TECHNICAL MANUAL

ORGANIZATIONAL AND DIRECT SUPPORT MAINTENANCE MANUAL (INCLUDING REPAIR PARTS AND SPECIAL TOOLS LIST)

FOR

BAYONET-KNIFE, M6, WITH BAYONET-KNIFE SCABBARD, M10 (1095-00-014-0369),

BAYONET-KNIFE, M7, WITH BAYONET-KNIFE SCABBARD, M10 (1095-00-017-9701) AND

M9 MULTIPURPOSE BAYONET SYSTEM (1005-01-227-1739)

DISTRIBUTION STATEMENT A: Approved for public release; distribution is unlimited.

HEADQUARTERS, DEPARTMENT OF THE ARMY

JANUARY 1993
WARNING

The bayonet blade is sharp. Handle with care.

When utilizing the M9 Multipurpose Bayonet System as a wire cutter, be sure to keep hands/fingers away from blade.

The M9 Multipurpose Bayonet System is not insulated against electric shock. Do not use it to cut live wires.

Keep tip of blade pointed away from body at all times.

To avoid injury while tightening tang, clamp blade in a padded jaw vice.

Dry cleaning solvent (A-A-711) is flammable and should not be used near an open flame or in a smoking area. Use only in well-ventilated areas. This solvent evaporates quickly and has a drying effect on the skin. When used without gloves, it may irritate, inflame or cause cracks in the skin.

When using solid film lubricant, be sure area is well ventilated.

To avoid injury to your eyes, be careful when removing and installing spring-loaded parts.

In the event of nuclear, biological or chemical (NBC) contamination, remove the sharpening stone of the M9 Multipurpose Bayonet System and discard prior to implementing decontamination procedures. Removal at any other time (except for replacement) is not authorized.

The scabbard should be securely tied down to the leg when parachute jumping.

FIRST AID

For further information on first aid, see FM 21-11.
ORGANIZATIONAL AND DIRECT SUPPORT MAINTENANCE MANUAL

REPORTING ERRORS AND RECOMMENDING IMPROVEMENTS

You can help improve this manual. If you find any mistakes or if you know of a way to improve the procedures, please let us know. Mail your letter, DA Form 2028 (Recommended Changes to Publications and Blank Forms), or DA Form 2028-2 located in the back of this manual direct to: Commander, US Army Armament, Munitions and Chemical Command, ATTN: AMSMC-MAS, Rock Island, IL 61299-6000. A reply will be furnished to you.

Distribution Statement A: Approved for public release; distribution is unlimited.

CHAPTER 1 INTRODUCTION

SECTION I. GENERAL INFORMATION

1-1. SCOPE

c. Purpose of Equipment. The M6 Bayonet-knife is used as a bayonet on the M14 Rifle series and as a hand weapon. The M7 Bayonet-knife is used as a bayonet on the M16 Rifle series, the M4 Carbine and as a hand weapon. The M9 Multipurpose Bayonet System is used as a bayonet on the M16 Rifle series, on the M4 Carbine, as a hand weapon, as a general field and utility knife as well as a wire cutter together with its scabbard, and as a saw.

1-2. MAINTENANCE FORMS, RECORDS AND REPORTS. Department of the Army forms and procedures used for equipment maintenance will be those prescribed by DA PAM 738-750, The Army Maintenance Management System (TAMMS).

1-3. DESTRUCTION OF ARMY MATERIEL TO PREVENT ENEMY USE. Refer to TM 750-244-7 for procedures concerning destruction of this materiel.

1-4. PREPARATION FOR STORAGE OR SHIPMENT. Refer to SB 740-95-1 for storage or shipment instructions.

1-5. REPORTING EQUIPMENT IMPROVEMENT RECOMMENDATIONS (EIR). If your M6 Bayonet-knife, M7 Bayonet-knife, M10 Bayonet-knife Scabbard or M9 Multipurpose Bayonet System needs improvement, let us know. Send us an EIR. You, the user, are the only one who can tell us what you don’t like about your equipment. Let us know why you don’t like the design. Put it on an SF 368 (Quality Deficiency Report). Mail it to us at: Commander, US Army Armament, Munitions and Chemical Command, ATTN: AMSMC-QAD, Rock Island, IL 61299-6000. We’ll send you a reply.

Section II. EQUIPMENT DESCRIPTION AND DATA

1-7. DIFFERENCES BETWEEN MODELS.
a. The M6 Bayonet-knife is used on the 7.62-mm M14 rifle series. The M7 Bayonet-knife is used on the 5.56-mm M16 rifle series and the M4 Carbine. The two models cannot be interchanged. The M9 Multipurpose Bayonet System is used on the M16 rifle series and the M4 Carbine. The M9 cannot be interchanged with the M6. The M9 is a replacement for some M7 Bayonet-knives.

b. The predominant physical difference between the M6 and M7 is the lock-release levers. On the M6 Bayonet-knife the lock-release lever is a single lever located on the bottom of the grip at the rear of the blade guard. On the M7 and M9 Bayonet-knives there are left- and right-hand lock-release levers at the rear of the bayonet. The M9 is longer and wider (blade is over 7 inches long and 1.4 inches wide) and heavier than either the M6 or M7.

c. Interchangeability of parts is limited to the grip screws on the M6 and M7. The lock-release levers and springs are common for the M7 and M9.

d. The M9 Multipurpose Bayonet System scabbard consists of four major parts: the scabbard body, wire cutter plate, attaching assembly lead bearing end, and attaching assembly scabbard end. The M10 Bayonet-knife Scabbard is a single piece.
CHAPTER 2 ORGANIZATIONAL MAINTENANCE INSTRUCTIONS

Section I. REPAIR PARTS, SPECIAL TOOLS; TEST, MEASUREMENT AND DIAGNOSTIC EQUIPMENT (TMDE); AND SUPPORT EQUIPMENT

2-1. COMMON TOOLS AND EQUIPMENT. For authorized common tools and equipment refer to the Modified Table of Organization and Equipment (MTOE) applicable to your unit.

2-2. SPECIAL TOOLS, TMDE AND SUPPORT EQUIPMENT. There are no special tools, TMDE or support equipment.

2-3. REPAIR PARTS. Repair parts are listed and illustrated in appendix C of this manual.

Section II. SERVICE UPON RECEIPT

2-4. GENERAL. This section contains instructions for services to be performed by the using organization upon the receipt of a new M6 Bayonet-knife with scabbard, M7 Bayonet-knife with scabbard or M9 Multipurpose Bayonet System.

NOTE

a. Where the word "lubricant" is cited in this TM, interpret to mean Cleaner Lubricant and Preservative (CLP) (app D, item 3), Lubricating Oil, Weapons Semi-fluid (LSA) (app D, item 10), or Lubricating Oil Weapons (LAW) (app D, item 9) can be utilized as applicable. The following constraints must be adhered to:

b. Under all but the coldest arctic conditions, LSA or CLP are the lubricants to use on the bayonet/scabbard. Either can be used at -10°F and above. However, do not use both on the same bayonet/scabbard at the same time.

c. LAW is the lubricant to use during cold arctic conditions, +10°F and below.

d. Any of the lubricants can be used from -10°F to +10°F.

e. Do not mix lubricants on the same bayonet/scabbard. The bayonet/scabbard must be thoroughly cleaned during change from one lubricant to another. Dry Cleaning Solvent (SD) (app D, item 5) is recommended for cleaning the bayonet during change from one lubricant to another. Do not use SD on the scabbard or the handle.
2-5. SERVICE UPON RECEIPT OF MATERIEL.

WARNING

The blade of the bayonet is extremely sharp. Handle with care.

2-6. CHECKING UNPACKED EQUIPMENT.

a. Inspect the equipment for damage incurred during shipment. If the equipment has been damaged, report the damage on SF Form 364, Report of Discrepancy (ROD).

b. Check the equipment against the packing slip to see if the shipment is complete. Report all discrepancies in accordance with the instructions of DA PAM 738-750.

c. Check to see whether the equipment has been modified.
Section III. PREVENTIVE MAINTENANCE CHECKS AND SERVICES (PMCS)

2-7. GENERAL.

a. To ensure maximum operational readiness, it is necessary that the M6 Bayonet-knife, M7 Bayonet-knife, M10 Bayonet-knife Scabbard and M9 Multipurpose Bayonet System be systematically inspected at regular intervals so defects may be discovered and corrected before they result in serious damage or failure.

b. During periods of inactivity, perform PMCS quarterly unless inspection reveals more frequent servicing is necessary. An inactive bayonet is one which has been stored in an arms room for a period of 90 days without use. The bayonet may or may not have been assigned to an individual. Normal cleaning (PMCS) of an inactive bayonet will be performed every 90 days. Should the unit armorer detect corrosion on a bayonet/scabbard prior to the end of the 90-day period, the PMCS shall be performed immediately.

2-8. PREVENTIVE MAINTENANCE CHECKS AND SERVICES. Table 2-1. lists those preventive maintenance checks and services (PMCS) to be performed at their designated intervals.

a. Column 1, Item No. The first column contains the item number which shall be used as a source of item numbers for the TM Number Column on DA Form 2404, Equipment Inspection and Maintenance Worksheet, in recording results of PMCS. Checks and services are numbered in disassembly sequence.

b. Column 2, item to be inspected. The second column lists the item to be inspected.

c. Column 3, Procedures. The third column contains all the information required to accomplish the checks and services.

d. Column 4, Not Fully Mission Capable If. This column contains a brief statement of the condition (e.g., malfunction, shortcoming (SH) or deficiency (D)) that would cause the covered equipment to be less than fully ready to perform its assigned mission.

NOTE

For the purpose of this technical manual, the following definitions are supplied. These definitions are not intended to apply to any other document.

Shortcoming (SH): A fault that requires maintenance or supply action on a piece of equipment, but does not render equipment Not Mission Capable.

Deficiency (D): A fault or problem that causes equipment to malfunction. Faults that make the equipment Not Mission Capable are deficiencies.

A deficiency deadlines the weapon.
2-8. PREVENTIVE MAINTENANCE CHECKS AND SERVICES (Cont).

**WARNING**

The bayonet blade is sharp. Handle it with care and discretion.

**NOTE**

For use of lubricant refer to paragraph 2-4.

Repair as authorized. If repair not authorized, evacuate to D. S. Maintenance.

Section IV. MAINTENANCE INSTRUCTIONS

### 2-9.A. M6 BAYONET-KNIFE AND M7 BAYONET-KNIFE - MAINTENANCE INSTRUCTIONS.

**THIS TASK COVERS:**

- a. Disassembly
- b. Inspection/repair
- c. Clean/Lubricate
- d. Reassembly

**INITIAL SETUP**

**Tools and Special Tools**

- Small arms repairman tool kit [app B]  
- References: Appendix B, Appendix C, Appendix D

**Materials/Parts**

- Abrasive cloth (item 4, [app D])
- CLP (item 3, [app D])
- Dry cleaning solvent (item 5, [app D])
- LAW (item 9, [app D])
- LSA (item 10, [app D])
- Rubber gloves (item 7, [app B])
- Solid film lubricant (item 8, [app D])
- Wash pan (item 11, [app D])
- Wiping rag (item 12, [app D])

**NOTE**

The following procedures apply to both tile M8 and M7 Bayonet-knives, except as noted.
2-9.A. M6 BAYONET-KNIFE AND M7 BAYONET-KNIFE--MAINTENANCE INSTRUCTIONS.

WARNING

The bayonet blade is sharp. Handle with care. Keep tip of blade pointed away from body at all times.

DISASSEMBLY

1. Remove two grip screws (1) from blade assembly (2).

   NOTE
   On the M7 Bayonet-knife there are two lockwashers (3) to remove after the two grip screws.

2. Remove LH grip (4) and RH grip (5).

3. For M6 bayonet only, remove spring pin (1) from lock-release lever (2) and blade assembly (3).

DISASSEMBLY (Cont)

WARNING

To avoid injury to your eyes, be careful when removing and installing spring-loaded parts.

4. For M6 bayonet only, remove lock-release lever (2) and compression helical spring (4).

INSPECTION/REPAIR

1. Inspect grip screws (1) for stripped or damaged threads. Check grip screw head for burrs, remove if present. Replace if necessary.

2. Inspect lockwashers (2) for damage (i.e., broken, has taken a set) on the M7 Bayonet-knife. Replace if necessary.

3. Inspect LH grip (3) and RH grip (4) for cracks and stripped threads. Hairline cracks are acceptable. Cracks up to 1/4 in. (0.64 cm) in length are acceptable. If cracks are beyond 1/4 in. (0.64 cm), replace. Chips up to 1/8 in. (0.32 cm) are acceptable; beyond 1/8 in. (0.32 cm), replace the grip.

4. Inspect blade assembly (5) for cracks, nicks, or blunted points. Bayonets with cracked blades must be replaced. Blunted points and small nicks may be repaired by stoning. If the blade assembly has deep nicks requiring grinding (nicks that can't be removed by stoning), evacuate the bayonet to D.S. Maintenance. Nicks up to 3/16-inch (0.48 cm) can be removed by grinding.
2-9.A. M6 BAYONET-KNIFE AND M7 BAYONET-KNIFE--MAINTENANCE INSTRUCTIONS (Cont).

INSPECTION/REPAIR (Cont)

**NOTE**
Length of the M6 and M7 blade measured from guard must not be less than 6-1/8 in. (15.56 cm) after repointing.

5. Inspect/check guard area (6) of blade assembly and plate area (7) of blade assembly for looseness. If loose, evacuate bayonet to direct support maintenance.

6. Inspect for worn or shiny areas on blade assembly, re-establish finish as follows step 11.

7. If point is broken, evacuate to D. S. Maintenance.

8. For M6 bayonet only, inspect lock-release lever (1) for bends and wear. Lock-release lever may be repaired by straightening.

9. Inspect compression helical spring (2) for kinks, set, and breaks. If any of these situations are found, replace.
2-9.A. M6 BAYONET-KNIFE AND M7 BAYONET-KNIFE--MAINTENANCE INSTRUCTIONS (Cont).

INSPECTION/REPAIR (Cont)

10. Inspect spring pin (3) for burrs and wear. If worn or burred spring pin interferes with proper use, replace.

WARNING

Dry cleaning solvent (A-A-711) is flammable and should not be used near an open flame or in a smoking area. Use only in well-ventilated areas. This solvent evaporates quickly and has a drying effect on the skin. When used without gloves, it may irritate, inflame or cause cracks in the skin.

11. Re-establish finish as required.

   a. Remove all lubricant from surfaces to be treated with dry cleaning solvent (item 5, **app D**). Wear rubber gloves (item 7, **app D**), and use wash pan (item 11, **app D**) and brush (item 2, **app D**) to apply dry cleaning solvent.

   CAUTION

   Do not use wire brush to roughen surface.

   b. Roughen surface using abrasive cloth (item 4, **app D**).

   c. Be sure surface to be treated is thoroughly cleaned and dried prior to application of solid film lubricant.

   WARNING

   When using solid film lubricant, be sure area is well ventilated.

   NOTE

   If solid film lubricant comes in contact with the functional surfaces of the lock-release lever, remove lubricant immediately by washing with dry cleaning solvent (item 5, **app D**).

   d. Apply solid film lubricant (item 8, **app D**) to shiny surfaces. Allow to dry 16 to 24 hours before handling.

12. Repair is by replacement of authorized parts **app C** as required.

CLEAN/LUBRICATE

NOTE

For use of lubricant, refer to paragraph 2-4.

Wipe bayonets with wiping rag (item 12, **app D**) and apply a light coat of lubricant.
2-9.A. M6 BAYONET-KNIFE AND M7 BAYONET-KNIFE--MAINTENANCE INSTRUCTIONS (Cont).

REASSEMBLY

1. For M6 bayonet only, if required, install compression helical spring (1) and lock-release lever (2) on blade assembly (3).

2. Drive in spring pin (4).

3. Position LH grip (1) and RH grip (2) on blade assembly (3).

NOTE

On the M7 Bayonet-knife there are two lockwashers (5) to install before the two grip screws.

4. Install two grip screws (4) as shown above.

2-16
2-9.B. M7 BLADE ASSEMBLY—MAINTENANCE INSTRUCTIONS.

THIS TASK COVERS:

a. Disassembly  
b. Inspection/repair  
c. Clean/lubricate  
d. Reassembly

INITIAL SETUP

Tools and Special Tools
- Small arms repairman tool kit (app B)
- References
  - Appendix B
  - Appendix C
  - Appendix D

Materials/Parts
- Brush (item 2, app D)
- CLP (item 3, app D)
- LSA (item 10, app D)
- Solid Film Lubricant (item 8, app D)
- Wiping rag (item 12, app D)

The lock-release levers and compression helical spring are common to the M7 and M9 bayonet-knives.

WARNING

Keep tip of blade assembly pointed away from body at all times.

To avoid injury to your eyes, be careful when removing and installing spring-loaded parts.

NOTE

Disassemble only if required for repair or cleaning.

DISASSEMBLY

1. If a line is not present, scribe a line (1) on RH lock-release lever (2) and plate (3) before disassembly to assist in identification when reassembling.
2-9.B. M7 BLADE ASSEMBLY-MAINTENANCE INSTRUCTIONS (Cont).

DISASSEMBLY (Cont)

2. Remove spring pin (4), LH lock-release lever (5), and compression helical spring (6) from bayonet-knife (7).

3. Remove spring pin (8) and RH lock-release lever (2).

INSPECTION/REPAIR

1. Inspect lock-release levers (1) for wear and bends. If positive retention is questionable, replace the lock-release levers.

2. Inspect compression helical spring (2) for kinks, sets, and breaks. Replace if damaged.

3. Inspect spring pins (3) for burrs and wear. Replace if worn or damaged.

4. Inspect plate area (4) of blade for looseness. If loose, evacuate to D.S. Maintenance.

5. Inspect guard (5) and link area of blade for looseness. If loose, evacuate to D.S. Maintenance.
2-9.B. M7 BLADE ASSEMBLY—MAINTENANCE INSTRUCTIONS (Cont).

INSPECTION/REPAIR (Cont)

6. Inspect for worn or shiny areas on blade assembly (6), re-establish finish as follows.

WARNING

Dry cleaning solvent (A-A-711) is flammable and should not be used near an open flame or in a smoking area. Use only in well-ventilated areas.

This solvent evaporates quickly and has a drying effect on the skin. When used without gloves it may irritate, inflame or cause cracks in the skin.

a. Remove all lubricant from surfaces to be treated with dry cleaning solvent (item 5, app D). Wear rubber gloves (item 7, app D) and use a wash pan (item 11, app D) and brush (item 2, app D) to apply dry cleaning solvent.

CAUTION

Do not use wire brush to roughen surface.

b. Roughen surface using abrasive cloth (item 4, app D).

c. Be sure surface to be treated is thoroughly cleaned and dried prior to application of solid film lubricant.

WARNING

When using solid film lubricant, be sure area is well ventilated.

NOTE

If solid film lubricant comes in contact with the functional surfaces of the lock-release lever, remove lubricant immediately by washing with dry cleaning solvent (item 5, app D).

d. Apply solid film lubricant (item 8, app D) to shiny surfaces. Allow to dry 16 to 24 hours before handling.

7. Repair is by replacement of authorized parts (app C) as required.

CLEAN/LUBRICATE

NOTE

For use of lubricant refer to paragraph 2-4.

Wipe all parts with wiping rag (item 12, app D) and apply a light coat of lubricant.
2-9.B. M7 BLADE ASSEMBLY--MAINTENANCE INSTRUCTIONS (Cont).

REASSEMBLY

NOTE

Proper positioning of lock-release levers is required for bayonet to mount on rifle. To properly position lock-release levers, flat end (1) that grasps rifle faces forward while scribe (2) on right lock-release lever faces right and outward. If unscribed, both flat ends (1) that grasp the rifle face forward. Newer lock-release levers have an indentation (3) on the finger grip (the serrated end) which face rearward when properly positioned.

1. Position RH lock-release lever (1) on bayonet-knife (2) and install spring pin (3).

2. Install compression helical spring (4), LH lock-release lever (5) and spring pin (6).
2-10. M10 BAYONET-KNIFE SCABBARD--MAINTENANCE INSTRUCTIONS.

THIS TASK COVERS:

Inspection/repair

INITIAL SETUP

Materials/Parts
- Abrasive cloth (item 4, app D)
- CLP (item 3, app D)
- Dry cleaning solvent (item 5, app D)
- LAW (item 9, app D)
- LSA (item 10, app D)
- Olive drab enamel (item 6, app D)
- Rubber gloves (item 7, app D)
- Solid film lubricant (item 8, app D)
- Wash pan (item 11, app D)
- Wiping rag (item 12, app D)

References
- Appendix C
- Appendix D

INSPECTION/REPAIR

1. Untie and remove scabbard restraining lace (1) from body (2).

2. Inspect scabbard restraining lace (1) for damage such as cuts or tears. Replace if unserviceable.

3. Inspect body (2) for chipped, deeply scratched, or heavily marred surfaces. Smooth using abrasive cloth (item 4, app D). Touch-up if needed with olive drab enamel (item 6, app D). Cracks 1/2 inch or less are not cause for repair. Cracks over 1/2 inch, replace the scabbard.

4. Inspect snaps (3) for proper functioning. Replace scabbard if defective.
5. Inspect metal parts (4) for worn or shiny areas. Worn or shiny areas will be repaired as follows:

**WARNING**

Dry cleaning solvent (A-A-711) is flammable and should not be used near an open flame or in a smoking area. Use only in well-ventilated areas. This solvent evaporates quickly and has a drying effect on the skin. When used without gloves it may irritate, inflame or cause cracks in the skin.

a. Remove all lubricant from surfaces to be treated with dry cleaning solvent (item 5, app D). Wear rubber gloves (item 7, app D) and use a wash pan (item 11, app D) and brush (item 2, app D) to apply dry cleaning solvent.

**CAUTION**

Do not use wire brush to roughen surface.

b. Roughen surface using abrasive cloth (item 4, app D).

c. Be sure surface to be treated is thoroughly cleaned and dried prior to application of solid film lubricant.

**WARNING**

When using solid film lubricant, be sure area is well-ventilated.

d. Apply solid film lubricant (item 8, app D) to shiny or worn surface. Allow to dry 16 to 24 hours before handling.

6. Repair is by replacement of authorized parts (app C) as required.

**NOTE**

For use of lubricant, refer to paragraph 2-4.

7. Wipe body with wiping rag (item 12, app D) and apply a light coat of lubricant.

8. Secure scabbard restraining lace (1) on body (2).
2-11.A. M9 MULTIPURPOSE BAYONET SYSTEM--MAINTENANCE INSTRUCTIONS.

BAYONET-KNIFE

THIS TASK COVERS:

a. Disassembly  
b. Inspection/repair  
c. Clean/lubricate  
d. Reassembly

INITIAL SETUP

Tools and Special Tools

Small arms repairman tool kit app B  

References

Appendix B

Materials/Parts

Abrasive cloth (item 4, app D)  
CLP (item 3, app D)  
Dry cleaning solvent (item 5, app D)  
LAW (item 9, app D)  
LSA (item 10, app D)  
Rubber gloves (item 7, app D)  
Solid film lubricant (item 8, app D)  
Wash pan (item 11, app D)  
Wiping rag (item 12, app D)

WARNING

The bayonet blades are sharp. Handle with care.

Keep tip of blade pointed away from body at all times.

DISASSEMBLY

1. Unscrew and remove cap screw (1).
2. Remove latch assembly (2).
3. Remove handle (3) from blade assembly (4).
1. Inspect cap screw (1) for stripped threads or damage. Replace if necessary.

2. Inspect the latch assembly (2) as follows:

   a. Inspect spring of the right hand and left hand lock-release levers (3) for proper functioning by depressing the right and left lock-release levers. Replace spring if necessary. (Refer to 2-11.B)

   b. Inspect spring pins (4) for damage or looseness. If damaged or loose, replace. (Refer to 2-11.B)

   c. Inspect for rust/corrosion. Clean and lubricate. If unable to remove rust/corrosion, replace component. (Refer to 2-11.B)
2-11.A. M9 MULTIPURPOSE BAYONET SYSTEM--MAINTENANCE INSTRUCTIONS (Cont).

BAYONET-KNIFE (Cont)

INSPECTION/REPAIR (Cont)

3. Inspect handle (5) for cracks or chips/nicks.
   a. Cracks up to 1/2 inch in length are acceptable. Replace if cracks are more than 1/2 inch in length.
   b. Chips/nicks up to 1/4 inch in diameter are acceptable. Replace if chips/nicks are more than 1/4 inch in diameter.
   c. Inspect front of handle for damage to alignment slots. If damage allows rotation of handle when installed, replace.
   d. Inspect rear of handle alignment holes. If damage allows latch assembly to rotate from correct alignment with blade, replace.

   NOTE

   Length of blade measured from handguard must not be less than 6 3/4 inches after repointing.

4. Inspect blade (6) for cracks, nicks or blunted point. Bayonets with cracked blades must be replaced. Blunted points and small nicks may be repaired by stoning. If the blade assembly has deep nicks requiring grinding (nicks that can't be removed by stoning), evacuate the bayonet to direct support maintenance.

5. Inspect handguard (7) for deformity. If deformed beyond use, replace bayonet.

6. Inspect saw teeth (8) for broken or dulled teeth. If 1/4 of the saw teeth are broken or worn, replace bayonet.

7. Re-establish finish as follows:

   WARNING

   Dry cleaning solvent (A-A-711) is flammable and should not be used near an open flame or in a smoking area. Use only in well-ventilated areas. This solvent evaporates quickly and has a drying effect on the skin. When used without gloves, it may irritate, inflame or cause cracks in the skin.

   a. Remove all lubricant from surfaces to be treated with dry cleaning solvent (item 5, app D). Wear rubber gloves (item 7, app D) and use wash pan (item 11, app D) and brush (item 2, app D) to apply dry cleaning solvent.

   CAUTION

   Do not use wire brush to roughen surface.

   b. Roughen surface using abrasive cloth (item 4, app D).
c. Be sure surface to be treated is thoroughly cleaned and dried prior to application of solid film lubricant.

WARNING

When using solid film lubricant, be sure area is well ventilated.

NOTE

If solid film lubricant comes in contact with the functional surfaces of the lock-release lever, remove lubricant immediately by washing with dry cleaning solvent (item 5, app D).

d. Apply solid film lubricant (item 8, app D) to shiny surfaces. Allow to dry 16 to 24 hours before handling.

WARNING

To avoid injury while tightening tang, clamp blade in a padded jaw vice.

CAUTION

Blade is brittle. Do not over tighten or apply sideways pressure that may break blade.

NOTE

Use hand pressure only when inspecting tang for looseness. Use no tools.
2-11.A. M9 MULTIPURPOSE BAYONET SYSTEM--MAINTENANCE INSTRUCTIONS (Cont).

BAYONET-KNIFE (Cont)

INSPECTION/REPAIR (Cont)

8. Inspect tang (1). If loose, tighten securely.

9. Repair is by replacement of authorized parts [app C] as required.

CLEAN/LUBRICATE

NOTE

For use of lubricant, refer to paragraph 2-4.

Wipe bayonet with wiping rag (item 12, [app D]) and apply a light coat of CLP (item 3, [app D]), LSA (item 10, [app D]) or LAW (item 9, [app D]).

REASSEMBLY

1. Install handle (1) on bayonet assembly (2) with small holes (3) for latch assembly (4) away from large hole (5) in hand guard (6).

2. Install latch assembly (4) with locking lug (7) lined with large hole in hand guard (6).

3. Install and tighten cap screw (8) until tight.
2-11.A. M9 MULTIPURPOSE BAYONET SYSTEM--MAINTENANCE INSTRUCTIONS (Cont).

BAYONET-KNIFE (Cont)

REASSEMBLY (Cont)

4. Further inspect latch assembly by insuring that the bayonet-knife assembly is retained securely on the bayonet lug of the rifle. The bayonet should mount and dismount without interference. If latch assembly doesn’t function properly, repair the latch assembly. Refer to paragraph 2-11B of this manual.

2-11.B. M9 MULTIPURPOSE BAYONET SYSTEM--MAINTENANCE INSTRUCTIONS (Cont).

LATCH ASSEMBLY

This task covers:

a. Disassembly  
b. Inspection/repair  
c. Clean/lubricate  
d. Reassembly

INITIAL SETUP

Tools and Special tools

- Small arms repairman tool kit (app B)

Materials/parts

Equipment Conditions

- Latch assembly is removed from M9 Bayonet-Knife

DISASSEMBLY
2-11.B. M9 MULTIPURPOSE BAYONET SYSTEM--MAINTENANCE INSTRUCTIONS (Cont).

LATCH ASSEMBLY (Cont)

DISASSEMBLY (Cont)

WARNING

To avoid injury to your eyes, be careful when removing and installing spring-loaded parts.

1. Remove spring pin (1), LH lock-release lever (2), and compression helical spring (3) from latch plate (4).

2. Remove spring pin (5) and RH lock-release lever (6).

INSPECTION/REPAIR

1. Inspect lock-release levers (1) for wear, bending and corrosion. If positive retention is questionable, replace the lock-release levers.

2. Inspect compression helical spring (2) for kinks, sets, breaks and corrosion.

3. Inspect spring pins (3) for burrs, wear and corrosion.

4. Inspect latch plate (4) for damage and corrosion.

5. For latch plate (5), reestablish finish as follows:
6. If corrosion is found, clean and lubricate. If corrosion cannot be removed, replace component.

   **WARNING**

   Dry cleaning solvent (A-A-711) is flammable and should not be used near an open flame or in a smoking area. Use only in well-ventilated areas. This solvent evaporates quickly and has a drying effect on the skin. When used without gloves, it may irritate, inflame or cause cracks in the skin.

   a. Using dry cleaning solvent (item 5, [app D]) remove all lubricant from surfaces to be treated. Wear rubber gloves (item 7, [app D]) to apply dry cleaning solvent.

   **CAUTION**

   Do not use wire brush to roughen surface.

   b. Roughen surface using abrasive cloth (item 4, [app D]).

   c. Be sure surface to be treated is thoroughly cleaned and dried prior to application of solid film lubricant.

   **WARNING**

   When using solid film lubricant, be sure area is well ventilated.

   Dry cleaning solvent (A-A-711) is flammable and should not be used near an open flame or in a smoking area. Use only in well-ventilated areas. This solvent evaporates quickly and has a drying effect on the skin. When used without gloves, it may irritate, inflame or cause cracks in the skin.

   **NOTE**

   If solid film lubricant comes in contact with the functional surfaces of the lock-release lever, remove lubricant immediately by washing with dry cleaning solvent (item 5, [app D]).

   d. Apply solid film lubricant (item 8, [app D]) to shiny surfaces. Allow to dry 16 to 24 hours before handling.

7. Repair is by replacement of authorized parts ([app C]) as required.
LATCH ASSEMBLY (Cont)

CLEAN/LUBRICATE

NOTE

For use of lubricant, refer to paragraph 2-4.

Wipe all parts with wiping rag (item 12, app B) and apply a light coat of lubricant.

REASSEMBLY

NOTE

Before installing, identify RH and LH lock-release levers. The indentation in each ear must face toward the soldier and be opposite the bayonet mounting slot. The RH lock-release lever is to the right when the bayonet-knife is pointing away and the saw teeth are on top of the blade.

NOTE

Spring pins (1) must be installed flush or just below the back surface of the latch plate (2). The back of the latch plate is identified by an indentation (3).

1. Position RH lock-release lever (1) on latch plate (2) and install spring pin (3).

2. Install compression helical spring (4), LH lock-release lever (5), and spring pin (6).
2-11.C. M9 MULTIPURPOSE BAYONET SYSTEM--MAINTENANCE INSTRUCTIONS (Cont).

SCABBARD

This task covers:

   a. Disassembly
   b. Inspection/repair
   c. Clean/lubricate
   d. Reassembly

   Solid film lubricant (item 8, app D)
   Wash pan (item 11, app D)
   Wiping rag (item 12, app D)

REFERENCES

   Appendix B
   Appendix C
   Appendix D

Equipment Condition

   Bayonet-knife is removed from scabbard

DISASSEMBLY

1. Remove attaching assembly load bearing end (1).

2. Separate attaching assembly scabbard end (2) by removing two socket head screws (3).
2-11.C. M9 MULTIPURPOSE BAYONET SYSTEM—MAINTENANCE INSTRUCTIONS (Cont).

SCABBARD (Cont)

INSPECTION/REPAIR

WARNING

When using solid film lubricant, be sure area is well ventilated.

NOTE

Cutter plate requires replacement only if it is cracked, broken, or won’t cut wire.

Replacing screw driver tip is only necessary if it won’t remove bayonet cap screw.

1. Inspect cutter assembly (1) for damage, shiny surface or corrosion. If damaged, evacuate to DS maintenance. If shiny surface, use solid film lubricant (item 8, app D) according to Paragraph 2-9.A. If corrosion, clean and lubricate with solid film lubricant.
2-11.C. M9 MULTIPURPOSE BAYONET SYSTEM--MAINTENANCE INSTRUCTIONS (Cont).

SCABBARD (Cont)

INSPECTION/REPAIR (Cont)

2. Inspect cutter assembly (1) by attaching blade (2) and checking stud (3) for proper functioning. If cutter assembly is worn and will not function properly, evacuate to DS Maintenance.

3. Inspect cutter assembly (1) for breaks and cracks. If cutter assembly is broken or cracked, evacuate to DS Maintenance.

4. Inspect socket head screw (4) for looseness and/or damage.
   a. If loose, tighten with 1/8 inch socket head screw key.
   b. If damaged, replace.

5. Inspect scabbard body assembly (5) for proper functioning. Replace if it will no longer retain the bayonet-knife.

6. Inspect attaching assembly scabbard end (6) for proper functioning.
   a. Inspect webbing portion (7). Cuts up to 1/4 inch are acceptable. For cuts of more than 1/4 inch, replace attaching assembly scabbard end.
   b. Inspect snap (8) and socket (9) for proper functioning. If defective, replace attaching assembly scabbard end.
   c. Inspect plastic portion (10). If broken or defective and will not function correctly, replace attaching assembly scabbard end.
   d. Inspect socket head screws (11), if defective or damaged, replace.

7. Inspect attaching assembly load bearing end (12) by checking for proper functioning.
   a. Inspect webbing portion (13). Cuts up to 1/4 inch are acceptable. For cuts of more than 1/4 inch, replace attaching assembly load bearing end.
   b. Inspect plastic portion (14). If broken or defective and will not function correctly, replace attaching assembly load bearing end.
   c. Inspect metal portion (15). If metal portion is disfigured and interferes with proper functioning, replace attaching assembly load bearing end.
   d. Inspect for loose or missing rivets (16). Tighten loose rivets by peening. If a rivet is missing or cannot be tightened, replace attaching assembly load bearing end.
CLEAN/LUBRICATE

NOTE

Refer to paragraph 2-4 for deciding which lubricant to use.

Wipe metal parts of scabbard with wiping rag (item 12, app 1) and apply a light coat of lubricant.

REASSEMBLY

CAUTION

Two different lengths of socket head screws are used on the scabbard. When replacing be sure to replace with the correct length socket head screw. Use the long screws to attach the cutter plate and the short screws to attach the attaching assembly, scabbard end.

1. Position attaching assembly scabbard end (1) on scabbard body assembly (2) so that fastener will close around M9 Bayonet-knife. Install two socket head screws (3).

2. Install attaching assembly load bearing end (1) with plastic portion (2) towards M9 scabbard (3) as shown.
3. Insert bayonet (1) into the scabbard (2).

4. Fasten snap (3) of restraining strap (4).
2-11.D. M9 MULTIPURPOSE BAYONET SYSTEM--MAINTENANCE INSTRUCTIONS (Cont).

SCABBARD BODY ASSEMBLY

This task covers:

a. Inspection  
b. Disassembly  
c. Repair  
d. Clean/lubricate  
e. Reassembly

INITIAL SETUP

Tools and Special Tools

Small arms repairman tool kit *(app B)*

References

Appendix B
Appendix C
Appendix D

Materials/Parts

- Brush (item 2, *app D* )
- CLP (item 3, *app D* )
- Dry cleaning solvent (item 5, *app D* )
- LSA (item 10, *app D* )
- Rubber gloves (item 7, *app D* )
- Silicone adhesive (item 13, *app D* )
- Wash pan (item 11, *app D* )
- Wiping rag (item 12, *app D* )

Equipment Condition

bayonet-knife is removed from scabbard, scabbard body assembly is separately from attaching assembly scabbard end and attaching assembly load bearing end.

INSPECTION

1. Visually inspect scabbard body assembly (1) for cracks. If cracked more than 1/2 inch, replace scabbard body assembly.

2. Inspect two socket head screws (2) for damage. If defective or damaged, replace.

3. Inspect cutter assembly (3) for breaks and cracks. If cutter assembly is broken or cracked, evacuate to D.S. Maintenance.
4. Inspect sharpening stone (1) for chips or damage. If damaged to the point that the stone cannot be utilized, replace the stone.

DISASSEMBLY

NOTE

Disassemble only if inspection indicates repair or cleaning is required.

1. Remove two socket head screws (1) from scabbard body assembly (2).
2. Remove cutter assembly (3) from scabbard body assembly (2).
WARNING

Dry cleaning solvent (A-A-711) is flammable and should not be used near an open flame or in a smoking area. Use only in well-ventilated areas. This solvent evaporates quickly and has a drying effect on the skin. When used without gloves, it may irritate, inflame or cause cracks in the skin.

NOTE

Use of dry cleaning solvent is authorized on the scabbard body assembly only to remove old silicone adhesive.

1. If replacing the stone, chisel away remainder of sharpening stone (2) and adhesive. Take care not to damage the scabbard body (3).

2. Clean recess (1) for stone (2) with dry cleaning solvent (item 5, app D). Wear rubber gloves (item 7, app D) and use a wash pan (item 11, app D) and brush (item 2, app D) to apply dry cleaning solvent.

3. Allow recess (1) to dry before applying silicone adhesive (item 13, app D).

4. Apply silicone adhesive to recess (1) for stone (2).

5. Press replacement sharpening stone (2) in recess (1) and allow to dry.
CLEAN/LUBRICATE

1. Clean the scabbard body assembly with wiping rag (item 12, app D).

   **NOTE**
   Refer to paragraph 2-4 for deciding which lubricant to use.

   Do not apply lubricant until after sharpening stone has been replaced, if it was removed.

2. Wipe metal parts of scabbard body assembly with wiping rag (item 12, app D) and apply a light coat of lubricant.

REASSEMBLY

**CAUTION**

Two different lengths of socket head screws are used on the scabbard. When replacing be sure to replace with the correct length socket head screw. Use the long screws to attach the cutter plate and the short screws to attach the attaching assembly, scabbard end.

Attach cutter assembly (1) using two socket head screws (2) to scabbard body assembly (3).

2-40
CHAPTER 3 DIRECT SUPPORT MAINTENANCE INSTRUCTIONS

Section I MAINTENANCE PROCEDURES

3-1. M6 BAYONET-KNIFE - MAINTENANCE INSTRUCTIONS.

THIS TASK COVERS:

a. Inspection/repair

INITIAL SETUP

Tools and Special Tools
Small arms repairman tool kit (app B)
Small arms field maintenance tool kit (app B)

Materials/Parts
Brush (item 2, app D)
CLP (item 3, app D)
Dry cleaning solvent (item 5, app D)
LSA (item 10, app D)
Rubber gloves (item 7, app D)
Solid film lubricant (item 8, app D)
Wash pan (item 11, app D)
Wiping rag (item 12, app D)

INSPECTION/REPAIR

1. Inspect blade for nicks on the cutting edge. Nicks up to 3/16-in. (0.48 cm) can be removed by grinding. Ground areas shall be blended with adjacent surfaces. Blades with deeper nicks should be replaced.

2. Repair broken point on blade by grinding and/or stoning. After repointing, the length of the blade (measured from the front face of the guard to the tip of the blade) must be at least 6-1/8 in. (15.56 cm). If less than 6 1/8 inch, replace bayonet.

3. Check plate area (1) of blade assembly for looseness. If required, tighten by placing blade assembly in vise and stake or peen end of shank (2) over plate. Make sure that sufficient clearance remains to permit retention of the bayonet to the rifle.

Appendix B
Appendix C
paragraph 2-9.A Disassembly, Inspection/repair, Clean/lubricate, and Reassembly of M6 and M7 Bayonet-knives

Equipment Conditions

paragraph 2-9.A grips are removed from M6 Bayonet-knife
3-1. M6 BAYONET-KNIFE--MAINTENANCE INSTRUCTIONS (Cont).

INSPECTION/REPAIR (Cont)

4. Check track area (3) of blade assembly for play. Remove any existing play by peening the two rivets (4) holding the tracks.

5. Check guard area (5) of blade assembly for play. Remove play by setting both sides of the sleeve (6) with a center punch and hammer.
3-1. M6 BAYONET-KNIFE--MAINTENANCE INSTRUCTIONS (Cont).

INSPECTION/REPAIR (Cont)

6. Inspect for worn or shiny areas on blade assembly, re-establish finish as follows:

WARNING

Dry cleaning solvent (A-A-711) is flammable and should not be used near an open flame or in a smoking area. Use only in well-ventilated areas. This solvent evaporates quickly and has a drying effect on the skin. When used without gloves, it may irritate, inflame or cause cracks in the skin.

a. Remove all lubricant from surfaces to be treated with dry cleaning solvent (item 5, app D). Wear rubber gloves (item 7, app D) and use a wash pan (item 11, app D) and brush (item 2, app D) to apply dry cleaning solvent.

CAUTION

Do not use wire brush to roughen surface.

b. Roughen surface using abrasive cloth (item 4, app D)

c. Be sure surface to be treated is thoroughly cleaned and dried prior to application of solid film lubricant.

WARNING

When using solid film lubricant, be sure area is well ventilated.

d. Apply solid film lubricant (item 8, app D) to shiny surfaces. Allow to dry 16 to 24 hours before handling.

NOTE

If solid film lubricant comes in contact with the functional surfaces of the lock-release lever, remove lubricant immediately by washing with dry cleaning solvent (item 5, app D).
3–2. M7 BLADE ASSEMBLY—MAINTENANCE INSTRUCTIONS.

THIS TASK COVERS:

b. Inspection/repair

INITIAL SETUP

Tools and Special Tools
Small arms repairman tool set [app B]
Small arms field maintenance tool kit [app B]

Materials/Parts
Abrasive cloth (item 4, [app D])
Brush (item 2, [app D])
CLP (item 3, [app D])
Dry cleaning solvent (item 5, [app D])
LSA (item 10, [app D])
Rubber gloves (item 7, [app D])
Solid film lubricant (item 8, [app D])
Wash pan (item 11, [app D])
Wiping rag (item 12, [app D])

Appendix B
Appendix C
Appendix D
paragraph 2–9.A. Disassembly, Inspection/repair, Clean/
lubricate and Reassembly of M6 and M7 Bayonet-knives
paragraph 2–9.A. grips are removed from M7 Bayonet-knife

Equipment Conditions

INSPECTION/REPAIR

1. Check blade for nicks on the cutting edge. Nicks up to 3/16-in. (0.48 cm) can be removed by grinding. Ground areas shall be blended with adjacent surfaces. Blades with deeper nicks should be replaced.

2. Repair broken point on blade by grinding and/or stoning. After pointing, the length of the blade (measured from the front face of the guard to the tip of the blade) must be at least 6-1/8 in. (15.56 cm). If less than 6 1/8 inch, replace bayonet.

3. Inspect plate area (1) of blade for looseness. Tighten if necessary by placing blade in vise and stake or peen end of shank (2) over plate. Make sure that sufficient clearance remains to permit retention of the bayonet to the rifle.
3-2. M7 BLADE ASSEMBLY - MAINTENANCE INSTRUCTIONS. (Cont)

INSPECTION/REPAIR (Cont)

4. Inspect guard (3) and link area of blade for looseness. Tighten by swaging link (4) against the guard until the guard is firmly against the shoulders of the blade. Bright spots as a result of this operation are permissable.

5. Inspect for worn or shiny areas on blade assembly. re-establish finish as follows:

WARNING

Dry cleaning solvent (A-A-711) is flammable and should not be used near an open flame or in a smoking area. Use only in well-ventilated areas. This solvent evaporates quickly and has a drying effect on the skin. When used without gloves, it may irritate, inflame or cause cracks in the skin.

a. Remove all lubricant from surfaces to be treated with dry cleaning solvent (item 5, [app D]). Wear rubber gloves (item 7, [app D]) and use a wash pan (item 11, [app D]) and brush (item 2, [app D]) to apply dry cleaning solvent.

CAUTION

Do not use wire brush to roughen surface.

b. Roughen surface using abrasive cloth (item 4, [app D]).

c. Be sure surface to be treated is thoroughly cleaned and dried prior to application of solid film lubricant.
3-2. M7 BLADE ASSEMBLY—MAINTENANCE INSTRUCTIONS. (Cont)

INSPECTION/REPAIR (Cont)

**WARNING**

When using solid film lubricant, be sure area is well ventilated.

d. Apply solid film lubricant (item 8, app D) to shiny surfaces. Allow to dry 16 to 24 hours before handling.

**NOTE**

If solid film lubricant comes in contact with the functional surfaces of the lock-release lever, remove lubricant immediately by washing with dry cleaning solvent (item 5, app D).

3-3. M9 MULTIPURPOSE BAYONET SYSTEM—MAINTENANCE INSTRUCTIONS.

**BAYONET**

This task covers:

a. Grinding  
b. Lubrication

**INITIAL SETUP**

**Equipment Conditions**

| Blade requires grinding |

**GRINDING**

**CAUTION**

M9 blade is tempered, do not overheat when grinding.

1. Check blade for nicks on the cutting edge and/or the false edge. Nicks up to 3/16-inch (0.48 cm) can be removed by grinding. Ground areas shall be blended with adjacent surfaces. Blades with deeper nicks should be replaced.

2. Repair broken point on blade by grinding. After repointing, the length of the blade (measured from the front face of the guard to the tip of the blade) must not be less than 6 3/4 inches (17.15 cm).
3-3. M9 MULTIPURPOSE BAYONET SYSTEM--MAINTENANCE INSTRUCTIONS. (Cont)

BAYONET (Cont)

LUBRICATION

**NOTE**

For use of lubricant, refer to paragraph 2-4.

Wipe bayonet with wiping rag (item 12, app D) and apply a light coat of lubricant to metal parts.

3-4. M9 MULTIPURPOSE BAYONET SYSTEM--MAINTENANCE INSTRUCTIONS.

SCABBARD BODY ASSEMBLY

This task covers:

a. Inspection
b. Disassembly/repair
c. Clear/lubricate
d. Reassembly

INITIAL SETUP

Tools and Special Tools
Small arms repairman tool set (app B)
Small arms field maintenance tool kit (app B)

Materials/Parts
Abrasive Cloth (item 4, app D)
CLP (item 3, app D)
LSA (item 10, app D)
Solid film lubricant (item 8, app D)
Wiping rag (item 12, app D)

Equipment Conditions
Cutter assembly can be removed from scabbard body assembly as received without removing other parts

INSPECTION
3-4. M9 MULTIPURPOSE BAYONET SYSTEM--MAINTENANCE INSTRUCTIONS (Cont).

SCABBARD BODY ASSEMBLY (Cont)

INSPECTION (Cont)

NOTE

Cutter plate requires replacement only if it is cracked, broken, won’t cut wire, or screw driver tip is damaged and won’t remove bayonet cap screw.

Inspect cutter assembly (1) for nonfunctioning. If nonfunctioning, replace.

DISASSEMBLY/REPAIR

NOTE

Remove screws only to replace cutter assembly or screws.

1. Remove 2 socket head screws (1).

2. Separate cutter assembly (2) from scabbard body assembly (3).

3. Inspect screw threads and heads for damage. If damaged, replace.

4. Inspect for worn or shiny areas on cutter assembly, re-establish finish as follows:

WARNING

Dry cleaning solvent (A-A-711) is flammable and should not be used near an open flame or in a smoking area. Use only in well-ventilated areas. This solvent evaporates quickly and has a drying effect on the skin. When used without gloves, it may irritate, inflame or cause cracks in the skin.

a. Remove all lubricant from surfaces to be treated with dry cleaning solvent (item 5, app D). Wear rubber gloves (item 7, app D) and use a wash pan (item 11, app D) and brush (item 2, app D) to apply dry cleaning solvent.
3-4. M9 MULTIPURPOSE BAYONET SYSTEM--MAINTENANCE INSTRUCTIONS (Cont).

SCABBARD BODY ASSEMBLY (Cont)

DISASSEMBLY (Cont)

CAUTION

Do not use wire brush to roughen surface.

b. Roughen surface using abrasive cloth (item 4, app D).

c. Be sure surface to be treated is thoroughly cleaned and dried prior to application of solid film lubricant.

WARNING

When using solid film lubricant, be sure area is well ventilated.

d. Apply solid film lubricant (item 8, app D) to shiny surfaces. Allow to dry 16 to 24 hours before handling.

CLEAN/LUBRICATE

NOTE

For use of lubricant, refer to paragraph 2-4.

Wipe scabbard with wiping rag (item 12, app D) and apply a light coat of lubricant to metal parts.

REASSEMBLY

1. Install cutter assembly (1) on scabbard body assembly (2) as shown.

2. Install two socket head screws (3). Tighten two socket head screws (3).

APPENDIX B
MAINTENANCE ALLOCATION CHART

Section I. INTRODUCTION

B-1. GENERAL.

a. This section provides a general explanation of all maintenance and repair functions authorized at various maintenance categories.

b. The maintenance allocation chart (MAC) in section II designates overall authority and responsibility for the performance of maintenance functions on the identified end item or component. The application of the maintenance functions to the end item or component will be consistent with the capacities and capabilities of the designated maintenance categories.

c. Section III lists the tools and test equipment (both special tools and common tool sets) required for each maintenance function, as referenced from section II.

d. Section IV contains supplemental instructions and explanatory notes for a particular maintenance function.

B-2. MAINTENANCE FUNCTIONS.

Maintenance functions will be limited to and defined as follows, (except for ammunition MAC*).

a. Inspect. To determine the serviceability of an item by comparing its physical, mechanical, and/or electrical characteristics with established standards through examination (e.g., by sight, sound, or feel).

b. Test. To verify serviceability by measuring the mechanical, pneumatic, hydraulic, or electrical characteristics of an item and comparing those characteristics with prescribed standards.

c. Service. Operations required periodically to keep an item in proper operating condition, i.e., to clean (includes decontaminate, when required), to preserve, to drain, to paint, or to replenish fuel, lubricants, chemical fluids, or gases.

d. Adjust. To maintain or regulate, within prescribed limits, by bringing into proper or exact position, or by setting the operating characteristics to specified parameters.

e. Aline. To adjust specified variable elements of an item to bring about optimum or desired performance.

*Exception is authorized for ammunition MAC to permit the redesignation/redefinition of maintenance function headings to more adequately identify ammunition maintenance functions. The heading designations and definitions will be included in the appropriate technical manual for each category of ammunition.
B-2. MAINTENANCE FUNCTIONS. (cont)

f. Calibrate. To determine and cause corrections to be made or to be adjusted on instruments or test, measuring, and diagnostic equipments used in precision measurement. Consists of comparisons of two instruments, one of which is a certified standard of known accuracy, to detect and adjust any discrepancy in the accuracy of the instrument being compared.

g. Remove/Install. To remove and install the same item when required to perform service or other maintenance functions. Install may be the act of emplacing, seating or fixing into position a spare, repair part, or module (component or assembly) in a manner to allow the proper functioning of an equipment or system.

h. Replace. To remove an unserviceable item and install a serviceable counterpart in its place. "Replace" is authorized by the MAC and is shown as the 3d position code of the SMR code.

i. Repair. The application of maintenance services*, including fault location/trouble-shooting*, removal/installation, and disassembly/assembly* procedures, and maintenance actions* to identify troubles and restore serviceability to an item by correcting specific damage, fault, malfunction, or failure in a part, subassembly, module (component or assembly), end item, or system.

j. Overhaul. That maintenance effort (service/action) prescribed to restore an item to a completely serviceable/operational condition as required by maintenance standards in appropriate technical publications (i.e. DMWR). Overhaul is normally the highest degree of maintenance performed by the Army. Overhaul does not normally return an item to like new condition.

k. Rebuild. Consists of those services/actions necessary for the restoration of unserviceable equipment to a like new condition in accordance with original manufacturing standards. Rebuild is the highest degree of materiel maintenance applied to Army equipment. The rebuild operation includes the act of returning to zero those age measurements (hours/miles, etc.) considered in classifying Army equipment/components.

B-3. EXPLANATION OF COLUMNS IN THE MAC, SECTION II.

a. Column 1, Group Number. Column I lists functional group code numbers, the purpose of which is to identify maintenance significant components, assemblies, subassemblies, and modules with the next higher assembly. End item group number shall be “00”.

*Services--inspect, test, service, adjust, aline, calibrate, and/or replace.
*Fault locate/troubleshoot--The process of investigating and detecting the cause of equipment malfunctioning, the act of isolating a fault within a system or unit under test (UUT). *Disassemble/assemble--Encompasses the step-by-step taking apart (or breakdown) of a spare/functional group coded item to the level of its least component identified as maintenance significant (i.e., assigned an SMR code) for the category of maintenance under consideration. *Actions--welding, grinding, riveting, straightening, facing, remachining, and/or resurfacing.
b. Column 2, Component/Assembly. Column 2 contains the names of components, assemblies, subassemblies, and modules for which maintenance is authorized.

c. Column 3, Maintenance Function. Column 3 lists the functions to be performed on the item listed in column 2. (For detailed explanation of these functions, see paragraph B-2.)

d. Column 4, Maintenance Category. Column 4 specifies, by the listing of a work time figure in the appropriate subcolumn(s), the category of maintenance authorized to perform the function listed in column 3. This figure represents function at the indicated category of maintenance. If the number or complexity of the tasks within the listed maintenance function vary at different maintenance categories, appropriate work time figures will be shown for each category. The work time figure represents the average time required to restore an item (assembly, subassembly, component, module, end item, or system) to a serviceable condition under typical field operating conditions. This time includes preparation time (including any necessary disassembly/assembly time), trouble-shooting/fault location time, and quality assurance/quality control time in addition to the time required to perform the specific tasks identified for the maintenance functions authorized in the maintenance allocation chart. The symbol designations for the various maintenance categories are as follows.

C. .............................................. Operator or crew

O. .............................................. Organizational maintenance

F. .............................................. Direct support maintenance

H. .............................................. General support maintenance

L. .............................................. Specialized repair activity (SRA)*

D. .............................................. Depot maintenance

*This maintenance category is not included in section II, column (4) of the maintenance allocation chart. To identify functions to this category of maintenance, enter a work time figure in the H- column of section II, column (4), and use an associated reference code in the remarks column (6), Key the code to section IV, remarks, and explain the SRA complete repair application there. The explanatory remark(s) shall reference the specific repair parts and special tools list (RPSTL) TM which contains additional SRA criteria and the authorized spare/repair parts.
B-4. EXPLANATION OF COLUMNS IN TOOL AND TEST EQUIPMENT REQUIREMENTS, SECTION III.

a. Column 1, Reference Code. The tool and test equipment reference code correlates with a code used in the MAC, section II, Column 5.

b. Column 2, Maintenance Category. The lowest category of maintenance authorized to use the tool or test equipment.

c. Column 3, Nomenclature. Name or identification of the tool or test equipment.

d. Column 4, National Stock Number. The National stock number of the tool or test equipment.

e. Column 5, Tool Number. The manufacturer’s part number.

B-5. EXPLANATION OF COLUMNS IN REMARKS, SECTION IV.

a. Column 1, Reference Code. The code recorded in column 6, section II.

b. Column 2, Remarks. This column lists information pertinent to the maintenance function being performed as indicated in the MAC, section II.

APPENDIX C ORGANIZATIONAL AND DIRECT SUPPORT MAINTENANCE

REPAIR PARTS AND SPECIAL TOOLS LIST

Section I. INTRODUCTION

C-1. SCOPE.

This RPSTL lists and authorizes spares and repair parts, special tools; special test, measurement, and diagnostic equipment (TMDE), and other special support equipment required for performance of organizational and direct support maintenance of the M6 Bayonet-knife with M10 Bayonet-knife Scabbard, M7 Bayonet-knife with M10 Bayonet-knife Scabbard, and M9 Multipurpose Bayonet. System. It authorizes the requisition, issue, and disposition of spares, repair parts and special tools as indicated by the source, maintenance and recoverability (SMR) codes.

C-2. GENERAL.

In addition to Section I. Introduction, this repair parts and special tools list is divided into the following sections:

a. Section II. Repair Parts List, A list of spares and repair parts authorized by this RPSTL for use in the performance of maintenance. The list also includes parts which must be removed for replacement of the authorized parts. Parts lists are composed of functional groups in ascending alphanumeric sequence, with the parts in each group listed in ascending figure and item number sequence. Bulk materials are listed by item name in FIG BULK at the end of the section. Repair parts kits or sets are listed separately in their own functional group within section II. Repair parts for repairable special tools are also listed in this section.

b. Section III. Special Tools List. A list of special tools, special TMDE, and other special support equipment authorized by this RPSTL (as indicated by Basis of Issue (BOI) information in DESCRIPTION AND USABLE ON CODE (UOC) column) for the performance of maintenance.

c. Section IV. National Stock Number and Part Number Index. A list, in National item identification number (NIIN) sequence, of all National stock numbered items appearing in the listings, followed by a list in alphanumeric sequence of all part numbers appearing in the listing. National stock numbers and part numbers are cross-referenced to each illustration figure and item number appearance.

C-3. EXPLANATION OF COLUMNS (SECTIONS II AND III).

a. Item No. (Column (1)). Indicates the number used to identify items called out in the illustration.

b. SMR Code (Column (2)). The Source, Maintenance, and Recoverability (SMR) code is a 5-position code containing supply/requisitioning information, maintenance category authorization criteria, and disposition instruction, as shown in the following breakout:

</tbody>
</table>

*Complete Repair, Maintenance capacity, capability, and authority to perform all corrective maintenance tasks of the “Repair” function in a use/user environment in order to restore serviceability to a failed item.

**NOTE, Items coded PC are subject to deterioration.
AO-(Assembled by Org/AVUM Level) 
Items with these codes are not to be requested/requisitioned individually. The parts that make up the assembled item must be requisitioned or fabricated and assembled at the level of maintenance indicated by the source code. If the 3d position code of the SMR code authorizes you to replace the item, but the source code indicates the item is assembled at a higher level, order the item from the higher level of maintenance.

AF-(Assembled by Intro DS/AVIM Level) 

AH-(Assembled by Intro GS Category) 

AL-(Assembled by SRA) 

AD-(Assembled by Depot) 

XA - Do not requisition an "XA'-coded item. Order its next higher assembly. (Also, refer to the NOTE below.)

XB - If an -XB- item is not available from salvage, order it using the FSCM and part number given.

xc - Installation drawing, diagram, instruction sheet, field service drawing, that is identified by manufacturer's part number.

XD - Item is not stocked. Order an "XD--coded item through normal supply channels using the FSCM and part number given, if no NSN is available.

NOTE : Cannibalization or controlled exchange, when authorized, may be used as a source of supply for items with the above source codes, except for those source coded "XA' or those aircraft support items restricted by requirements of AR 700-42.

(2) Maintenance Code. Maintenance codes tell you the level(s) of maintenance authorized to USE and REPAIR support items. The maintenance codes are entered in the third and fourth positions of the SMR Code as follows:

(a) The maintenance code entered in the third position tells you the lowest maintenance level authorized to remove, replace, and use an item. The maintenance code entered in the third position will indicate authorization to one of the following levels of maintenance.

<table>
<thead>
<tr>
<th>Code</th>
<th>Application/Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td>C</td>
<td>Crew or operator maintenance done within organizational or aviation unit maintenance.</td>
</tr>
<tr>
<td>O</td>
<td>Organizational or aviation unit category can remove, replace, and use the item.</td>
</tr>
<tr>
<td>F</td>
<td>Intermediate direct support or aviation intermediate level can remove, replace, and use the item.</td>
</tr>
<tr>
<td>H</td>
<td>Intermediate general support level can remove, replace, and use the item.</td>
</tr>
<tr>
<td>L</td>
<td>Specialized repair activity can remove, replace, and use the item.</td>
</tr>
<tr>
<td>D</td>
<td>Depot level can remove, replace, and use tile item.</td>
</tr>
</tbody>
</table>
C-3. EXPLANATION OF COLUMNS (SECTIONS II AND III). (cont)

(b) The maintenance code entered in the fourth position tells whether or not the item is to be repaired and identifies the lowest maintenance level with the capability to do complete repair (i.e., perform all authorized repair functions).

(NOTE: Some limited repair may be done on the item at a lower level of maintenance, if authorized by the Maintenance Allocation Chart (MAC) and SMR codes.) This position will contain one of the following maintenance codes.

<table>
<thead>
<tr>
<th>Code</th>
<th>Application/Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td>O</td>
<td>Organizational or aviation unit is the lowest level that can do complete repair of the item.</td>
</tr>
<tr>
<td>F</td>
<td>Intermediate direct support or aviation intermediate is the lowest level that can do complete repair of the item.</td>
</tr>
<tr>
<td>H</td>
<td>Intermediate general support is the lowest level that can do complete repair of the item.</td>
</tr>
<tr>
<td>L</td>
<td>Specialized repair activity is the lowest level that can do complete repair of the item.</td>
</tr>
<tr>
<td>D</td>
<td>Depot is the lowest level that can do complete repair of the item.</td>
</tr>
<tr>
<td>Z</td>
<td>Nonreparable. No repair is authorized.</td>
</tr>
<tr>
<td>B</td>
<td>No repair is authorized. (No parts or special tools are authorized for the maintenance of a “B” coded item.) However, the item may be reconditioned by adjusting, lubricating, etc., at the user level.</td>
</tr>
</tbody>
</table>

(3) Recoverability Code. Recoverability codes are assigned to items to indicate the disposition action on unserviceable items. The recoverability code is entered in the fifth position of the SMR Code as follows:

<table>
<thead>
<tr>
<th>Recoverability Codes</th>
<th>Application/Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td>z</td>
<td>Nonreparable item. When unserviceable, condemn and dispose of the item at the level of maintenance shown in 3d position of SMR Code.</td>
</tr>
<tr>
<td>o</td>
<td>Reparable item. When uneconomically repairable, condemn and dispose of the item at organizationally or aviation unit level.</td>
</tr>
<tr>
<td>f</td>
<td>Reparable item. When uneconomically repairable, condemn and dispose of the item at intermediate direct support or aviation intermediate level.</td>
</tr>
<tr>
<td>h</td>
<td>Reparable item. When uneconomically repairable, condemn and dispose of the item at intermediate general support level.</td>
</tr>
</tbody>
</table>
Reparable item. When beyond lower level repair capability, return to depot. Condemnation and disposal of item not authorized below depot level.

Reparable item. Condemnation and disposal not authorized below specialized repair activity (SRA).

Item requires special handling or condemnation procedures because of specific reasons (e.g., precious metal content, high dollar value, critical material, or hazardous material). Refer to appropriate manuals/directives for specific instructions.

c. CAGEC (Column (3)). The Contractor and Government Entity Code (CAGEC) is a 5-digit numeric code which is used to identify the manufacturer, distributor, or Government agency, etc., that supplies the item.

d. Part Number (Column (4)). Indicates the primary number used by the manufacturer (individual, company, firm, corporation, or Government activity), which controls the design and characteristics of the item by means of its engineering drawings, specifications standards, and inspection requirements to identify an item or range of items.

NOTE: When you use an NSN to requisition an item, the item you receive may have a different part number from the part ordered.

e. Description and Usable On Code (UOC) (Column (5)). This column includes the following information:

(1) The Federal item name and, when required, a minimum description to identify the item.

(2) The physical security classification of the item is indicated by the parenthetical entry which is a physical security classification abbreviation (e.g., Phy Sec Cl (C)-Confidential, Phy Sec Cl (S)-Secret, Phy Sec Cl (T)-Top Secret).

(3) Items that are included in kits and sets are listed below the name of the kit or set.

(4) Spare/repair parts that make up an assembled item are listed immediately following the assembled item line entry.

(5) Part numbers for bulk materials are referenced in this column in the line item entry for the item to be manufactured/fabricated,

(6) When the item is not used with all serial numbers of the same model, the effective serial numbers are shown on the last line(s) of the description (before UOC).

(7) The usable on code, when applicable. (See paragraph 5, special information.)
(8) In the special tools list section, the basis of issue (BOI) appears as the last line(s) in the entry for each special tool, special TMDE, and other special support equipment. When density of equipment supported exceeds density spread indicated in the basis of issue, the total authorization is increased proportionately.

(9) The statement “END OF FIGURE” appears just below the last item description in Column 5 for a given figure in both section II and section III.

f. Qty (Column (6)). The QTY (quantity per figure column) indicates the quantity of the item used in the breakout shown on the illustration figure, which is prepared for a functional group, subfunctional group, or an assembly. A “V” appearing in this column in lieu of a quantity indicates that the quantity is variable and the quantity may vary from application to application.

C-4. EXPLANATION OF COLUMNS (SECTION IV).

a. National Stock Number (NSN) Index.

(1) Stock Number Column. This column lists the NSN by National item identification number (NIIN) sequence. The NIIN consists of the last nine digits of the NSN (i.e., 5305-01-674-1467). When using this column to locate an item, ignore the first 4 digits of the NSN. However, the complete NSN should be used when ordering items by stock number.

(2) Fig. column. This column lists the number of the figure where the item is identified/located. The figures are in numerical order in section II and section III.

(3) Item column. The item number identifies the item associated with the figure listed in the adjacent FIG. column. This item is also identified by the NSN listed on the same line.

b. Part Number Index, Part numbers in this index are listed by part number in ascending alphanumeric sequence (i.e., vertical arrangement of letter and number combination which places the first letter or digit of each group in order A through Z, followed by the numbers 0 through 9 and each following letter or digit in like order).

(1) CAGEC (Column (3)). The Contractor and Government Entity Code (CAGEC) is a 5-digit numeric code which is used to identify the manufacturer, distributor, or Government agency, etc., that supplies the item.

(2) Part Number Column. Indicates the primary number used by the manufacturer (individual, firm, corporation, or Government activity), which controls the design and characteristics of the item by means of its engineering drawings, specifications standards, and inspection requirements to identify an item or range of items.

(3) Stock Number Column. This column lists the NSN for the associated part number and manufacturer identified in the PART NUMBER and FSCM columns to the left.
(4) Fig. Column. This column lists the number of the figure where the item is identified/located in sections II and III.

(5) Item Column. The item number is that number assigned to the item as it appears in the figure referenced in the adjacent figure number column.

C-5. SPECIAL INFORMATION.

Usable On Code. The usable on code appears in the lower left corner of the description column heading. Usable on codes are shown as "UOC: . . . . . . . ." in the description column (justified left) on the first line applicable item description/nomenclature. Uncoded items are applicable to all models. Identification of the usable on codes used in this publication are:

<table>
<thead>
<tr>
<th>Code</th>
<th>Used On</th>
</tr>
</thead>
<tbody>
<tr>
<td>536</td>
<td>M6 Bayonet-Knife/w M10 Scabbard</td>
</tr>
<tr>
<td>538</td>
<td>M7 Bayonet-Knife/w M10 Scabbard</td>
</tr>
<tr>
<td>AE2</td>
<td>M9 Multipurpose. Bayonet System (MPBS)</td>
</tr>
</tbody>
</table>

C-6. HOW TO LOCATE REPAIR PARTS.

a. When National Stock Number or Part Number is Not Known.

(1) First. Using the table of contents, determine the assembly group or subassembly group to which the item belongs. This is necessary since figures are prepared for assembly groups and subassembly groups, and listings are divided into the same groups.

(2) Second. Find the figure covering the assembly group or subassembly group to which the item belongs.

(3) Third. Identify the item on the figure and note the item number.

(4) Fourth. Refer to the repair parts list for the figure to find the part number for the item number noted on the figure.

(5) Fifth. Refer to the part number index to find the NSN, if assigned.

b. When National Stock Number or Part Number is Known.

(1) First. Using the index of National stock numbers and part numbers, find the pertinent National stock number or part number. The NSN index is in National item identification number (NIIN) sequence. (See 4. 1(1)). The part numbers in the part number index are listed in ascending alphanumeric sequence. (See 4.b.) Both indexes cross-reference you to the illustration figure and item number of the item you are looking for.

(2) Second. After finding the figure and item number, verify that the item is the one you’re looking for, then locate the item number in the repair parts list for the figure.

C-7. ABBREVIATIONS.

Not applicable.

APPENDIX D EXPENDABLE/DURABLE SUPPLIES AND MATERIALS LIST

Section 1. INTRODUCTION

D-1. SCOPE.

This appendix lists expendable/durable supplies and materials you will need to operate and maintain the M6 bayonet-knife with scabbard, the M7 bayonet-knife with scabbard and the M9 Multi Purpose Bayonet System. This listing is for informational purposes only and is not authority to requisition the listed items. These items are authorized to you by CTA 50-970, Expendable\Durable Items (Except Medical, Class V, Repair Parts, and Heraldic Items), or CTA 8-100, Army Medical Department Expendable/Durable Items.

D-2. EXPLANATION OF COLUMNS.

a. Column 1 -Item Number. This number is assigned to the entry in the listing and is referenced in the narrative instructions to identify the material (e.g., “Use cleaning compound, 5, app D.”).

b. Column 2-Level. This column identifies the lowest level of maintenance that requires the listed item.

... Organizational Maintenance

c. Column 3-National Stock Number  This is the National stock number assigned to the item; use it to request or requisition the item.

d. Column 4-description. Indicates the Federal item name and, if required, a description to identify the item. The last line for each item indicates the Contractor and Government Entity Code (CAGEC) in parentheses followed by the part number.

e. Column 5-Unit of Measure (U/M). Indicates the measure used in performing, the actual maintenance function. This measure is expressed by a two-character alphabetical abbreviation (e.g., ea, in., pr). If the unit of measure differs from the unit of issue, requisition the lowest unit of issue that will satisfy your requirements.

### THE METRIC SYSTEM AND EQUIVALENTS

#### LINEAR MEASURE

- 1 Centimeter = 10 Millimeters = 0.01 Meter = 0.3937 Inch
- 1 Decimeter = 10 Centimeters = 0.394 Inches
- 1 Meter = 10 Decimeters = 100 Centimeters = 1000 Millimeters = 39.37 Inches
- 1 Dekameter = 10 Meters = 32.8 Feet
- 1 Hectometer = 10 Dekameters = 328.08 Feet
- 1 Kilometer = 10 Hectometers = 1000 Meters = 0.621 Mile = 3.280.8 Feet

- Millimeters = Inches times 25.4
- Inches = Millimeters divided by 25.4

#### WEIGHTS

- 1 Centigram = 10 Milligrams = 0.0154 Grain
- 1 Decigram = 10 Centigrams = 0.143 Grams
- 1 Gram = 10 Decigrams = 1000 Milligrams = 0.035 Ounces
- 1 Dekagram = 10 Grams = 0.353 Ounce
- 1 Hectogram = 10 Dekagrams = 3.527 Ounces
- 1 Kilogram = 10 Hectograms = 1000 Grams = 2.205 Pounds
- 1 Quintal = 100 Kilograms = 220.46 Pounds
- 1 Kilogram = 10 Hectograms = 1000 Grams = 2.205 Pounds
- 1 Dekagram = 10 Grams = 0.353 Ounce

#### CUBIC MEASURE

- 1 Cu Centimeter = 1000 Cu Millimeters = 0.061 Cu Inch
- 1 Cu Decimeter = 1000 Cu Centimeters = 61.02 Cu Inches
- 1 Cu Meter = 1000 Cu Decimeters = 1,000,000 Cu Centimeters = 35.31 Cu Feet

#### SQUARE MEASURE

- 1 Sq Centimeter = 100 Sq Millimeters = 0.155 Sq Inch
- 1 Sq Decimeter = 100 Sq Centimeters = 15.5 Sq Inches
- 1 Sq Meter (Centare) = 10 Sq Decimeters = 10,000 Sq Centimeters = 10.764 Sq Feet
- 1 Sq Dekameter (Are) = 100 Sq Meters = 107.64 Sq Feet
- 1 Sq Hectometer (Hectare) = 100 Sq Dekameters = 2.471 Acres
- 1 Sq Kilometer = 100 Sq Hectometers = 1,000,000 Sq Meters = 0.386 Sq Mile

#### TEMPERATURE

- 5/9 (°F - 32) = °C
- 9/5 (°C + 32) = °F

#### APPROXIMATE CONVERSION FACTORS

This fine document...

Was brought to you by me:

**Liberated Manuals -- free army and government manuals**

Why do I do it? I am tired of sleazy CD-ROM sellers, who take publicly available information, slap “watermarks” and other junk on it, and sell it. Those masters of search engine manipulation make sure that their sites that sell free information, come up first in search engines. They did not create it... They did not even scan it... Why should they get your money? Why are not letting you give those free manuals to your friends?

I am setting this document FREE. This document was made by the US Government and is NOT protected by Copyright. Feel free to share, republish, sell and so on.

I am not asking you for donations, fees or handouts. If you can, please provide a link to liberatedmanuals.com, so that free manuals come up first in search engines:

<A HREF="http://www.liberatedmanuals.com/">Free Military and Government Manuals</A>

– Sincerely
   Igor Chudov
