1. Purpose and Scope

a. This manual provides transportability guidance for movement of two M151 1/4-ton trucks and one M100 or M416 1/4-ton trailer in the CH-47 helicopter. The text prescribes procedures, materials, and manpower to prepare, load, tie down, and unload the two trucks and one trailer.

b. Users of this manual are encouraged to submit recommended changes or comments to improve the document. Comments should be keyed to the specific page, paragraph, and line of the text in which a change is recommended. Reasons should be provided for each comment to insure understanding and complete evaluation. Comments should be forwarded direct to the Commanding Officer, U.S. Army Transportation Engineering Agency, ATTN: TCTEATG, Fort Eustis, Va. 23604.

2. Applicability

These instructions apply when the vehicles are located and tied down as shown in the loading diagram and the tiedown data table. A transported unit can, with the consent of the

helicopter commander, add additional cargo within allowable load limits and restrictions prescribed by pertinent safety regulations (app).

Warning: Transport of two M151 1/4-ton trucks and one M100 or M416 1/4-ton trailer in the CH-47 helicopter is prohibited & the vehicles are not loaded and tied down in accordance with the instructions in this manual.

3. Responsibilities

Commanders of the transported and transporting units are responsible for the following:

- a. Transported Unit.
 - (1) Preparing unit equipment for air transport, with supervision and assistance as required from appropriate field support units.
 - (2) Loading, tying down, and unloading unit equipment transported aboard the helicopter, subject to approval by the helicopter commander or his authorized representative. Such approval is to insure that loading, tiedown, and

- unloading are accomplished as prescribed by this manual.
- (3) Effecting advance coordination with the transporting unit. This coordination will include a request for the tiedown devices required.
- (4) Providing manpower and the necessary shoring, padding, vehicles, and other materials required to accomplish vehicle preparation, loading, and unloading.
- (5) Providing guidance to the helicopter commander relative to safety and to any technical peculiarities of the vehicles which may affect their safe and reliable air transport.

b. Transporting unit.

- (1) Supplying a sufficient quantity of the type of tiedown devices requested.
- (2) Operating helicopter-associated equipment and monitoring loading, tiedown, and unloading procedures to insure conformance with this manual.
- (3) Inspecting the helicopter for serviceability appropriate to the mission and complying with pertinent aviation directives.

4. Load Description

The approximate dimensions and weight of the vehicles are as follows:

Item	Length (in.)	Width (in.)	Height (in.)	Weight (lb)
M151 Truck M100 Trailer	132 108	64 57	53 43	2,350* 1,090*
or M416 Trailer	109	62	43	1,800*

^{*} Weight includes 500 pounds of cargo secured in trailer.

5. Preparation and Loading

a. Materials. Eight small clevis assemblies (FSN 1670-360-0304).

b. Procedures.

- (1) Remove truck tops and store inside trucks; strap down the top supports.
- (2) Lower and lock windshield of each truck.

- Note. Insure that fuel tank contents of trucks do not exceed 3/4-tank capacity.
- (3) Attach small clevis assembly to each axle hub of M151 1/4-ton trucks.
- (4) Position guides in helicopter and at left front of truck to observe clearances and to signal drivers as necessary.
- (5) Back first truck into helicopter to tiedown position; place transmission in gear and set brakes.
- (6) Back truck with trailer into helicopter to tiedown position and keep coupled; place transmission in gear and set brakes on truck and trailer.
- (7) Tie down vehicles in accordance with figures 1, 2, 3 and the tiedown data table. Twenty CGU-1/B tiedown devices are required.

Note. Complete tiedown of aft truck after helicopter ramp is raised to the in-flight position.

(8) Four men can prepare, load, and tie down the vehicles in approximately 30 minutes.

Note. It is emphasized that the times given for the operations described in this manual are for guidance purposes only and may vary, dependent upon existing conditions.

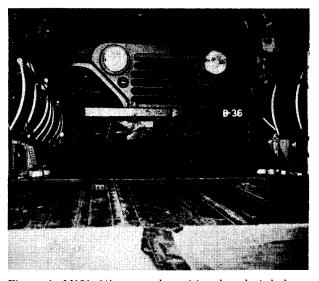

Figure 1. M151 1/4-ton truck positioned and tied down. (Tiedowns have not yet been afixed to front lifting shackles.) View looking forward in helicopter.

Was brought to you by me:

<u>Liberated Manuals -- free army and government manuals</u>

Why do I do it? I am tired of sleazy CD-ROM sellers, who take publicly available information, slap "watermarks" and other junk on it, and sell it. Those masters of search engine manipulation make sure that their sites that sell free information, come up first in search engines. They did not create it... They did not even scan it... Why should they get your money? Why are not letting you give those free manuals to your friends?

I am setting this document FREE. This document was made by the US Government and is NOT protected by Copyright. Feel free to share, republish, sell and so on.

I am not asking you for donations, fees or handouts. If you can, please provide a link to liberatedmanuals.com, so that free manuals come up first in search engines:
