# Section I. INTRODUCTION

---

## 1. Scope

This manual lists repair parts required for the performance of organizational maintenance of the pumping assembly.

## 2. General

This Repair Parts and Special Tools List is divided into the following sections:

*a. Prescribed Load Allowance (PLA)-Section II.* A composite listing of the repair parts having quantitative allowances for initial stockage at the organizational level.

*b. Repair Parts-Section III..* A list, in figure and item number sequence, of repair parts authorized for the performance of maintenance at the organizational level, including those items which must be removed for replacement of the authorized item. Items, except kits and sets, are listed by assembly groups in top down breakdown sequence. Repair parts kits and sets are listed separately as Group 15 at the end of the Repair Parts List without regard to the assembly group to which they belong. Components of the kits and sets are listed in their proper sequence in the assembly group to which they belong and are referenced to the FSN of the kit or set.

*c. Special Tools, Test and Support Equipment-Section IV.* Not Applicable.

*d. Federal Stock Number and Reference Number Index - Section V.* A list of Federal stock numbers in ascending numerical sequence followed by a list of reference numbers in ascending alphanumeric sequence, cross-referenced to the illustration figure number and item number.

## 3. Explanation of Columns

The following provides an explanation of columns in the tabular lists in sections II, III, and IV:

*a. Source, Maintenance, and Recoverability Codes (SMR), Column (1) of Section III:*

(1) Source code, indicates the selection status and source for the listed item. Source codes are:

Code	Explanation
------	-------------

P	Repair parts, Special Tools and Test Equipment supplied from the GSA/DSA, or Army supply system and authorized for use at indicated maintenance categories.
---	---

P2	Repair parts. Special Tools and Test Equipment which are procured and stocked for insurance purposes because the combat or military essentiality of the end item dictates that a minimum quantity be available in the supply system.
----	--

Code	Explanation
M	Repair parts, Special Tools and Test Equipment which are not procured or stocked, as such, in the supply system but are to be manufactured at indicated maintenance levels.
A	Assemblies which are not procured or stocked as such, but are made up of two or more units. Such component units carry individual stock numbers and descriptions, are procured and stocked separately and can be assembled to form the required assembly at indicated maintenance categories.
x	Parts and assemblies that are not procured or stocked because the failure rate is normally below that of the applicable end item or component. The failure of such part or assembly should result in retirement of the end item from the supply system.
X1	Repair parts which are not procured or stocked. The requirement for such items will be filled by the next higher assembly or component.
X2	Repair parts, Special Tools and Test Equipment which are not stocked and have no foreseen mortality. The indicated maintenance category requiring such repair parts will attempt to obtain the parts through cannibalization or salvage, the item may be requisitioned with exception data, from the end item manager, for immediate use.
G	Major assemblies that are procured with PEMA funds for initial issue only as exchange assemblies at DSU and GSU level. These assemblies will not be stocked above DS and GS level or returned to depot supply level.

Note: Cannibalization or salvage may be used as a source of supply for any items source coded above except those coded X1 and aircraft support items as restricted by AR 700-42.

(2) Maintenance code, indicates the lowest category of maintenance authorized to install the listed item. The maintenance level codes are:

Code	Explanation
C-Operator Crew	
O-Organizational maintenance	

(3) Recoverability code, indicates whether unserviceable items should be returned for recovery or salvage. Items not coded are expendable, Recoverability codes are:

Code	Explanation
R	Applied to Repair parts, (assemblies and components) Special Tools and Test Equipment which are considered economically reparable at direct and general support maintenance levels. When the item is no longer economically reparable, it is normally disposed of at the GS

**Code*****Explanation***

S	level. When supply considerations dictate, some of these repair parts may be listed for automatic return to supply for depot level repair as set forth in AR 710-50. When so listed, they will be replaced by supply on an exchange basis.
T	Repair parts, Special Tools, Test Equipment and assemblies which are economically reparable at DSU and GSU activities and which normally are furnished by supply on an exchange basis. When items are determined by a GSU to be uneconomically reparable, they will be evacuated to a depot for evaluation and analysis before final disposition.
U	High dollar value recoverable Repair parts, Special Tools and Test Equipment which are subject to special handling and are issued on an exchange basis. Such items will be repaired or overhauled at depot maintenance activities only. No repair may be accomplished at lower levels.
	Repair parts, Special Tools and Test Equipment specifically selected for salvage by reclamation units because of precious metal content, critical materials, high dollar value or reusable casings or castings.

*b. Federal Stock Number, Column (1) of Section II and Column (2) of Section III.* This column indicates the Federal stock number assigned to the item and will be used for requisitioning purposes.

*c. Description, Column (2) of Section II and Column (3) of Section III.* This column indicates the Federal item name and any additional description of the item required. A part number or other reference number is followed by the applicable five-digit Federal supply code for manufacturers in parentheses. Repair parts quantities included in the kits, sets, and assemblies are shown in front of the repair part name. Material required for manufacture or fabrication is identified.

*d. Unit of Measure (U/M), Column (4) of Section III.* A 2-character alphabetic abbreviation indicating the amount or quantity of the item upon which the allowances are based, e.g. ft, ea, pr, etc.

*e. Quantity Incorporated in Unit, Column (5) of Section III.* This column indicates the quantity of the item used in the assembly group. A "V" appearing in this column in lieu of a quantity indicates that a definite quantity cannot be indicated (e.g. shims, spacers, etc.).

*f. 15-Day Organizational Maintenance Allowance, Column (3) of Section II and Column (6) of Section III.*

(1) The allowance columns are divided into four subcolumns. Indicated in each subcolumn opposite the first appearance of each item is the total quantity of items authorized for the number of equipments supported. Subsequent appearances of the same item will have the letters "REF" in the

allowance columns. Items authorized for use as required but not for initial stockage are identified with an asterisk in the allowance column.

(2) The quantitative allowances for organizational level of maintenance represents one initial prescribed load for a 15-day period for the number of equipments supported. Units and organizations authorized additional prescribed loads will multiply the number of prescribed loads authorized by the quantity of repair parts reflected in the density column applicable to the number of items supported to obtain the total quantity of repair parts authorized.

(3) Organizational units providing maintenance for more than 100 of these equipments shall determine the total quantity of parts required by converting the equipment quantity to a decimal factor by placing a decimal point before the next to last digit of the number to indicate hundredths, and multiplying the decimal factor by the parts quantity authorized in the 51-100 allowance column. Example, authorized allowance for 51-100 equipments is 40; for 150 equipments multiply 40 by 1.50 or 60 parts required.

(4) Subsequent changes to allowances will be limited as follows: No change in the range of items is authorized. If additional items are considered necessary, recommendation should be forwarded to U.S. Army Mobility Equipment command for exception or revision to the allowance list. Revisions to the range of items authorized will be made by this Command based upon engineering experience, demand data, or TAERS information.

*g. Illustration, Column (7) of Section III.* This column is divided as follows:

(1) *Figure number, column (7) (a).* Indicates the figure number of the illustration in which the item is shown.

(2) *Item number, column (7) (b).* Indicates the callout number used to reference the item in the illustration.

#### **4. Special Information**

a. Repair parts mortality has been based on 1,000 hours of operation per year.

b. Parts which require manufacture or assembly at a category higher than that authorized for installation will indicate in the source column the higher category.

c. The following publications pertain to the pumping assembly and its components:

TM 5-4320-259-12      Operator and Organizational Maintenance Manual

TM 5-4320-259-34      Direct Support and General Support Maintenance Manual

TM 5-4320-259-35P Direct Support, General  
Support, and Depot  
Maintenance Repair  
Parts List

## 5. How to Locate Repair Parts

a. When Federal stock number or reference number is unknown:

(1) *First.* Using the table of contents, determine the assembly group, i.e., engine, engine assembly, transmission, transmission assembly, within which the repair part belongs. This is necessary since illustrations are prepared for assembly groups, and listings are divided into the same groups.

(2) *Second.* Find the illustration covering the assembly group to which the repair part belongs.

(3) *Third.* Identify the repair part on the illustration and note the illustration figure and item number of the repair part.

(4) *Fourth.* Using the Repair Parts Listing, find the assembly group to which the repair part belongs and locate the illustration figure and item number noted on the illustration.

b. When Federal stock number or reference number is known:

(1) *First.* Using the Index of Federal Stock Numbers and Reference Numbers, find the pertinent Federal stock number or reference number. This index is in ascending FSN sequence followed by a list of reference numbers in alpha-numeric sequence, cross-referenced to the illustration figure number and item number.

(2) *Second.* Using the Repair Part Listing, find the assembly group of the repair part and the illustration figure number and item number referenced in the Index of Federal Stock Numbers and Reference Numbers.

## 6. Abbreviations

<i>Abbreviations</i>	<i>Explanation</i>
assy . . . . .	assembly

<i>Abbreviation</i>	<i>Explanation</i>
brs . . . . .	brass
cad. pl. . . . .	cadmium plated

## 7. Federal Supply Codes for Manufacturers

<i>Code</i>	<i>Manufacturer</i>
05748 . . .	Barnes Manufacturing Company
11583 . . .	Champion Spark Plug Company Toledo, Ohio
34199 . . .	Kohler Company
61864 . . .	United-Carr, Inc., Boston, Massachusetts
77122 . . .	Palnut Company
78940 . . .	United Air Cleaner Division, United Filtration Corporation
79470 . . .	The Weatherhead Company, Cleveland, Ohio
81718 . . .	Dover Corporation, OPW Division, Cincinnati, Ohio
94135 . . .	Naval Ordnance Standards
96906 . . .	Military Standards

## 8. Recommendations for Maintenance Publication Improvements

Report of errors, omissions, and recommendations for improving this publication by the individual user is encouraged. Reports should be submitted on DA Form 2028 (Recommended Changes to Publications) and forwarded direct to U. S. Army Mobility Equipment Command, 4300 Goodfellow Blvd., ATTN: AMSME-MPP, St. Louis, Mo. 63120.

By Order of the Secretary of the Army:

Official:

VERNE L. BOWERS,  
*Major General, United States Army,*  
*The Adjutant General.*

W. C. WESTMORELAND,  
*General, United States Army,*  
*Chief of Staff.*

Distribution:

To be distributed in accordance with DA Form 12-25A (qty rqr block No. 154) organizational maintenance requirements for Petroleum Distribution.

☆U.S. GOVERNMENT PRINTING OFFICE: 1996 - 406-421/52048

**PIN : 008492-000**

This fine document...

Was brought to you by me:

## Liberated Manuals -- free army and government manuals

Why do I do it? I am tired of sleazy CD-ROM sellers, who take publicly available information, slap “watermarks” and other junk on it, and sell it. Those masters of search engine manipulation make sure that their sites that sell free information, come up first in search engines. They did not create it... They did not even scan it... Why should they get your money? Why are not letting you give those free manuals to your friends?

I am setting this document FREE. This document was made by the US Government and is NOT protected by Copyright. Feel free to share, republish, sell and so on.

I am not asking you for donations, fees or handouts. If you can, please provide a link to [liberatedmanuals.com](http://liberatedmanuals.com), so that free manuals come up first in search engines:
