustration figure, which is prepared for a functional group, subfunctional group, or an assembly.

#### **4. Special Information**

a. The following publications pertain to the MK-1819K3SG-10(V) and MK-1821/GSG-10(V) and their components:

TM 11-5820-401-12, Radio Sets, AN/VRC-12, AN/VRC-43, AN/VRC-4, AN/VRC-45, AN/VRC-6, AN/VRC-47, AN /VRC-48, AN/VRC-49, AN/VRC-54; Mounting Kit

MT-1029/VRC and MT-1898/VRC; Antenna Kit, AT-912/VRC; Control, Frequency Selector, C-2742/VRC and Control, Radio Set, C-2299/VRC.  
 TM 11-5985-262-24P, Antenna, AS-1729/VRC  
 TM 11-7440-242-23-1, Fire Direction System, Artillery, AN/GSG-10(V)  
 TM 11-7440-242-23P, Fire Direction System, Artillery AN/GSG-10(V) including Fire Direction Center, Artillery, OA-4390/GSG-10(V) (Div); Fire Direction Center, Artillery Processing and Display, OA-8389/GSG-10(V) (Battalion); Message Entry Device, Variable Format, AN/GSC-21 (VFMED) and Data Display, Artillery, Battery, AN/GSQ-122 (BDU).  
 TM 11-7440-251-10, Data Display, Artillery, AN/IGSQ-122  
 TM 11-7440-253-10-1, Message Entry Device, Variable Format, AN/GSC-21

*b.* National stock numbers (NSN'S) that are missing from P source coded items have been applied for and will be added to this TM by future change/revision when they are entered in the Army Master Data File (AMDF). Until the NSN'S are established and published, submit exception requisitions to: Commander, US Army Communications-Electronics Command and Fort Monmouth, ATTN: AMSEL-MM, Fort Monmouth, NJ 07703-5007 for the part required to support your equipment.

## 5. How to Locate Repair Parts

*a.* When National stock number or part number is unknown.

(1) First. Using the table of contents, determine the functional group within which the item belongs. This is necessary since illustrations are prepared for functional groups and listings and divided into the same groups.

(2) Second. Find the illustration covering the functional group to which the item belongs.

(3) Third identify the item on the illustration and note the illustration figure and item number of the item.

(4) Fourth. Using the Repair Parts Listing, find the figure and item number noted on the illustration.

*b.* When National stock number or part number is known.

(1) First. Using the index of National Stock Numbers and Part Numbers, find the pertinent National stock number or part number. This index is in NIIN sequence followed by a list of part numbers in alpha meric sequence, cross-referenced to the illustration figure number and item number.

(2) Second. After finding the figure and item number, locate the figure and item number in the repair parts list.

Commander  
Stateside Army Depot  
ATTN: AMSTA-US  
Stateside, N.J. 07703-5007

DATE SENT

10 July 1975

PUBLICATION NUMBER  
TM 11-7440-284-24P

PUBLICATION DATE

PUBLICATION TITLE Installation Kit, Electronics  
Equipment MK-1819/GSG-10(V) and Power  
Accessory Kit MK-1821/GSG-10(V)

BE EXACT... PIN-POINT WHERE IT IS

IN THIS SPACE TELL WHAT IS WRONG  
AND WHAT SHOULD BE DONE ABOUT IT:

PAGE NO	PARA-GRAPH	FIGURE NO	TABLE NO	
33				For item 2, change the NSN to read: 5835-00-134-9186. Reason: Accuracy.
44	19			Identify the cover on the junction box (item no. 5). Reason: It is a separate item and is not called out on figure 19.
45				Add the cover of the junction box as an item in the listing for figure 19. Reason: Same as above.

*Brigadier General, United States Army*  
*The Adjutant General*

Distribution:

To be distributed in accordance with special list.

This fine document...

Was brought to you by me:

## Liberated Manuals -- free army and government manuals

Why do I do it? I am tired of sleazy CD-ROM sellers, who take publicly available information, slap “watermarks” and other junk on it, and sell it. Those masters of search engine manipulation make sure that their sites that sell free information, come up first in search engines. They did not create it... They did not even scan it... Why should they get your money? Why are not letting you give those free manuals to your friends?

I am setting this document FREE. This document was made by the US Government and is NOT protected by Copyright. Feel free to share, republish, sell and so on.

I am not asking you for donations, fees or handouts. If you can, please provide a link to [liberatedmanuals.com](http://liberatedmanuals.com), so that free manuals come up first in search engines:
