TECHNICAL MANUAL No. 9-4940-538-14&P

HEADQUARTERS DEPARTMENT OF THE ARMY WASHINGTON. DC. 9 OCTOBER 1981

Operator's, Organizational, Direct Support And General Support Maintenance Manual Including Repair Parts List For

> BOOTH, SPRAYING Model 225A NSN 4940-00-078-4126

#### REPORTING ERRORS AND RECOMMENDING IMPROVEMENTS

You can help improve this manual. If you find any mistakes or if you know of a way to improve the procedures, please let us know. Mail your letter, DA Form 2028 (Recommended Changes to Publications and Blank Forms), or DA Form 2028-2, located in the back of this manual direct to: Commander, US Army Armament Materiel Readiness Command, ATTN: DRSAR-MAS, Rock Island, IL 61299. A reply will be furnished directly to you.

#### NOTE

This manual is published for the purpose of identifying an authorized commercial manual for the use of the personnel to whom this equipment is issued.

Manufactured by: Inland Manufacturing Co. 1108 Jackson St. Omaha, NB 68102

Procured under Contract No. DAAA09-79-F-8110

This technical manual is an authentication of the manufacturers' commercial literature and does not conform with the format and content specified in AR 310-3, Military Publications. This technical manual does, however, contain available information that is essential to the operation and maintenance of the equipment.

### INSTRUCTIONS FOR REQUISITIONING PARTS NOT IDENTIFIED BY NSN

When requisitioning parts not identified by National Stock Number, it is mandatory that the following information be furnished the supply officer.

- 1 Manufacturer's Federal Supply Code Number 92418
- 2 Manufacturer's Part Number exactly as listed herein.
- 3 Nomenclature exactly as listed herein, including dimensions, if necessary.
- 4 Manufactuer's Model Number 225A
- 5 Manufacturer's Serial Number (End Item)
- 6 Any other information such as Type, Frame Number, and Electrical Characteristics, if applicable.
- 7 If DD Form 1348 is used, fill in all blocks except 4, 5, 6, and Remarks Field in accordance with AR 725-50.

#### Complete Form as Follows:

- (a) In blocks 4, 5, 6, list manufacturer's Federal Supply Code Number 92418 followed by a colon and manufacturer's Part Number for the repair part.
- (b) Complete Remarks Field as follows:

Noun: (nomenclature of repair part)

For: NSN 4940-00-078-4126

Manufacturer: Inland Mfg. Co.

1108 Jackson Street Omaha, NB 68102

Model:

Serial: (of end item)

Any other pertinent information such as Frame Number, Type, Dimensions. etc.

#### FLUSHING AND PAINT SPRAY BOOTH

Your new spray booth will accommodate radiators and heater cores from automobiles, trucks, tractors and industrial equipment of any size that can be placed inside the cabinet. It is used for external pressure washing and internal pressure flushing after vat cleaning. It is also used for painting the radiator. The Flushing and Paint Spray Booth is equipped with exhaust fan and water curtain to reduce paint fumes and fire hazards.

This equipment is constructed of the highest quality material and is manufactured in accordance with strict quality assurance standards. Developed from vast experience in this field, it is designed to serve you faithfully, economically and profitably for many years.

The information contained in this manual will help you take advantage of all the features built into your machine for increased production and profits in the radiator business. Please read the instructions carefully. If you have any questions regarding the installation or operation of this machine, do not hesitate to contact us immediately.

### 1. SPECIFICATIONS

Overall Dimensions: 66" left to right

38" front to back

MODEL 225A

90" high

Door Opening 51" wide, 61" high

Electrical: 1/2 H.P. Motor 115/60/1

**8.4 AMPS** 

Exhaust Fan & Flue: Six Blade -15"

Drain Both Units: bottom
Net Weight: 800 lbs.

### 2. INSTALLATION (See Exploded View Drawing)

- 2.1. To facilitate installation, locate unit near air, water, drain and electrical outlets.
- 2.1.1. Place unit over floor drain or use 2" diameter pipe to conduct water to floor drain and level.
- 2.1.2. Connect water and air to hoses furnished. Desirable air pressure for washing and backflushing is 150 psi. Connect water curtain supply to 1/2" pipe at upper right side. Copper tubing with adapters may be used.
- 2.1.3. Connect power cord to 115 volt. The power cord is provided with a third wire for ground in accordance with standard safety practices. Since machine operates under moist conditions this ground must be permanently connected. An additional woven copper ground strap attached to the cabinet and to a water pipe is recommended as an additional safeguard.
- 2.1.4. Install stack pipe through ceiling for proper air flow from exhaust. This pipe should avoid sharp turns. A straight run is recommended. A suitable rain shield is required.

Model 500 requires 12" pipe; Model 225A 15"pipe; Model 226 18" pipe.

#### 3. INSTALLATION CHECKOUT

- 3.1. Operate exhaust fan and check for exhaust air flow. (Fan switch is located on right side of cabinet near eye level.)
- 3.2. Make sure all hoses are connected and turn on water and air. Check for leaks.

#### 4. OPERATION

#### 4.1. EXTERNAL WASHING

4.1.1. Disconnect flush gun from side of booth and attach washing nozzle by means of snap-on coupling. Place radiator on rack. 4.1.2. With radiator upright, turn on flush gun water valve

and wash exterior of radiator with water pressure. Open flush gun air injector control valve intermittently to increase pressure. Wash radiator from back to front first; this avoids forcing bugs and gravel deeper into radiator core.

#### 4.2. INTERNAL BACK FLUSHING

- 4.2.1. Connect radiator outlet to booth hose. Clamp hose to radiator outlet using Universal Quick Acting Clamp, Catalog No. 3011.
- 4.2.2. Close booth door. Attach flush gun to fitting at right side of booth by means of snap on coupling.
- 4.2.3. Turn on flush gun water valve and back flush radiator by pressing flush gun air injector control lever. Keep lever depressed one or two seconds and repeat until water expelled from top of radiator is clear. Allow time for radiator fill with water between each injection of air pressure.
- 4.2.4. Turn radiator upside down and repeat water and air injection two or three times. This serves to remove heavy particles of rust and lime.

#### NOTE:

The Models 225A and 226 are equipped with a hoist for handling large radiators.

#### 4.3. PAINTING RADIATOR

- 4.3.1. Radiator should be thoroughly dry before painting. Use Leak Exposer for fast drying.
- 4.3.2. Place radiator inside booth and turn on exhaust fan.
- 4.3.3. Turn on water curtain. This provides a light flow of water behind the radiator to eliminate paint build up on the baffle of the booth. IMPORTANT: Use care when adjusting water curtain valve. A heavy curtain of water will cause water to fall on radiator.

#### **NOTE:**

Baffle Plate at rear of booth must be kept clean. Excessive build up of paint on the baffle will cause the water to spray.

4.3.4. Paint radiator with spray gun provided. use special non-insulating black radiator paint, Catalog No. 2029.

### PREVENTATIVE MAINTENANCE

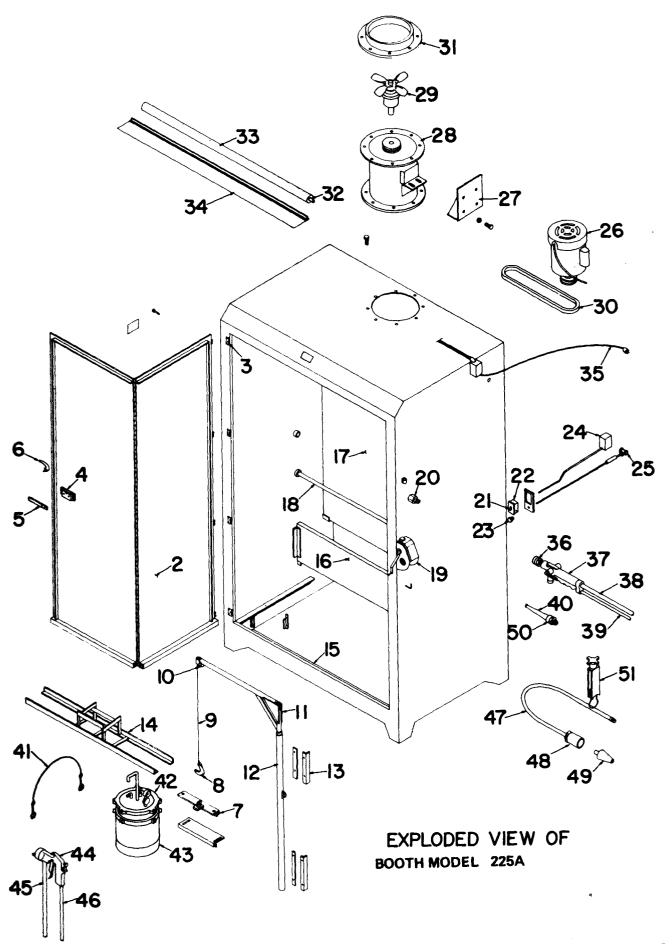

5.1. FAN BLADES. Periodically remove baffle plate and clean fan blades of dried paint. **CAUTION:** 

Disconnect motor power plug before cleaning.

- 5.2. HOIST. Oil hoist mechanism and pulley with SAE 20 W oil.
- 5.3. SNAP-ON CONNECTIONS. Snap-on couplings require special washers. Replace as required.

#### 5.4. PAINT

- 5.4.1. EXTERIOR PAINT. Exterior surfaces have been coated with Epoxy Red Oxide Metal Primer (Cat. #4016-P) and finished with a tough chemical resistant twocomponent catalyzed polyurethane safety orange (Cat. #4024). Clean and repaint surfaces as needed to preserve a good finish and an attractive appearance.
- 5.4.2. INTERIOR PAINT. The interior is coated with Epoxy Red Oxide Metal Primer, Cat. #4016-P and then coated with Spray Booth Coating. This protective coating prevents paint build up. When paint in interior is excessive, peel off coating and respray. Spray Booth Coating, Cat. #4030 is thinned with Thinner, Cat. #4030-A.

## This fine document...

Was brought to you by me:

## <u>Liberated Manuals -- free army and government manuals</u>

Why do I do it? I am tired of sleazy CD-ROM sellers, who take publicly available information, slap "watermarks" and other junk on it, and sell it. Those masters of search engine manipulation make sure that their sites that sell free information, come up first in search engines. They did not create it... They did not even scan it... Why should they get your money? Why are not letting you give those free manuals to your friends?

I am setting this document FREE. This document was made by the US Government and is NOT protected by Copyright. Feel free to share, republish, sell and so on.

I am not asking you for donations, fees or handouts. If you can, please provide a link to liberatedmanuals.com, so that free manuals come up first in search engines:
