

TECHNICAL MANUAL**TM 9-4931-508-34P**

*TM 9-4931-508-34P
HEADQUARTERS
DEPARTMENT OF THE ARMY
WASHINGTON, DC, 16 April 1987
SUPERSEDED COPY DATED 30 AUGUST 1978

DIRECT SUPPORT AND GENERAL SUPPORT MAINTENANCE**REPAIR PARTS AND SPECIAL TOOLS LIST**

**FOR
RADIO FREQUENCY SWEEPER, WEINSCHEL ENGINEERING COMPANY, MODEL 430C**

NSN 5895-01-042-9480

Current as of 21 December 1986

Approved for public release; distribution is unlimited.

REPORTING ERRORS AND RECOMMENDING IMPROVEMENTS

You can help improve this manual. If you find any mistakes or if you know of a way to improve the procedures, please let us know. Mail your letter or DA Form 2028 (Recommended Changes to Publications and Blank Forms) to: Commander, U.S. Army TMDE Support Group, ATTN: AMXTM-LML, Redstone Arsenal, AL 35898-5400. A reply will be furnished directly to you.

TABLE OF CONTENTS

Section I.	INTRODUCTION	1
Section II.	REPAIR PARTS LIST	2-1
Group 0010	Radio Frequency Sweeper	2-1
0020	Circuit card assembly (power supply)	2-1
0030	Circuit card assembly (mother board).....	2-3
0040	Circuit card assembly (sweep & marker generator)	2-4
0050	Circuit card assembly (trimmer)	2-6
Section III.	SPECIAL TOOLS LIST (Not applicable)	
Section IV.	NATIONAL STOCK NUMBER AND PART NUMBER INDEX ...	I-1

*This manual supersedes TM 9-4931-508-34P, 30 August 1978.

DIRECT SUPPORT AND GENERAL SUPPORT MAINTENANCE**REPAIR PARTS AND SPECIAL TOOLS LIST****SECTION I. INTRODUCTION**

1. **Scope.** This RPSTL lists and authorizes spares and repair parts required for performance of direct and general support maintenance of Radio Frequency Sweeper, Weinschel Engineering Company, Model 430C. It authorizes the requisitioning, issue, and disposition of spares and repair parts as indicated by the Source, Maintenance and Recoverability (SMR) codes.
2. **General.** In addition to this section I, Introduction, this Repair Parts and Special Tools List is divided into the following sections:
 - a. **Section II. Repair Parts List.** A list of spares and repair parts authorized by this RPSTL for use in the performance of maintenance. Parts lists are composed of functional groups in ascending numeric sequence. Parts are listed in alphabetical sequence within each figure number.
 - b. **Section III. Special Tools List** Not applicable.
 - c. **Section IV. National Stock Number and Part Number Index.** A list, in National Item Identification Number (NIIN) sequence, of all National Stock Numbered (NSN) items appearing in the listing, followed by a list in alphanumeric sequence of all part numbers appearing in the listing. NSN's and part numbers are cross-referenced to the figure and item number appearance.
3. **Explanation of Columns (Section 11)**
 - a. **Item No. (Column (1)).** Indicates the number used to identify each item appearing in the listing.
 - b. **SMR CODE (Column (2)).** The Source, Maintenance, and Recoverability (SMR) code is a 5- position code containing supply/requisitioning information, maintenance category authorization criteria, and disposition instructions as shown in the following breakdown:

*Complete Repair: Maintenance capacity, capability, and authority to perform all the corrective maintenance tasks of the "Repair" function in a use/user environment in order to restore serviceability to a failed item.

(1) Source Code. The source code tells you how you get an item needed for maintenance, repair, or overhaul of an end item/equipment. Source codes are always the first two positions of the SMR code. Explanation of source codes follows:

Code	Explanation
-------------	--------------------

- | | |
|----|--|
| PA | Stocked items; use the applicable NSN to request/requisition items with this code. This item is authorized to the category indicated by the code entered in the 3d position of the SMR code. |
| XD | Item is not stocked. Order an "XD" coded item through normal supply channels using the FSCM and part number given, if no NSN is available. |

(2) Maintenance Code. Maintenance codes tell you the level(s) of maintenance authorized to USE and REPAIR support items. The maintenance codes are entered in the third and fourth positions of the SMR code as follows:

- (a) The maintenance code entered in the third position tells maintenance level authorized to remove, replace, and use an item. The maintenance code entered in the third position will indicate authorization to the following level of maintenance.

Code	Application/Explanation
-------------	--------------------------------

- | | |
|---|---|
| F | Direct support level can remove, replace, and use the item. |
|---|---|

- (b) The maintenance code entered in the fourth position tells you whether or not the item is to be repaired and identifies the lowest maintenance level with the capability to do complete repair (i.e., perform all authorized repair functions). This position will contain one of the following codes.

Code	Application/Explanation
-------------	--------------------------------

- F Direct support is the lowest level that can do complete repair of the item.
- Z Nonreparable. No repair is authorized.
- L Specialized repair activity (contractor plant) is the lowest level that can do complete repair of the item.

(3) Recoverability Code. Recoverability codes are assigned to items to indicate the disposition action on unserviceable items. The recoverability code is entered in the fifth position of the SMR code as follows:

Recoverability Definition

Codes

- Z Nonreparable item. When unserviceable, condemn and dispose of the item at the level of maintenance shown in the third position of the SMR code.
- F Reparable item. When uneconomically repairable, condemn and dispose of the item at the direct support level.
- L Reparable item. Condemnation and disposal not authorized below specialized repair activity (SRA).

c. **FSCM (Column (3)).** The Federal Supply Code for Manufacturer (FSCM) is a 5-digit numeric code which is used to identify the manufacturer, distributor, or Government agency, etc., that supplies the item.

d. **PART NUMBER (Column (4)).** Indicates the primary number used by the manufacturer (individual, company, firm, corporation, or Government activity), which controls the design and characteristics of the item by means of its engineering drawings, specifications standards, and inspection requirements to identify an item or range of items.

NOTE: When you use an NSN to requisition an item, the item you receive may have a different part number from the part ordered, but go ahead and use or furnish it as the replacement part.

e. **DESCRIPTION AND USABLE ON CODE (UOC) (Column (5)).** This column includes the following information:

- (1) The Federal item name and, when required, a minimum description to identify the item.

(2) The usable on code, when applicable (see paragraph 5, Special Information).

f. **QTY (Column (6)).** The QTY (quantity per figure column) indicates the quantity of the item used in the parts list which is prepared for a functional group, subfunctional group, or an assembly.

4. Explanation of Columns (Section IV)

a. NATIONAL STOCK NUMBER (NSN) INDEX

(1) **STOCK NUMBER column.** This column lists the NSN by National item identification number (NIIN) sequence. The NIIN consists of the last nine digits of the NSN NSN (i.e., 5305-01-674-1467). When using this column to locate an item, ignore the first 4 digits of NIIN the NSN. However, the complete NSN should be used when ordering items by stock number.

(2) **FIG. column.** Indicates the figure number used to identify each item appearing in the listing. The figures are in numerical order in Section II.

(3) **ITEM column.** The item number identifies the item associated with the figure listed in the adjacent FIG. column. This item is also identified by the NSN listed on the same line.

b. **PART NUMBER INDEX.** Part numbers in this index are listed by part number in ascending alphanumeric sequence (i.e., vertical arrangement of letter and number combination which places the first letter or digit of each group in order A through Z, followed by the numbers 0 through 9 and each following letter or digit in like order). (1) FSCM column. The Federal Supply Code for Manufacturer (FSCM) is a 5-digit numeric code used to identify the manufacturer, distributor, or Government agency, etc., that supplies the item.

(2) **PART NUMBER column.** Indicates the primary number used by the manufacturer (individual, firm, corporation, or Government activity), which controls the design and characteristics of the item by means of its engineering drawings, specifications standards, and inspection requirements to identify an item or range of items.

(3) **STOCK NUMBER column.** This column lists the NSN for the associated part number and manufacturer identified in the PART NUMBER and FSCM columns to the left. The part number line entry (with NSN, when available) identifies the first figure/item number appearance for which the part number is applicable. The part number is not listed for additional figure/item number appearances identified by that part number.

(4) **FIG. column** This column lists the number of the figure where the item is located in Section II.

(5) **ITEM column.** The item number is that number assigned to the item as it appears in the figure referenced in the adjacent figure number column.

5. Special Information

- a. Repair parts for components of standards sets which can be identified as existing in the supply system will be requisitioned through normal supply channels from the appropriate supply commodity manager.
- b. Repair parts for components of standards sets which cannot be identified as to proper supply source will be requisitioned from USAMICOM, using routing identifier B64 and furnishing, as a minimum, the following as exception data.
 - (1) Component stock number of the individual end item to be repaired.
 - (2) Component manufacturer's equipment model number and serial number.
 - (3) The equipment manufacturer's stock number as listed in the appropriate manual for the desired repair part.
 - (4) The repair part reference designation, circuit reference, circuit symbol schematic designation, or reference number as listed in the manufacturer's manual.
 - (5) The technical specification of the repair part as contained in the appropriate manufacturer's manual.
 - (6) The title and date of the manufacturer's manual from which the information in a and b(3), (4), and (5) above was taken.
- c. For requisitioning miscellaneous consumable maintenance supplies or expendable supplies, use CTA 50-970.
- d. The usable on code appears in the lower left corner of the Description column heading. Usable on codes are shown as "UOC" in the Description column (justified left) on the first line applicable item description/nomenclature.
- e. This RPSTL does not contain illustrations for items listed in Section II, since the manufacturer's manuals contain exploded view illustrations which are adequate for repair parts location. Copies of the manufacturer's manuals, Weinschel Engineering Company, Model 430C, are furnished with the equipment for which this RPSTL is prepared. The figure and item numbers in the listing are for locating the item within this RPSTL.

6. How to Locate Repair Parts

a. When National Stock Number or Part Number is Not Known.

- (1) **First.** Refer to the parts list to locate the item by description. This list is listed in alphabetical sequence within each figure number.
- (2) **Second.** After locating the item in the Repair Parts List, refer to the Part Number Index to find the NSN.

b. When National Stock Number or Part Number is Known.

(1) **First.** Using the Index of National Stock Numbers and Part Numbers, find the pertinent National Stock Number or Part Number. The NSN index is in National Item Identification Number (NIIN) sequence. The part numbers in the Part Number index are listed in ascending alphanumeric sequence. Both indexes cross-reference you to the illustration figure and item number of the item you are looking for.

(2) **Second.** After finding the figure and item number, verify that the item is the one you're looking for, then locate the item number in the repair parts list for the figure.

7. **Abbreviations** Not applicable.

***U.S. GOVERNMENT PRINTING OFFICE : 1987-733-679/40573**

035606-000

This fine document...

Was brought to you by me:

Liberated Manuals -- free army and government manuals

Why do I do it? I am tired of sleazy CD-ROM sellers, who take publicly available information, slap “watermarks” and other junk on it, and sell it. Those masters of search engine manipulation make sure that their sites that sell free information, come up first in search engines. They did not create it... They did not even scan it... Why should they get your money? Why are not letting you give those free manuals to your friends?

I am setting this document FREE. This document was made by the US Government and is NOT protected by Copyright. Feel free to share, republish, sell and so on.

I am not asking you for donations, fees or handouts. If you can, please provide a link to liberatedmanuals.com, so that free manuals come up first in search engines:
